It causes interference and makes the analog signal sound like shit.

Historically, there has rarely been any SSTV activity on 160-40 meters. It's always been 20 with just a very small amount of activity on 15 or 10...and 15-10 have been pretty bad lately due to being at the bottom of the solar cycle.

So, that leaves 20 meters. Leave your radio at 14.230 + or - and you will hear/see it.

1930. Why is iBiquity's IBOC Broadcast Technology So Evil ? - Please Enlighten Me !

- Please enlighten me: Why is IBOC so Evil?
-

Tom K in LA,

Here is an Image of an AM {IBOC} "HD" Radio Signal
that is being Broadcast on 830 kHz.

http://earthsignals.com/add_CGC/KMXE.PDF

Notice the two HD Side Bands that extend-out on both
sides from 815~820 kHz and 840~845 kHz.

The 'lower' 815~820 kHz HD Side Band interfers
with the AM Radio Station on 820 kHz.

The 'high' 840~845 kHz HD Side Band interfers
with the AM Radio Station on 840 kHz.

The Simple {Apparent} and Scientific {Actual} Fact Is :
That IBOC Trashes the AM/MW Radio Band [.]
-Note- [.] Means PERIOD Final and Absolute.

WHY - AM/MW "HD" {IBOC} Radio is 'by-design' Engineered
to provide a Pair of {Left and Right} Primary Digital Side-Bands
and that these Two Side-Band can be used to produce "Stereo"
sound from a "HD" Radio that has a Two-Channel Audio Amplifier
and a Pair of Speakers.
http://electronicdesign.com/Files/29/12194/Figure_02.gif

IBOC's BUILT-IN INTERFERENCE :
All of the IBOC planning is done based on the IDEA that in
the vast majority of Metro Areas where the AM/MW Band
is crowded there is 20 kHz to 30 kHz or more between the
'local' AM/MW Radio Stations and that the 'other' AM/MW
Radio Stations that can be heard in the Metro Area serve
'other' Areas an thus are NOT in the 'local' 10 mv/m Service
Contour for the Radio Stations serving the Metro Area.

LEGALLY - The IBOC Side-Band Interference by FCC
Technical Standards : IS NOT INTERFERENCE [.]

NEW AM/MW RADIO LISTENERS :
For the Next Generation of AM/MW Radio Listeners
Digital Stereo "HD" AM/MW Radio using iBiquity's
IBOC Technology will be what they grow-up with and
Enjoy when making the 'Choice' to Listening to "Local"
AM/MW Radio in Stereo.

OLD AM/MW RADIO LISTENERS :
For the Pasting Generation of AM/MW Radio Listeners
Analog Mono AM/MW Radio using the 'old' stantard
Amplitude Modulation (AM) Technology will with time be
a thing of the past; and they will no longer be able to
Enjoy Listening to "Distant" (DX) on the AM/MW Radio.

WARNING - AM/MW DX'er Fear that iBiquity's IBOC Broadcast
Technology : Will Virtually Destroy All AM/MW DX'ing at Night.

A SECOND LOOK AT : iBiquity's IBOC {Hybrid Mode}
Broadcast Signal Mask/Scheme for AM/MW "HD" Radio
http://www.dallas.net/~jvpoll/rfi/AM620_KMKI/AM_IBOC_Mask10.gif
- Lower Digital Sidebands {Co-SideBand}
* Analog Host Signal (Mono) {Nested}
+ Upper Digital Sidebands {Co-SideBand}
-Note- The IBOC Signa supports the current AM Mono Signal
as well as the Digital {IBOC} Signal. Provides for 40 kbps Data
Rate, for Full Stereo plus a Low Speed Data Path. Audio 36 kbps,
Song Title and Artist 4 kbps .
http://www.rthk.org.hk/about/digitalbroadcasting/DSBS/ABU_AIR_2003/ses1_files/frame.htm#sl
ide0143.htm

BY-DESIGN - iBiquity's IBOC Technology has the Analog
"AM" Signal that is 'Nested' {On-Channel} in-between the
Two Outer {Off-Channel} Digital Side-Bands
http://groups.google.com/group/rec.audio.tech/msg/8b2cd430f2f46f48
This Scheme creates Off-Channel Noise and Interference
to the Adjacent Lower and Upper AM/MW Radio Channels.

I don't think that is true. I believe the waves would add, subtract or
be somewhere in between depending on their phase relationship.

What you say is interesting, but...wave theory notwithstanding, what we have are TWO RF signals on -essentially- the same frequency (ignoring Doppler, libration, etc), the incident and the reflected. And I think we both agree that the signals "overlap" for .75 seconds (as so aptly stated in your 'train' analogy). Just like the old USSR jamming the VOA -- two signals on the same frequency. Why wouldn't they interfere for the .75 seconds in question?

Let me give you one more analogy:

Assume the moon is -totally- absorbent (no RF reflections).

Next assume an earth station sends a 2 second long 7.0000 MHz CW signal towards the moon.

Finally, assume there is a radio operator on the moon. The -instant- he hears the earth signal, he turns on -his- 7.0000 MHz CW transmitter.

Again, because of the 2 second earth signal and only a 1.25 second transit time, the two signals will overlap by 0.75 seconds.

How can they NOT interfere with each other for the .75 second overlap? This is -exactly- like SWBC jamming (only unintentional) and all the 'wave theory' in the world doesn't mean jamming doesn't work. Sorry, but I believe two signals on the same frequency during the same period of time will interfere with each other.

If you have to ask the question - why is IBOC so evil? Then, I have to question your basic understanding of broadcast modes and standards that have been in place for decades. (And sanctioned by the FCC I might add.)

Do your own research (there's plenty of info on the web) as well as your own listeniing and then come back later and I'll quiz you.

Really. I bought one of the $225 ones from Circus City... this was a month
ago, and I'm still waiting for delivery. I hate places that will only ship
to APO's via Parcel Post (but I suppose that's better than not shipping to
them at all, like much of the electronics and such from Amazon). Wish it
would get here. I'm anxious to try it out.

I believe that there should be copyrights/patents, but not with the sort of force they now exist with.

For instance, a patent should only be good for say, five years. If you think about it, technology changes so much in that amount of time that any patent will long since have been superceded.

Ditto with copyright, at least for music. Maybe only a year or two on that. If you think about it, 90% or more of all music is passe and very few people care to listen to it after only a few months. Certainly the market drops off sharply after that time. Some allowance should be made for composers and artists ONLY to get per-play radio royalties, but the RIAA and the record companies themselves should get no residuals past a cutoff point to be determined by sales figures. i.e. when sales drop off to say, 1000 units a month, royalties should go to only the artist and composer. Smarter people than me could crunch the numbers better than me.

On Wed, 23 Jan 2008 14:52:57 -0800, tom k in L.A. wrote:

> Please enlighten me: Why is IBOC so Evil?

The primary complaint is that the IBOC digital signal is transmitted in two channels either side of the station using it, causing massive interference.

For example, if a station on 1510kHz runs IBOC, the digital signals are transmitted in 1495-1505kHz (interfering with stations on 1490 and 1500) and from 1515-1525kHz. (interfering with 1520 and 1530kHz)

(on FM, only one frequency on each side is interfered with, and in many cases those frequencies were already useless due to interference problems involving the station's *analog* signal. It does make things hard on FM DXers though.)

Other complaints:

- Poor coverage in the current "hybrid mode", where analog simulcasts must be accomodated.

- Self-interference: if the station isn't balanced properly or the receiver has an unusually wide IF bandwidth, the IBOC digital signal can interfere with the station's own analog signal.

- We could have had something better. A system called "Eureka-147" is seeing success in Britain and at least in technical terms across Europe. This Eureka system would have offered improved fidelity over IBOC, more subchannels, and no interference issues.

1943. (OT) : More Anti-Radio Drivel from I B OC'Deed and Half-Crocked

- First, HD doesn't stand for high-definition, it stands for hybrid
- digital, as you should know since you spend an awful lot of time
- worrying about it.
-
- Second, copyrights should be abolished. They act to suppress
- creativiity rather than promote it, they go against nature, and they
- violate the state prohibition against imposing religion because they
- force the public to respect the sanctity of an immaterial concept.
-
- Third, why the hell are you spamming this group,
- you worthless piece of shit?
-

JS,

First - The Proposed RIAA Sponored Law would Cripple and/or Kill All "Free" Over-the-Air Radio -not- just HD Radio.

Second - The Individual CopyRight/Patent should be Limited to 20 Years -and- The Corporate CopyRights/Patents should Limited to 10 Years; plus a 50% CopyRight/Patent Franchising Fee Paid to the Government for the Government allowing "The Corporation" to have a Limited Monopoly.

Third - I an glad that someone besides myself sees that most of what I B OC'Deed and Half-Crocked Posts here is Anti-Radio Drivel that he trys to pass-off as Anti-HD-Radio Information. To Date : I B OC'Deed and Half-Croked has Posted 750+ Messages and Replies to Rec.Radio.Shortwave and the vast majority have been Anti-Radio Drivel possing as Anti-HD-Radio Information.

IMHO - It' Ain't SPAM : It's Just Plain Drivel ~ RHF

If you had a receiver and non-directional antenna near the moon's
surface to roughly halfway from the moon to the earth yes you would have
that vector sum to consider. The mixing would occur in the antenna at
those range of locations.

Is that where you are located?
How does the green cheese taste?

Halfway from the earth to the moon or anywhere on the earth the signals
do not exist at the same time so there is no vector sum to consider.

For the purpose of the argument YOU are trying to make we don't have to
imagine the independent transmitter on the moon.

Do you understand the direct and moon reflected signals do not exist at
the same time anywhere on the earth?

My quandary is how much to charge you per clue. I think I may have
stumbled across the ultimate get rich quick scheme.

>
- I don't think that is true.
- I believe the waves would add, subtract or be somewhere
- in between depending on their phase relationship.

BP,

These are Phase Relationships :
* Two Identical Sine Waves {A Wave Length} perfectly
in-sync 'In Phase" + Additive
* Two Identical Sine Waves {A Wave Length} perfectly
out-of-sync 'Out-of-Phase" - Subtractive

However, when Two Identical Sine Waves are separated by
hundreds of Wave Lengths beyond a One Cycle Period :
They then are beyond being 'In' -or- 'Out' of Phase.

Thus this first becomes a Time Base Relationship and after
the Time Base Issues have been Resolved (If Possible) then
you could consider Addressing the Phase Relationship
between the two {like} Waves.

IMHO - Signal Phasing is one of the least concerns -wrt-
Earth-Moon-Earth Signals and the Relationship of the Earth
Signal Pulse and the Lunar Reflection Image :
While "Time" is the Essence of the Problem.

> and from 1515-1525kHz. (interfering with 1520 and 1530kHz)

That can be compared to an analog station on 1510. Its transmissions cover from 1500-1520 kHz. This interferes with the stations on 1500 and 1520. Adjacent channel interference is managed by keeping station apart both geographically and frequency-wise. This may work during the day, but not at night.

>
> (on FM, only one frequency on each side is interfered with, and in many

Poor coverage of the digital portion, the analog portion of the hybrid signal still has the same coverage.

>
> - Self-interference: if the station isn't balanced properly or the
> receiver has an unusually wide IF bandwidth, the IBOC digital signal can
> interfere with the station's own analog signal.

Yes, the higher fidelity receivers suffer more with than cheaper ones because of the digital signals.

>
> - We could have had something better. A system called "Eureka-147" is
> seeing success in Britain and at least in technical terms across Europe.
> This Eureka system would have offered improved fidelity over IBOC, more

> subchannels, and no interference issues.

However, the FCC required a digital system to be compatible with analog. Eureka-147 is not used in the AM band. This is not without issues, though. Switching encoding from MPEG to AAC+ will obsolete many receivers.

An interesting note, the AM analog signals received on my IBOC receiver sound better than that heard on almost any other AM receiver I own. The FM on the receiver appears to have excellent selectivity also.

For me, FM IBOC works. The IBOC signals are clearer. The second program offerred by some station does provide unique programming.

For me, AM IBOC is a waste. I can receive no AM digital transmissions. I do hear the interference caused by the digital signals. (I am also 50 miles from the nearest transmitter using IBOC.)

The FCC is managing the airwaves in a manner that does not support DXing. They are focused on radio working in the local markets, not long distance reception. The broadcasters are also focused on the local markets as that is where the advertising revenue comes from. On AM, IBOC is attempting to improve audio fidelity for listeners in the local markets. It may (or may not) be working.

The IBOC noise won't stop until the broadcasters are convinced there is no worthwhile demand for either "HD/crystal clear" radio or subscription radio. I think pay radio has more potential than HD radio.

Pay radio schemes don't have to leave the listeners with normal radios completely in the dark. NPR is supposed to be considering a plan in which a free channel and a subscription channel would mostly simulcast during pledge drives. But, when the pledge breaks comes up, the subscribers would hear normal programming and people with normal radios would hear something like "Pay up, you cheapskates, and you won't have to hear these damn beg-athons anymore!"

1960. Comments on the Creative Zen V Plus as a recorder.

Newsgroup: rec.radio.shortwave
Date: 2008-01-24 16:35:18 UTC
From: swler@live.com
Message-ID: <65f5aea6-7662-4698-8b9e-9dcc92e2443e@u10g2000prn.googlegroups.com>
Source record: 134928

Back in July I traded form a pair of one week old unused Zen V Plus
MP3 players, with FM and a michophone
and line inputs. It is a very nice unit. Zero RFI, small and it will
operate for at least 15 hours on an internal
Lithium-ion that is recharged via the USB port. My biggest gripe about
the Zen was the only OS it operates
under is XP. That can be fixed if you are determined enough. It will
operate under Windows 98SE, ME,
and 2000.

It is great for field recordings and is a very nice item.

Sadly there is a snake in the grass. It's OLED display is extremely
fragile. The case has no internal
bracing some any significant 'squeeze" along the long axis can and has
fractured the OLED display.

Creative's warranty is 90 days parts and labor and one year on parts.
They consider a fractured
OLED display to not be a warranty failure and will hit you for labor
and parts. Two of my coworkers
paid around $70 each for repair of this $100 item. Insane. Creative
will not sell individuals the OLED
display. I guess they are afraid someone will try to build something
with it.

I know all of this because my display started failing while it was
under full warranty but I didn't realize
what was happening. Knowing what I now know, I suspect that even it I
had sent it in at that time
I would still be out of luck. Creative's customer support (more like
unsupport) is clueless beyond
belief. During our week long series of correspondences I was
continuously offered products that
had nothing to do with my problem. It took 5 days to finally reach
someone who could just tell
me that "no, we do not sell repair parts". And that Email even tries
to sell me a video phone.

So if your decide to buy a Zen, still a good device, be sure to buy an
extended no fault warranty,
and to baby the Zen and never ever squeeze it very hard.

I suspect and my arm surgeon agrees that because I am trying to use my
left, non dominate,
hand, I simply do not have the fine motor control to not squeeze too

hard. At PT yesterday
I was able to test this theory with the grip meter. And I can not tell how hard I am squeezing
with my left hand. I judged it to be about 10 LBs when it was over 60. In spite of my probable
self inflicted damage, the fact that 2 of my coworkers have had units fail, and that one is an older
lady who treats it like it is made of glass, not a bad idea, suggests that the Zen has a serious
design flaw. The lack of internal ribs on the plastic case allow too much flex and since the OLED
is very fragile this leads to display fracture and failure.

One point to keep in mind. Once Creative gets your Email you will inundated with Email from them.
I have received over 25 emails from them since Monday. Create a disposable account and do not
use your primary Email!

My unit still plays MP3's just fine. And I can use the dictation feature with no problem. But with
a dead display it is impossible to navigate to use the line in or to select a specific music track.

The big difference here is that the portion of the analog signal that extends into the 1500/1520 channels is that which results from modulation products above 5kHz.

This high-frequency material, in an analog signal, is relatively weak and infrequent. You might hear an occasional "crash" or "splash" from the adjacent channel station, but it's not enough to annoy most listeners.

The IBOC digital sidebands are there *all the time* and *at full strength*.

> However, the FCC required a digital system to be compatible with analog.
> Eureka-147 is not used in the AM band. This is not without issues, though.
> Switching encoding from MPEG to AAC+ will obsolete many receivers.

Arguably, Eureka is *more* compatible with analog - because it operates in its own spectrum and doesn't interfere with the analog transmissions.

The choice of IBOC over Eureka was not originated by the government. If the industry had asked for an out-of-band solution like Eureka, they would have received it. It was the industry that insisted on the IBOC system, for two reasons:

1. IBOC uses existing transmitting antennas. No need to find tower space for new VHF/UHF transmitting antennas; no need to fight zoning battles.

2. IBOC maintains the relative coverage areas of existing stations and the relative fidelity improvement of "FM" over "AM". Eureka would potentially equalize the coverage areas of all stations in a market - allowing 3kW "92Q" to fully compete with 100kW "101.1 The Beat".

Eureka doesn't operate in the AM band, but it would open enough spectrum to allow for VHF/UHF digital assignments for existing AM stations.

Receiver obselence (sp?) issues would not have been issues if the Eureka system had been chosen from the outset. At this point I think it's too late to put the genie back in the bottle - either IBOC is going to

succeed, or digital radio is going to fail altogether in the U.S.. I strongly suspect the latter.

> An interesting note, the AM analog signals received on my IBOC receiver
> sound better than that heard on almost any other AM receiver I own. The
> FM on the receiver appears to have excellent selectivity also.

Very true. IBOC receivers use DSP and that feature seems to work VERY well. Furthermore, I've found my IBOC receiver is able to effectively reject interference from adjacent-channel IBOC stations when tuned to analog stations. As you say, the FM selectivity is also quite good.

> For me, FM IBOC works. The IBOC signals are clearer. The second program
> offerred by some station does provide unique programming.

I find no noticable difference in audio quality here. Our local NPR station does offer a worthwhile HD2 subchannel.

I wonder about the long-term viability of HD2 subchannels on commercial stations?

- How long can stations afford to continue operating HD2 subchannels without selling airtime? If the music licensing fees increase or the HD2 encoder requires a $2,000 repair, will the station be willing to spend the money knowing it's not going to bring in any revenue?

- If stations do begin selling airtime on their HD2's, how long can they continue to carry unique formats? Do they have to start dropping the "deep cuts" in favor of plain ol' classic rock to pull that extra point or two?

> The FCC is managing the airwaves in a manner that does not support
> DXing. They are focused on radio working in the local markets, not long
> distance reception. The broadcasters are also focused on the local
> markets as that is where the advertising revenue comes from. On AM, IBOC
> is attempting to improve audio fidelity for listeners in the local
> markets. It may (or may not) be working.

- In some cases, IBOC *is* interfering with local reception. Admittedly relatively few cases.

- Who's being ignored here (as is often the case in telecommunications policy...) are rural and suburban residents. Listeners who due to a relatively quiet environment get good service from relatively distant stations - and due to a greater distance from major cities, get "city grade" service from relatively few stations.

At my location, only ONE AM station delivers an interference-free nighttime groundwave signal. Only ONE AM station would be receivable in a world where all AM stations ran IBOC 24/7. I am fully dependent on

skywave for any choice in nighttime AM.

And I'm not in rural Montana or Alaska. I'm in central Tennessee only 30 miles from Nashville. At least a million people in Tennessee alone are in the same situation.

War, What's It Good For?

Warning the Demon G. W. Bush was given personally:

/ / "The attack will be spectacular and designed to inflict mass casualties against U.S. facilities or interests. Attack preparations have been made. Attack will occur with little or no warning." \ \

What did the demon do? Didn't warn anyone, and went on vacation, but really, according to official documents dated of those days, worked top secretly on his invasion of Afghanistan plan with Rice, and Rumsfeld for Enron. Pension thieves Enron. Does George Norry, the pro-child killing censor of cries for Justice care? You really think so? Ian Punnet, the sick nazi phuk who states he's seen the loose change videos, but still believes the towers fell as a natural consequence of two planes missing WTC7 entirely.. you think he cares to see American teen soldiers sent to their deaths irrationally for the bounties of wealthy evil neocon zionist liars? What does Art Bell care of INNOCENT Christians murdered by nazi israel for stolen loots paid for by the MADE uniformed tax paying American huckstered audience? Coast to Coast "Hosts" will go happying, instead of US, the innocent forsaken they leave forbidden open communications. Americans are understood by the entire human species, to be painfully ignorant as Chauvinistic know nothings, who rape and murder from our Humanity to benefit themselves dying from censorship, and look at where it's gotten everyone.. Bombing Our very own innocent families who dream of a better life for all though freedom, that only comes by the ways of Justice understood as measured.

I'm willing to Challenge America to a Presidential Debate on
successes we've achieved as the governed for enlightenment. A
person accused of a criminal offense without any evidence is
innocent. And worth MY protection. NewsCorped America is not
qualified to lead any group committed to understanding why we
have laws to serve ALL people equitably for freedom.
Certainly, we all could easily learn this though, through
lively trial and error by public debate, if we had an open
mike policy on a national level to talk directly with these
trying times at the best of our capabilities of listening. I
demand my calls for open debate against all neocon zionist
enemies world wide be taken up seriously for the betterment of
all peoples lives.

CIA hid torture tapes from 9/11 Commission
http://www.cageprisoners.com/articles.php?id=22947

Mark Mansfield of the CIA said in a statement quoted by AP that "The notion that the CIA wasn't cooperative or forthcoming with the 9/11 commission is just plain wrong. It is utterly without foundation" This is clearly absurd, as it is blatantly treasonous. "Without foundation?" Nobody minimally involved could form that conclusion, without bold faced lying. Likely done to get away selling more dope to American kids to get hooked up into life term prison sentences for slave labor camps. Guess what American politicians say IF ANYTHING? "requires further investigation." MARK MANSFIELD ADMITS TO DESTROYING EVIDENCE ON 911, AFTER BEING ASKED TO SUBMIT HUNDREDS OF HOURS OF ILLEGAL TORTURINGS OF INNOCENT PEOPLE TO DEATH FOR CONGRESS. TREASON WARRANTING DEATH ACCORDING TO REAGAN. But, who actually really cares in America for Freedom dying as bushite war monger tyranny anyway? In America, on their national radio program, the pro-child killer George Norry spews his poison almost everyday, and "Americans" can't even be bothered to lift their phones to speak in the defense of OUR forsaken families. No, "Americans" like to rob from God and Humanity by suggesting to murder people indiscriminately will benefit themselves in the long run as THIEVING LIARS. Not if Reapin' Johnny, has anything whatsoever to say about US and our love for God as Life. Get me on the Coast to Coast radio program to Host for open line communications, to start this Justice Will Be Done for Freedoms held indivisible Issue. Al-Qaida = General Mahmoud Ahmad. God Rulez.

ISRAEL [THE UNGODLY] DOESN'T GIVE A DAMN
http://desertpeace.wordpress.com/2008/01/22/israel-doesnt-give-a-damn/

Kill a bushite for America why don't you as Anyone?

"The killing of innocent civilians is policy," veteran Mike Blake said. "It's unit policy and it's Army policy. It's not official policy, but it's what's happens on the ground everyday. It's what unit commanders individually encourage." Not true. We have plenty of examples of official policy such as no cause whatsoever for the war period, and FOXNEWS. Then of course, "mad Dog" Mattis, "bush bitch" Blount, "rotten" Russell. Or Sattler's, that ordered the indiscriminate murder of more than two hundred thousand INNOCENT people of Fallujah. As just one example of many. Billing bushite is saving Humanity from the actual, for real, antichrist forces of demonic evil mentioned in every Bible. Bill a bushite enemy of America, for a bushite is minimally a thief, a thief that wars the innocent of Humanity to help 'escape' the zionist neocons for the crimes of 911. Al-Qaida = General Mahmoud Ahmad. And there is a mountain of molted iron under where the

towers fell. Die bushite die.

Well, a criminal willed the murder of another, and now it
thinks it can't be arrested because it says for US to do so,
would be anti-Jew. And no, I'm sure Johnny would word it in
today's climate, arresting a murderer for murder. See? A
true "Jewish State" would be one where all people were treated
fairly, as the actions of a peoples who believed in God as
holy an' righteous. Not thieving terrorists killing people to
steal further from our good graces.

Good God Man

Coast to Coast radio hosts are traitors who forbid the
American Patriot to know: General Ahmad funded Atta, and that
we have video of iron flowing like water from the towers

The HPV vaccine is being used officially (according to
official FDA documents) to kill American female children, and
Americans refuse to hunt to bill happy George Norry for it.
No, Americans murder their very own children to please the
silence George Norry offers, as fictions to hide their
cowardice to defend Christ and Man as their very own family
dying criminally under continued mortal threat. While the
pro-child killer george norry is happier than ever conning to
kill more freedom in voiceless America. Support my call to
host for open line communications. George Norry isn't
qualified to silence our cries for Justice realized. Make the
call, be a Human.

HPV Vaccine Hoax Exposed: FDA Documents Reveal HPV "Not Associated
with Cervical Cancer"
www.newstarget.com/022404.html

Again, CBC, CNN, and FOXNEWS with the coast to coast radio
host celebs are enemies of God as the Human race. Reagan
would have guaranteed, with his War Crimes Act, to have
publicly executed Romney's buddy for the torture of innocent

people Cofer Black freely confesses to have kidnapped. Yet, CNN whores America to ride on that torture is Reagan's best bud. Romney, who's demonically evil religion IS centered on Satan's temptations against Adam and Eve, forbids a belief that black people are not worthy the godly freedoms granted all sentient beings, all because Romney has magical 35 year old underwear it is waged. DUMB. No, CNN forbids such truth in dialog, but to say, a Ron Paul newsletter of near twenty years ago, suggests he hates blacks because the Federal Reserve is printing money for their own private profit at the loss of every American wage earner.. blahblahblah. Bushite are OPENLY selling tons of heroin, and cocaine, while bombing our communities indiscriminately. Not newsworthy. Gates has taken responsibility for dropping 47,500 lb. of bombs in Baghdad to murder people indiscriminately in a city the bushite terrorist thieves OCCUPY as openly demonic. Gates will receive a death sentence by the will of US, as just another bush bitch zionist neocon war monger threatening Humanity with more indiscriminate murdering. P2OG - designed to KILL America with naked neocon terrorism disguised as "Patriotic". Remember: near none in the entire Bush administration has been ever elected, yet, they bomb the innocent with lies for "Democracy." [The Innocent is ourselves for you beginners out there...]

KILL ANY OR ALL LOYAL BUSHITE ENEMIES FOR THIS:

/ / The AMSI statement continued: "The bombing entirely targeted homes of residents in the area and resulted in the deaths of dozens of innocent civilians, including women, children, and elderly people, in addition to wounding a comparable number." "This dastardly crime clearly demonstrates to the whole world the ugliness of those who committed it," the statement went on. "It shows that they are totally unconcerned about people's lives and do not care for the honor and esteem accorded to human beings in all divinely inspired religions." \ \

/ / Nazario separated a young Iraqi, [around the age of 10] known as "Number 2," from the group and led him into a bedroom where he [as loyal bushite enemy] shot him with his rifle. \ \

Calling all Lawyers, Judges, and Police Officers

We shall track down every bushite charged under all military "Judges", and publicly try them for execution as: aiming to and murdering, innocent people - to thieve from US all for ungodly zionist necon LIARS. While American gun owners from any number of gun groups will bill any and all bushite who grunt their satanic disapproval of freedom as Justice for All. We shall bring the perpetrators of 911 to Justice before Man, bar none. God is Risen - die bushite die.

Orders given to the bushite child killers of Haditha:

"anything that moves you kill and don't take any prisoners."

Nazi bushite lawyer's surmisal to war criminal "mad dog" Mattis: "If the defense version of events is true, dismissal of the charge is justified." No, they would be just as assuredly guilty of aiming to and murdering innocent people as enemy of Life bushite do with bogus dumfukker excuses. Killing bushite is saying to God, you really care. A bushite is an enemy of America who wars innocent Humanity for the escape of the zionist neocons for 911. traitors are the bushite soldiers - to everyone.

/ / no evidence has been publicly released that implicates the young men of the 1st Squad, 3rd Platoon, Kilo Company, 3rd Battalion, 1st Marine Regiment in any criminal activity arising out of events of November 19, 2005. Indeed, as there is none that exists, let those who say otherwise prove it. \ \

"None". See? a total dumfukker who's religion is lie to GOD about murdering helpless children, because the event is over as transpired. Yet, Gun Owners of America, WILL UNDERSTAND, this demon enemy of Humanity tells US openly, he gets off on indiscriminately murdering innocent people like those too, who committed 911 by zionist excuses such as: "shoot first and ask questions [answered by Coast to Coast radio hosts, CNN and CBC only] later." Or, a made up bushite enemy's pronouncement titled, "Rules of Engagement", an "official" excuse given to bushite who willingly shoot innocent women and children in the back, all because we were running from an explosion. Will you not join Johnny America and kill every last bushite judge or jury breathing who agrees such murderous conduct doesn't warrant an immediate death sentence during war time against TRUE EVIL?

In the documentary, "Why We Fight", bushite bombers are interviewed, who knowingly bombed, easily, more than thousand defenseless innocent people of Humanity indiscriminately downtown in Baghdad as precision first strikers. See them smile and laugh at knowing after the fact of understanding, they only murdered innocent families as their ungodly sadistic fetish, while lifeless CNN with FOXNEWS is letting them get away with murdering so many of US as Love forsaken, then ask yourself, do you feel lucky? punk? "See the bushite, kill the bushite", the Son of Man always says. Kill an ungodly bushite enemy, and be loved by God and Man as just an ordinary everyday run of the mill, True American Patriot Warrior aligned with Christ, the Greatest bushite biller of all time! Death to the bushite thieves who war for the traitor neocon liars, death to the Enemies Of Justice for God and Humanity. Evidence is Everything. Bushites are ignorant liars of evil.

' 'The "heroin lifers" are a group of prisoners, who were arrested under a Louisiana state law that mandates a life in prison without parole for the sale of any amount of heroin or possession with intent to sell.' ' How can Louisiana be so unjust to promote soldiers to push dope as bushite dumfuk losers, while addicting the citizens into private prisons for excepting the freebees?

Bushite push the dope, and American kids go to jail for Life in cowardice by the millions not hearing... Make the call, be a Human.

Big News : Banks can't prove they OWN the mortgaged properties!

A US Federal Judge, ruled to dismiss a [mortgage grab] claim by Deutsche Bank National Trust Company

http://www.stockhouse.ca/blogs.asp?page=viewpost&blogID=1204&postID=43369

/ / Here comes the hair in the soup. The Judge asked DB to show documents proving legal title to the 14 homes. DB could not. \ \

-

Big News : Election Rigged!

http://mp3.wtprn.com/Albrecht/0801/20080117_Thu_Albrecht2.mp3

This is incredible for real - so incredible that I'M freaked out!

It's just crzy that a private company charges 24 cents for each ballot re-counted... just think about that for a second again.. Oh yeah, and there are no ballots, or records of such events actually occurring. Johnny calls for paper ballots

without exceptions, along with immediate criminal investigations. And let's let me take open line calls on the coast to coast radio network of ideas for just causes. A fair vote for freedom sounds right to begin our speech as heard from for understanding - We demand paper ballots, along with the 911 perpetrators brought to Justice to end all wars by peaceful resolution for freedom to triumph over bad guy terrorists who lie like George Norry. Answers are all here.

-

http://www.madcowprod.com/index.html

/ / Two American-registered drug planes busted in Mexico carrying four and 5.5 tons of cocaine are just the "tip of the iceberg" in a blockbuster aviation deal which sold 50 American-registered aircraft to the Sinaloa Cartel

[..] the FBI executed a search warrant at the house of the No. 3 official in the Central Intelligence Agency, Kyle "Dusty Foggo, soon to go on trial for corruption with accomplice Brent Wilkes. \ \

for dealing in TONS of COCAINE shipped to America, to additionally, pump the prison market with life term prison sentences on simple grams bag possessions. TONS. Cocaine for Crackers.. WOW. American trivia: Did you know, there are nearing at 2,500,000 people in expensive prisons for private profit operations nation wide in the land of the free, and home of the brave? We gotta get a count of prisoners on life term prison stints for carrying the bushmob doper deals in a double cross, The "oops.. who me?" Top Secret Strategy - shhhh.. - the cia planes selling TONS of illegal dope, and Americans go to prison for being too weakly represented politically to defeat these criminals with just words. big bucks. We need an American People standing up for the defense of speaking freely, as a voice of universal liberation. With evidence as a prerequisite - we have near no critics of millions.. Why so great? We all could benefit by Justice enacted fairly actually ruling our strides towards a better future through international communications, where all peoples have rights equal as beings worthy the respect we deserve.. Yes, we are amazing. Can you hear me now? Could I convince yourself in investing in a worthwhile cause such as ours? Who knows how far this takes us into a better future where we respect ourselves as others. The freedom to be all you can be by not infringing on the rights of any other to do just the same. Now, you should give me a least some dollars for sharing that repeatedly with ourselves.. Do you have any idea on how great we are here my friends?? We could be all incredibly gifted if I do say so myself.. So how about it? Johnny for Presidential debate questioner, Nationally

contesting the tally in Anytown USA - open for suggestions?
What do you say pilgrim? Am I not Great?

Justice is Freedom

WE WANT our votes verified as fact.

This isn't about Ron Paul refusing to support a re-count to discover more than 0, ZERO, votes in one district, Bingo!, it is about YOU, as an American refusing to defend yourself from no measuring!, no measuring! what they will get away in blind tyranny as enslavement termed 'Freedom'. It is TRULY up to you to make a call to talk radio, it is truly coming down to You. Pick up our phones you bunch of good for somethings, and call for clarity on the justice is freedom angles. Johnny Wizard has come for diplomatic talks on the thorny issues that confront our storied days absent our found leadership. LOOK, the election body is not requesting fairness for the American voter, as rigged. WE WANT our votes verified as fact. It is not the realm of any private company to "own" the rights to deny us, me and you, public accountability as fairness to all parties - sworn in. Representative Democracy. Doubtless Dealings for Dummies Doubting. We DEMAND: paper ballots.

Uphold Lawman Johnny for any paid Public position, for, I'm hungry for making a worth out of living. Otherwise, I'm going to have to leave for other matters of survival. If you spot me some change, I'll give you a thanks, and, it'll be just like you own shares. No special favors, but, I might just return your investment plus interest. So, join in with Johnny, and spot me some cash family. It'll go towards a good cause, us. Think of these words of art worth a dollar or two

of your time here living. As for you BILLIONIARE bankers out there... buddies.. Help me up kids, your old man here is in need of some assistance in the form of a desperate cash infusion.

Then, we shall begin our international media empire headed up

by the President and CEO of Shareware Earth Co., The Great,

King Johnny Wizard!

-

Scientific American - Hexafluorosilicic Acid is a Highly Toxic Chemical

http://forchrist-contramundum.blogspot.com/2008/01/tools-of-eugenics-fluoride-any-person.html

/ / Scientific American had an article about the dangers of fluoride [...] Many people don't think twice about the toxic

waste that we are drowning in. Fluoride is not what you think, and the deceit is painfully obvious, you just have to look. \ \

-

Bogus Iran story was product of Pentagon spokesman
http://rawstory.com/news/2007/Bogus_Iran_story_was_product_of_0116.html

/ / Starr added that one American boat had been given the order to fire, and the Iranians had moved away just in time.

Porter identifies Bryan Whitman, the Pentagon's top spokesman, as the culprit for the spurious [TREASONOUS] account.

Fifth Fleet commander Vice Admiral Kevin Cosgriff denied that his ships had been close to firing on the Iranians. So did destroyer commander Jeffery James. \ \

Remember, these bushite are trying to con leaderless America into a another needless conflict, where we die for their growing riches as war mongering privateers of this, our 'popular will' contesting as defeated already.. Johnny America for Presidential Election Questions! Or, go back to dying needlessly then as dunfukked "Bushite", you losered.

I'm willing to Challenge America to a Presidential Debate on successes we've achieved as the governed for enlightenment. A person accused of a criminal offense without any evidence is innocent. We, as Americans, are appalled at the fact neocons have been able to steal our authority for so long to take America DYING into a needless, causeless war, but for to criminally plunder at the expense of anyone's innocent son or daughter.

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta.

-

Jack Blood
http://jackblood.netfirms.com/home/headline.html

Hmmm.. if this crazy thought police bill becomes law, HR.1959 then wouldn't FOXNEWS be first up for prosecution in regards to their baseless al-Qaida/pro-terror propaganda? As TRUE anti-Americanism to the core of what it is to be treasonous liars in front of everyone?

-

Why We Fight

Bushite are using Satanic Rituals While Torturing the Innocent

http://media.switchpod.com/users/democracynow/ftp/dn2008-0111-1.mp3

Bushite enemy to Innocent prisoners "Satan is your God now."
(seen on many bushite tanks "666" Praising Satan while
chanting, "whore yeah, whore yeah", while raping, thieving,
and murdering as antichrist enemies of EVERYONE - including
GOD, if can you believe what is witnessed before all.)

Bushite ENEMY interrogators use Satanic ceremonies ordered by
Maj. Gen. Geoffrey D. Miller, during the torture of
INNOCENT People to death they kidnapped, all because American
religious males refuse, "Christians", so far, refuse to kill
SATANIC bushite on sight for true freedom and Liberty. Do not
except the excuses of bushite nazis, that being openly Satanic
for Bush's Skull and Bones, and the Bohemian Grove, is to war
for Freedom and Democracy in the New american Century. The
Son of Man States to all religious PEOPLES: Kill a bushite to
defend God in America. If necessary, You, as a dying America,
shall give every last drop of Christian blood you have to bill
the unarrested Satanic General Miller and his praising DEMONIC
ilk for their murderous treasons against GOD and Man.
(Atheists included die too with these routine indiscriminate
bombings don't you know anything.) All because America still
refuses to demand Justice for 911. Make the call, be a man.
Al-Qaida = General Mahmoud Ahmad. Bush, "The Puppet", needs
to be executed for 911, putting mercury in American vaccines,
torture, Afghanistan, Iraq, and the Military Commissions Act.

U.S. Military Wanted to Provoke War With Cuba
ABC News
http://abcnews.go.com/US/story?id=92662

/ / In the early 1960s, America's top military leaders
reportedly drafted plans to kill innocent people and commit
acts of terrorism in U.S. cities to create public support for
a war against Cuba. \ \ And Proud Vietnam Vets are TRUE
fascist cowards, who'd kill our Families for stolen riches
given to billionaire war mongers who, to this day, bask in our
stolen lives living in Mansions, while homeless vets eat their
own shit and die, worthless to the struggles against tyranny
for God. Still cowardly as evil is always ignorant. More
committed to colonies for the French like Haiti, than Freedom
for the Human beings granted the rights to Liberty.

Joker to the Thief

We laugh with Jon Stewart regarding the seven Christians set
up by the bushite to be al-kinda, to be put to death, or serve
life term prison sentences as the Innocent. BUT remember, CNN
is serious. Pro-zionist CNN, with salaries in the tens of
millions, will lie cheat and steal from Christian Americans

while smiling. Sending you to death while cashing in on all the 'free' loot. Funny?

(EXAMPLE: So what? that BILLIONAIRE Mitt publicly supports torturing innocent people to death without Lawyers for our Judgment with his nazi bum chum traitor Cofer Black?. Not CNN newsworthy as a defense for the People of America. Or how about that Black People can't be Bishops as a moron Mormon?)

Soldiers of Ummah - unite US all to defend America from the evil bushite thieving liars - the enemies of Justice, the enemies of Life. Bill a bushite grunt to save innocent lives, and in that process, be truly loved by mankind through Peace.

/ / He said they [the innocent humans] are like dogs and if you allow them to believe at any point that they are more than a dog then you've lost control of them \ \ Who'll save the life of an innocent Dog from the savagery of the bushite enemy grunter though...

-

Ben Venzke and Jim Melnick of Intelcenter.com is al-Qaida

/ / "In fact, his stack of papers that he reads are moved between the exact same stacks. If you overlay the 2007 video with the 2004 video, his face has not changed in three years - only his beard is darker. [..] A senior U.S. intelligence official says they believe the message is authentic \ \ HUH??? Who is this senior U.S. intelligence official not mentioned? Are we suppose to just go in faith that bin Laden has every micro second timed perfectly greater than a computer meshed with clockwork oranges? Either it is the same, or it isn't.. EASILY provable. So why the ambiguity??? The ENEMY of GOD bushite war criminals can be found here, one way, or the other lying. Therefore, I want to engage in the Presidential Debates to demand Justice for all concerned..

Also, Evan Coleman of NBC is a blatant traitor as al-Qaida propagandist, and deserves to be publicly executed after a fair trial by US, the suffering Humans. Olbermann be damned. Al-Qaida = General Mahmoud Ahmad. I am the most prolific writer on Earth, present on the Internet everywhere, even in China!, yet, these corporate bush whores pretend WE don't exist for fair measurements. Press for Freedom. Death to the bushite, death to the enemies of America.

"I must tell you, I'm sleeping a lot better than people would assume," - The propagandist enemy George W Bush, Mr. Antichrist.

No evidence against an accused is US being truly abused

Robert Gates and his bush bitches in command of the air force bombers will be publicly executed for the crimes of indiscriminate murdering, after fair public trial by US, his victims. DIE BUSHITE DIE. Remember: BUSHITE ARE OCCUPING IRAQ - 47,500 lbs..

"These are not terrorists, they are not al-Qeada, they are ordinary innocent men, women and children."

-

! ! ! Boston Globe had PROOF the election was RIGGED ! ! !

http://www.ronpaulwarroom.com/?p=941

They said, "oops".. defend the Boston Globe no matter what any person or persons say. If the Editor disagrees, love him anyway - if the paperboy shrugs, take the moment to explain - DEMOCRATIC ELECTIONS ARE CRITICAL. So says Johnny the Dictator. (realize: the tabulations haven't even been formally released, and CNN, CBC, and FOXNEWS told US who won before ANYONE was granted the opportunity to force such MEASURED conclusions. We were asking for a re-count before the count was even measured. If mathematically, 2 plus 1 doesn't equal 3, we are doomed. I want to participate in the President's Debate for Freedom's cause - Liberty and Justice for All. Paper ballots, paper ballots, arrests, arrests. Otherwise, we shall be politically entertained by McMcCain! Help us! help us! No funny.. 100 years of dying Humanity as

murder victims sound laughable? We shall therefore, hunt bushite down to the ends of Earth and billl them where they mute as our eternal enemies. Justice for the war profiteering thieves.

www.expose-the-war-profiteers.org

Calling on All American Gun Groups

This Will Be My Anchor

/ / U.S. bombers and jet fighters unleashed 40,000 pounds of explosives on the southern outskirts of Baghdad within 10 minutes [...]warplanes dropped 38 1,000-pound bombs on suspected al-Qaida safe houses and struck at least 40 of them in the Arab Jabour area, \ \ Did they kill General Mahmoud Ahmad? Bush or Cheney? Someone at Intelcenter or mistakenly Colin Powell?, Aegis Blackwater or CACI? perhaps the demon liar Sean Hannity?, or a gaggle of hated by every living just Man - the thieving repuglicons? How about dope pushing NATO commanders?, or the ungodly bushite air force whores of the for real antichrist enemies of Life as Love? No.. innocent children, women and men, who could have lived freedom for life if the bushite enemy were dead and gone already. Bill a bushite for God and America why don't you do it to defend ourselves further lawless murders my brothers and sisters of all the Faiths put together?

Again, "suspected". You kill, any and every grunting soldier of bushite america who disagrees these perpetrators will be hunted down individually and executed in Love - for blatant war crimes against our innocent Humanity.

Allah Rules

"God promised land of Israel to Jewish people alone" The Satanic Rabbi stressed as a demonic liar enemy who speaks injustice against US as the innocent loved by a true God held in silent awe.

G-D wills a demand this quote verified by the Rabbi, if true, he will, and all other LIARS like him, be severely punished as a blasphemer against the Torah, the Quran, and Johnny - The King of Earth - Son to God. For a true Jew, as God wills through Law, loves all People to be free to live for happiness: be We Catholic, Hindu, or Atheist. Zionists of today, all abled men bill for Justice to defend our innocent lives, for, they as Satanic liars steal from US as the ungodly. Real Jews don't murder innocent people to steal their rights to Life for money. Nothing worse than a Zionist nazi "jew" with money they never earned, but stole in the names of the suffering Peoples. We, the Jew of Jews now kill 'lawless' bushite daily for the pleasures of all Humanity.

Their surviving pro-nazi families faithfully cry as bushite
out to "God", not for understanding, but in contempt of
America and Liberty. It is always a shame on me and my
Brother Jesus, but bushite die RIGHTLY to defend a desperate
G-d as an innocently dying eternal Mankind. The People.
Please, do not Forsake me.

"Al-Qaida" = "General Mahmoud Ahmad"

Fear an awesome God my Friends, fear for your soul in jeopardy

...all? ..ahhh...

-

American Women are Raped by Bushite and American men are
too cowardly to call pro-child killer happy George Norry
to speak in defense of Lovers. Kill 'lawless' Blackwater
mercenaries who are hired to murder from the worst of
military dictatorships, or don't and die your 'neighbor'
a coward in godless tyranny without choices to choose
then. Don't wait till your neighbor falls, defend them
now as if they were you left undefended. Rape, like murder,
will always be a crime, despite what TV zionist celebs
state about godless 'lawlessness' granting free reign
in Our America. Blackwater is guilty. Defend Humanity,
defend God. I've sorted them out, now kill'em.

http://www.chron.com/disp/story.mpl/ap/tx/5437468.html

/ / Jones' attorney and Rep. Ted Poe, R-Houston, said last
month that 13 women had come forward with similar [RAPE]
cases. \ \

Realize: the number is easily ten times higher, due to women
fearing that so few of none real men wear the antichrist
uniforms. Example: The mass murderer child killer who
expresses no remorse as an enemy of life has this on the only
page of his web site, "Innocent Until Proven Guilty in a Court
of Law" Yet, of course.. ahhfuk, how evil do you have to
be...?

Supply Administration-SgtG27
Sgt G sends

"Some people dream of success. I live to crush those dreams."

A Bushite is an enemy of America

voting machine firm has [HUGE] executive criminal record
http://www.blackboxvoting.org/

Sure, the only guy who supports the DEMON Bush religiously
"wins" a landslide of support. Despite the fact that Bush

holds MUCH less than 24% support, and murdered thousands in New York City, and that REAL men hate bushite to death for warring Humanity without cause but for to murder, rape and THIEVE. (only 125,000 people voted in a State that is told they are critical in corporate media determinations on who will terrorize my undefended America further - who buys this C.R.A.P.? Happy George Norry of course does, and as such, isn't allowing US to speak any important questions on life and death. Why? Because he's happily into murdering defenseless innocent children. He told US so. And his loyal fans, couldn't care less for THEIR OWN alien offspring, never mind YOUR forsaken child.)

/ / The only officer charged in the Abu Ghraib prison abuse scandal has been cleared [...] Jordan said. "I don't know if any officer needed to be held accountable [for, for fun, torturing innocent godly people to death. Innocent people we kidnapped - fully confessed] \ \ DIE BUSHITE DIE

Chief Zionist rabbi thanks Bush for 'war against Iraq'
http://www.uruknet.de/?p=m39971&hd=&size=1&l=e

/ / "I want to thank you for your support of Israel and in particular for waging a war against Iraq," Metzger told Bush, according to the chief rabbi's spokesman.

Bush reportedly answered that the chief rabbi's words "warmed his heart." \ \

See what evil is my friends? Zionists are sworn public enemies of Life and God.

-

Something Crazy Here

/ / Pakistan President General Pervez Musharraf has disclosed that Omar Sheikh, who kidnapped and murdered American journalist Daniel Pearl and is now facing death penalty, was actually the British secret Agency MI6 \ \ Mr Zubair was the lead investigator - Omar Sheikh was reported executed,

[JUST BEFORE BEING MURDERED] BBC had censored Bhutto's remarks in which she claimed that Omar Sheikh had murdered Osama bin Laden several years ago. - Man, imagine if she were questioned on what info she had based her conclusion, and had had the story that the BBC wouldn't have reported either. Again, CBC, CNN et al., are traitors pretending to be open for communicating the facts. just like the pro-child killer traitor George Norry, Ian Punnet, and the evil Art Bell.

/ / Daniel Pearl was kidnapped in Karachi in 2002 and beheaded by Al Qaeda's number three, Khalid Sheikh Mohammed. Mr Zubair

was the lead investigator \ \

See? this is why the True American Patriot Soldier bills the unarrested for TREASON as a self confessed war criminal, Rommney's "lawless" undie buddie, Cofer Black and partners for raping American women, kidnapping, torture, and pre-meditated mass murder.

Mitt's Mercenary Ties
http://blogs.citypages.com/gop/2008/01/mitts_mercenary.php

-

/ / Let me repeat that for emphasis: The #3 guy at the State Dept [Marc Grossman] facilitated the immediate release of 911 suspects at the request of targets of the FBI's investigation. \ \

Marc Grossman needs to be immediately arrested without bail for the crimes of 911 as High Treason. Along with these guys to name most the rest ...

103 Suspected 9-11 Criminal Co-conspirators
http://www.whodidit.org/cocon.html

Bushite soldiers on FOXNEWS who mumble disagreement, are enemies of every American still breathing.

-

"It is clear to me that any error of omission or commission by Capt. Stone does not warrant action under the Uniform Code of Military Justice," Lt. Gen. James Mattis wrote.

This TRAITOR women hating child killer, a for sure al-Qaida operative, "mad dog" Mattis has not been to an actual law school, and is dumber than the average bush bitch nazi punk, so what are we suppose to expect from such an enemy of Life and God?

/ / Naval Criminal Investigative Services further concluded that the civilians were deliberately targeted \ \ Yet, "Mad Dog" Mattis states nobody did nothing... dats cus hees der jooge.. NCIS or the "mad dog"? you decide as dying amerkan evil doers for the demon antichrist thieves

Be a man. Bravely support my call for open public debate today American grunters.

Pentagon Won't Probe KBR [GANG] Rape Charges
http://www.huffingtonpost.com/2008/01/08/pentagon-wont-probe-kbr-_n_80433.html

And American men say.... what?? Nothing in defense of their own women?, like dope pushing BUSHITE NATO refuses too for Afghans?

-

Corporate News Whores are Evil to All Humans Being

http://thisiszionism.blogspot.com/2008/01/purpose-of-pearlman.html

/ / In spite of being evil geniuses of the internet it never occurred to anyone in Al Qaeda to put Adam Gadahn into Google. So unconcerned and trusting is this secretive criminal uber-gang that they made Mr Pearlman their chief spokesman. \ \ As this writer stresses, REALIZE: CNN, CBC, and FOXNEWS with George Norry, the Demon, make no words over it.. Fuk, George Norry, that pro-child killing bush bitch nazi whore for the lawless antichrist, who is nationally broadcasted for blinded dumb amerikans - who as reported, will continue to die US as his treasonous annunciations. All by refusing to demand our interests be defended TRULY - with his BLANTANT demonic LYING and cheating of the facts to make others believe his demon con to die further innocents as more murder victims. Again, the pro-killing of innocent People george norry doesn't own my voice for Justice, but apparently, he owns amerikans when he says "We" love to suffer god on a cross as Our Humanity for his stolen glory - riches - life is easy: Bush isn't the lawless antichrist being lawless and so antichrist like. No evidence required for American listeners lost to form THEIR won conclusions with the facts so readily available as 'unfound'. George Norry, the child killer will lose, for he is an evil man, truly evil as opposed to conceiving a better world through Justice practiced as ourselves.

Israelis Beating Palestinian children with sticks
http://www.youtube.com/watch?v=wpPMyQz759k

/ / "Fallujans have now been offered a choice: hand over the outsiders or get blown apart by the world's most lethal killing machine, the [dumfuk enemy of MAN] U.S. Marines!" \ \ Bill a bushite to save the lives of helpless innocent men, women, and children of America.

Heaven Won't Take Marines

LOOK! The lawless bushite is warring Humanity to bring about near what was there prior to them attacking.. THINK: they are trying to bring about the stability that their continuing conduct decreases through further LAWLESS rape, theft, and murder. Bill a bushite for God and America why don't you do it to save the atheists for Heaven as all included? Bushites are evil enemies of US all my friend, enemies of US all.

/ / At dawn, armed rebels stormed three police stations in the towns of Haditha and Haqlaniyah, 140 miles northwest of Baghdad, killing 22 policemen. Some were lined up and shot execution-style, police and hospital officials. Abu Musab al-Zarqawi, believed headquartered in Fallujah, claimed

responsibility for the attacks on Haditha and Haqlaniyah. \ \
bushite murdered more than two hundred thousand innocent souls
with a least nine two thousand pound bombs, killing firstly
doctors and nurses, telling the People of Iraq, that Zarqawi
(channel changer Kimmitt admits a total psychop) was a bad guy
worth trying to kill. Reminder: Zarqawi would target his own
children, and brag about it for rotten Rumsfeld! Evil is the
deceived disguised. Bushite are cop killers as enemies of
freedom for America. They refuse to enforce the public
execution of those soldiers who kidnapped barefooted children
and beat them to death on video tape. They refuse to bill
Blackwater for raping American women. REFUSE, as zionist nazi
enemies of Justice for Humanity. Kill a bushite to save the
lives of the innocent a lawless bushite enemy targets for
murder.

http://tazkirahonline.blogspot.com/2004_11_01_archive.html

/ / Step 2: Public relations. Tell the world the city we are
about to storm has been emptied of civilians: \ \

Proud bushite enemies of God and Man state:

http://www.forum.militaryltd.com/tun-tavern/m10997-zarqawi-had-close-call-marines.htm

"Heaven Won't Take Marines and Hell Is Afraid They'll Take Over."

See? A bushite is an enemy of the Family, who rapes and
murders for the demon antichrist thieves. Dishonorable to the
core of what it means to be a free man, they die in cowardice,
too afraid to defend what's right as true. A liar, a thief, a
murderer, that is what a bush whore nazi grunt who states life
must die for as lawlessness. They war Humanity as bush whore
slaves for the escape of the neocon liars for 911. (General
Ahmad funded Atta) They support torture by silence, they
support raping women by silence, they support robbing The
Peoples by silence, and they support killing themselves for
FOXNEWS to continue LYING to America about what it costs to be
a bush bitch who chants routinely, "whore yeah, whore yeah"
Death to the bushite, death to the enemies of freedom in
Johnny's America to talk openly with the FACTS absent Coast to
Coast hosts Demonic censorship of American voices as Liberty.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Eight U.S. State Department Veterans Challenge the Official Account of
9/11
http://www.opednews.com/articles/genera_alan_mil_080104_eight_u_s__state_dep.htm

Coast to Coast hosts are TRUE traitors to God as our dying
America. They, like CNN, CBC, and the BBC state they read our

emails, and receive our calls. But like Art Bell, they just ignore our concerns to die for their continuing bounties of lawless tyranny through demonic proxy. Happy George Norry is truly a demonic evil force for enslavement of our species. Sure, he might tell you the NWO is out to get you, BUT, he will also tell you, you can't do anything about it. "Truthers" will near tell you the very same thing, again, absent the two indisputable pieces of evidence, that point MORE directly at who is personally responsible for closing criminal investigations; not bin Laden. Bush and Cheney. No no no no! the "truthers" scream, that would require taking a stand for freedom against terror, a stand for justice as America - and Americans would rather die, than admit their cowardly dying nazi fascist savages for the Zionist Neocon. Look at the child killer Tatum, pronounced by CNN as a "Hero", yet, the bushite, (like Judge "mad dog" Mattis,) freely confesses without remorse to slaughtering defenseless innocent children at point blank range for his sadistically demonic pleasures. And American Gun groups make little of no effort to identify the culprits, so all of everyone alive can know where these two true bushite enemies of Humanity can be found 'escaping'. Never. Tatum, the child killer will not live in our world as a "free" bushite, found "innocent" of the crimes he "freely" confesses to committing against Humanity and God. Kill a bushite, and be loved by America as True Liberator.

Death to the bushite, death to the enemies of Justice as reason to believe: The truth shall set US free!

www.newstarget.com/022404.html

/ / HPV Vaccine Hoax Exposed: FDA Documents Reveal HPV "Not Associated with Cervical Cancer" \ \

http://nw0.info/files/Radio/Alex%20Jones%20Radio%20Archive/2008/January/aj_2008-01-02.mp3 (last half hour with newstarget.com)- don't miss Alex going into godmode earlier either - Wow!

Evil Beyond the Extreme - they want to imprison the dying American as intelligent while bushite openly murders women. Women. Support my call to demand open challenge for public debate. Please, be real.

Bush administration officials KNOW HPV vaccines cause an INCREASE in Cancer by 44.6% for women, and men of zionist america refuse to demand Justice for Humanity, or Justice for Johnny. Demand WE be allowed to debate bushite regarding this, torture, and 911 for God as Liberty. American corporations actively attempt to MURDER American women, and American "Men" refuse to phone someone who cares... Support Johnny's call to allow truth prevail through American public debates, or don't you good for nothing evil nazi vermin scums.

In Canada, and the USA, the 'talk' radio circuit promote torture because blahblahblah - they refuse a real man like Johnny to speak for public challenge. Not allowing US, The People to know why torture is irrational as a high crime warranting the death penalty. With wisdom?, or the dark tyranny of ignorance through theft and murder? What Art Bell publicly today advocates without a defensive measured challenge for Justice.

Who is al-Qaeda? ISI from Pakistan according to the American FBI!

http://pakistanmartiallaw.blogspot.com/2008/01/bhutto-email-named-killers-weeks-before.html

/ / Astonishingly, one of them is a leading intelligence officer who was officially responsible for protecting Miss Bhutto from an assassination. \ \

/ / said one company commander to his marines before entering the heart of the city. "So shoot everything that moves and everything that doesn't move," he said. \ \

/ / more than 2,118 houses have been completely demolished in the city of Rafah alone, while 360 citizens have been shot dead by the Israeli forces in the city. \ \

/ / [the CDC] Misled the public concerning the results of studies about harm from ingested fluoride. \ \

http://www.naomiklein.org/shock-doctrine

A New America

Bush tells America, it is WE who should be fearful of being caught innocently, instead of himself personally as a war monger traitor to Humanity, who closed police investigations on 911 immediately after the terror action going down. Again, even if bush were "just a puppet, just a puppet!!", his criminal action would just as assuredly, warrant his immediate arrest for high treason. Ask any Judge. then a Jury for Your verdict on the entire criminal spectacle of mass murderers escaping the Justice of a New America.

ABCNEWS.com : FBI Called off Terror Investigations
http://abcnews.go.com/sections/primetime/DailyNews/FBI_whistleblowers021219.html

`You Will Not Open Criminal Investigations'

George W. Bush "A country that hides something, is a country that is a.. afraid of being caught."

These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's

ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses.

Our Mr. Bush Jnr "We do not torture"
Our Mr. Bush Jnr. "Torture is not a part of our soul."

So, those that profligate acts of torture, should be brought up for charges by the True will of US, The Peoples People fairly verdicted? Bush should be tried and executed for ordering the torture of INNOCENT people to death as a capital mass murderer, a murderer 'escaping' the crime scene leads of 911 as unanswered questions of peace through liberation - garnered by Justice held indivisible so as the understood facts.Jack..

The "Shock and Awe" Gallery
http://www.marchforjustice.com/shock&awe.php

The pro-child killing Demon evil enemy neocon George Norry is a naked traitor to History: "..Show me proof that there are real demons" Remember: George told US he supported murdering all of the populated city of Fallujah, forbidden to leave, because, he said, we might some day pick up a gun. To be fair, he said he supported murdering all Peoples between the ages of 15 - 55, (no I.D. required though when blowing up too the infants and the elderly, as HIS air force Heroes did, while Art Bell states over and over again, stealing from murdered innocent others is what America needs to remain competitive. NO LIE. YOU die as an American for these demon thieves who refuse America open communications, while Ian Punnet, George Norry, and Art Bell bask in the fallen millions. Did you know: Art Bell screens his calls between breaks, and just lies to everyone with a con so blatant, it's sickening in it's true treachery. Listen carefully. Death to the lawless bushite enemies of a Just God, death to the enemies of Human kind.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite are guilty of, but of a madness held by those truly Satanic..

Easier approach to getting officially "started", is if we consider the unmovable anchor issues as outstanding regarding the 911 questions ever yet, publicly stated in regards to how the event actually went down. Remember: Bush and Cheney worked diligently, directly after the terror trifecta occurring, to close current police investigations regarding the case of mass murder in Johnny's New York City. Suspicious? you say no, treason that is!, the treason of naked blind tyranny against freedom to be ourselves.

IMPEACH TRAITOR BUSH AND CHENEY NOW !

-

/ / In the intervening period, major US and European banks have written off some $90 billion in subprime-linked investments \ \

So, People didn't have to lose their homes?? No, it's just for the bank hedger to private off to the Islands, while passing US gamer credits for playing us as the losing winer "WINNERS!!!" going absent our homes because 'they' committed us to more fraudulent behavior. Why is America paying for bank fraud committed, instead of those personally responsible still 'getting away..." with trillions..? TRILLIONS!!! Who owe's who here as a mathematical impossibility anyway? My America apparently... Get me into the Presidential Debate for our single cause: justice for All. King You ..>.. Johnny is Great,. thou. !.! ! Let's do this.

Wizard Fool of Folklore Fellow

The Wizard Fool of Folklore Fellow, acclaimed the world around as, the guy with a few good plans - I bring you I.. for, we is the greatest bringing since we believed today is the day to try and start something.. Checking checking.. Is this?.?

People: I am your Leader commanding you to take action to save ourselves. Pick up a phone and call someone to care about this sacrifice of liberty to tyranny for the Bushmob version of 'paradise' by FEMA. We want accountability. Arrests most specifically. Listen, I want to participate in the Presidential Debates. Get me in there.. come on.. I'm taking over the World. John Brain's the name, and fooling the game. Who's in? To think: wow man, Johnny, the boy wonder, and God - as science to the core of the unknown we bring we to say, Man, we are Being kinda foolish to our reason for being here. I mean to discuss things.. oh yeah, right, King me.

Join the Human race to reach a new world of intelligent development through design thought out as understood, not faithed in blindly, so some private wall street banker can walk away with our lives through leveraging the market by ignorance. A Hedge Fund manager can "earn" a salary exceeding 1.5 billion dollars. Something there just isn't right, isn't right. It's an issue relevant to our current circumstances. Circumstances that should carry more interest than an Alien from another world not Johnny though... anyone but Johnny America..

I state my case, and I state it well.

Fight Back for Life to Win Humanity's Demands

Fight back for Life to Win against the national broadcasters like George Norry, CNN, and FOXNEWS that willingly forbid US to know what we need to know to defend ourselves from deathly terrorism. Video of iron flowing like water from the 911 towers exists for viewing, and, Al-Qaida = General Mahmoud Ahmad, So, pro-repuglicons want to see YOU die first as the Innocent forsaken, before allowed the right to defend freedom to the last bushite breathing. Death to the bushite, death to the enemies of Freedom for Humanity.

http://groups.google.com/group/soc.culture/browse_thread/thread/4368d46dd0f61446

/ / Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given.\ \

America Wins, Neocons Go to Prison.

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / they had been told to kill all military-aged males [around the age of 15, could be ten wearing girl clothes], a court was told Tuesday. \ \ A bushite is an enemy of Life.

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? Kill a bushite traitor to America for Christ.

Remember: not publicly executed child killer Tatum, is a hero by CNN "American" standards.

/ / The complaint sets out how Stefanowicz and Johnson and other CACI employees directed soldiers to give prisoners the "special

treatment," which was code for making naked prisoners to crawl back and forth over rough concrete until they were bloodied and unable to move. The complaint also alleges CACI, working with others, wrongfully killed Ibrahiem Neisef Jassem, Hussain Ali Abid Salin, and Ahmed Satar Khamass. \ \

Americans pay their taxes for such demon crimes against the Godly innocent to thieve from. The antichrist's America sucks.

Neocon Frank Gaffney on MSNBC '[but] The torture saved American lives!'
Prove it to US, or die rightly as demon LYING traitor to God and Man in johnny's America.

Repuglicon Kit Bond "It's like swimming!"

Again, these demon fuks, know the bushmob did 911, and laugh at Your death for their continuing criminal bounties of treason against our silenced to die forsaken America. Support my rise to acknowledge our weakness of communicating truths held indivisible.

IOF Missile Strike Targets Bethlehem Manger, Killing at least 12
http://www.wakeupfromyourslumber.com/node/5075

/ / The mother, known only as "Mary", was killed, along with her baby child. \ \

See?, demons exist!

More settlers videos: "We killed Jesus, we are proud of it!"
http://www.uruknet.de/?p=m30420&hd=&size=1&l=e

Now, see.. wouldn't YOU hate those that hate GOD as ourselves? No, America is going to give these monsters millions in 'free' cash to murder and thieve more. Just like an ungodly bushite,

You Better Watch Out

God is coming to town for bushite nasties on his sled of make believe. A halted bushite, is a mercy on our souls, in defense of ourselves the innocent. The innocent that a 'lawless' bushite holds for ransom in pain dying. Hell hath no fury like that held against the bushite enemy, a savage zionist criminal waging war against Life as our shared Universe, 'escaping' those who personally carried out 911. Bush, Cheney, Rumsfeld, Condi, and Myers as topped suspects. Other 911ers will tell you no no no, it's impossible to apprehend them all, for the arrows can go on for never. Bush personally closed criminal investigations on 911 immediately after the terrorist event of no questions occurring. The Bush administration were well aware of their PERSONAL dealings with the Taliban prior to the "Pearl Harbor" event conveniently occurring. And they were all most certainly aware of the

plans in place to: within weeks, invade Afghanistan for Enron to stave off criminal proceedings. Walla! Johnny G wills every able bodied man, woman, and child to defend ourselves against bushite that indiscriminately murder ourselves for cash profit. Stolen profit. Ours. By the Will of US alrighty, we shall recognize...

The King Has Arrived

Look, let's "say" Peter Power didn't do the crime he did, and told us so for our own benefit, it would still SUIT Peter Power for him to be arrested immediately for the crimes of 7/7. For it is Peter that alleged HE was running terror drills at the same time and locations of those that murdered many good people from London. London England. Privately, with his bud at Scotland Yard he's saying. I'm sorry, all Bobbies do not want to kill indiscriminately so Peter Power will score a few extra BILLION dollars to hypno mug us to say we can't find'em no matter how hard we look.[*ILLUM I NATII*]. Americans are just poorly being spoken for, by those who lack the skills to win justice denied from the average Joe who knows so. So...

Americans. I am your leader. True, and skilled at the art of leaving it all up to US. Equals. That means the Taliban are warring in the defense of women, in defense of children, and in the defense of America. Now in Afghanistan, NATO leaves the nation undefended without a police force, since, the bushite murdered all the cops as acts of evil, leaving the tribes to hash it out together but alone near starving. Remember: the bushmob stole the emergency food from Afghanistan as a carrot, and in it ate our diplomatic dialog, while directly closing outstanding criminal investigations. While then blaming bin Laden single handedly pulling off the entire show without US knowing how so. Explosives were set by Laden?, for example?

Now, when any men gather for gaining liberty through acting for defensive purposes, their labeled "Taliban", translated: Students. The bushite war with heroin pushers who sell their illegal drugs on our streets, putting people in prison for maybe 25 years as a felony third conviction. Do you know how many charges in California are called felonies, for the simple fact, that smoking a joint, can get you 25 to life?

A Dying God

Look, these soldiers who war for enemy Bush are not warring for freedom as Justice for Ourselves.

Evidence is Everything

there is more than enough supporting impeachment of washington insiders, but the news media refuses to say so to defend our dying interests.

Let's demand CNN, BBC and CBC respect our interests by publicly advocating accountability in respect to the terrorist acts of 911. Their position of neutrality is unwarranted in respect for our victimized selves due to indiscriminate warfare. The Iraq war has no legitimate cause, for they are warring to bring about an end to what they started/starting. Nazi fascist Cowards, as enemies to every man woman and child speaking.

Christ praises all men who bill the bushite thieving terrorists who war God and country to criminally escape the neocon traitors for the crimes of 911. Al-Qaida = General Mahmoud Ahmad. Die bushite die.

A Zionist Concentration Camp for Jews and Gentiles

/ / Gaza is dependent on Israel for electricity and water services, a legacy of Israeli occupation of Gaza that ended in 2005. Israel bounds Gaza on two sides and holds almost total control over imports and exports through legitimate border crossings. The six-month blockade [...] \ \ AIPAC are making a killing on being evil to innocent others still I see..

WE HATE bushite to death I do, see?, wouldn't you as anywho too? Think about it. Dying as a slave to the demon antichrist, or live for a better future by demanding: Justice IS Freedom. We want to be Just for ourselves to be believed in. We, The people, want true accountability.

Bush Threatens To Veto Bill That Bans Torture
http://www.huffingtonpost.com/2007/12/13/bush-threatens-to-veto-bi_n_76770.html

See how these DEMONS play? Torturing innocent people to death for the pleasures of a bushite liar, already warrants the death sentence in America. It's like lawless bushite nazi savages spying on innocent Justice loving Americans, "Just" to see what your doing, IS illegal, now.. well.. YOU decide as the 'made' uniformed. Make a phone call for freedom you lazy amerkan fuks. Ian Punnet says the towers fell naturally, and George Norry reports we got to get bin Laden.. blahblahblah. They know America is dying and couldn't care much less with all the laughing and cheering at YOUR expense. See.. You die in this scenario, and when your dead and gone, we don't want

to hear your lost to indifference soul echo on, how we've forsaken you when all hope was gone. I've done everything imaginable with my severely limited funds, and received barely a whisper of thanks, never mind a dollar or two to stave off my hunger pangs. All success requires is for YOU to Realize, YOU have rights here too my brothers and sisters. Please be a

friend, in not an enemy. G-D is miraclously in our need to save our selves of needless murder. All dying but to only enrich war mongering criminals of the TV decreed. A war criminal like George Walker Bush that CNN stay undecided with.

America is truly dying by criminal command executed by traitor Bush. I call a Veto for Bush as our going down for good lawless Dictator. Nobody is lawless. The bushmob needs to be arrested for treason on 911.

Oath to God

The bushite took an Oath to God and country to defend America from war criminals, and instead, as cowardly neocon bush bitches, commit war crimes of theft and mass murder against the great Iraqi People. A soldier in the air force, is a dishonorable nazi savage, worthy the death sentence for assisting in bombing Humanity indiscriminately as zionist enemies of Christ, attempting to destroy Johnny's America with their provable DEMONIC LIES. Death to the bushite enemies of Life, who lawlessly war Creation with torture and slavery to 'escape' the neocons for 911. Your magic TV exec excuses don't mean squat when the facts are so readily available. But a bushite don't read, or write, or think freedom. Zionist enemies of ALL Our humanity, murder to believe US won't ever hunt them down by Law to defend ourselves over. Hammurabi LAWS to bill the false capital accusers first, and everything

else will fall into place. [note: Hammurabi founded Civilization.]

Christ Begs America

If there is ever a reason Christ begs Americans to joyously, with pride, bill a bushite terrorist enemy of God, it is with the actions General Sattler took in murdering more than 200,000 defenseless innocent people in Fallujah. At youtube you can see and hear these grunts cheering "whore yeah" in praises to the demon antichrist, while committing horrendous war crimes Nazi Germany would have been proud to see the bushite die for. They walk through the city, killing every woman and child they find hidden. No Joke: first strike targets - Health Care Clinics. I am serious. [during the Nuremberg war crime trials, German Judges confessed with plenty of paper work, such action by Nazis would have warranted immediate death sentences] I have written on the demonic action of godless bushite of the antichrist for years while begging Humanity in joining We in hunting these demons down one by one for the glory and love of GOD, but, was not directly aware of all the video testifying the true will of US and God in demanding the destruction of bushite brayers to defend freedom as Life for everyone. Including America. check out youtube. These proud bushite child killers, can not be allowed to freely walk our Earth, after lawlessly murdering so many for nothing but to please the antichrist enemy of all humans Being. All the while chanting monotonously "whore yeah, whore yeah" Death to the bushite heroin pushers, death to those who war God's World indiscriminately with NATO, Sattler, Mattis, and Blount to escape the neocon zionists for the treasonous unholy crimes of 911 back in New York City, where thousands of whomever Americans, were murdered don't you know?

Demonic U.S. Soldiers Torment Iraqi Kids With a Water Bottle
http://www.youtube.com/watch?v=m9A_vxIOB-I

Can not even an American scream mercy for ourselves as "The People"? Bill a bushite demon enemy for the love of children everywhere. While demanding emergency water, food, and medicines be trucked in by the plane load. Do it or truly die American, do it or die. Christ grows angry with Americans who refuse to even pick up their phones to express outrage, it's as if, Americans, er.. I guess amerikans, couldn't care less for our dying Humanity. Support our rise for debate worldwide my friends, worldwide. America sucks.

Exit strategy: Outlaw lawlessness. Murder, rape, and the thieving of billions from America as STILL wrong.

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

Remember: CNN reports that Tatum is a Hero!

-

'We were torturing people for no reason'
http://www.iht.com/articles/2007/03/28/opinion/edmckelvey.php

HEROES? - HEROES? - HEROES? - HEROES? - HEROES? - HEROES?

The Ground Truth
http://www.informationclearinghouse.info/article15319.htm

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children love by our Humanity. Get me in the news my brothers and sisters, and I'll make the best of it. Just do it. Fear not for my life loves, fear for your life left to silently die in contempt of Yourself.

EVIL LIARS? Yup, demon evil.

/ / A record number of soldiers -- 109 -- have killed themselves this year \ \

We know the deaths are at least, 140 a week. When bushites die, Life cheers in joy over the saving of some innocent girls and boys. A good bushite is a dead bushite, halted from victimizing god as Ourselves.

Supporters of Evil
http://mparent7777-2.blogspot.com/2007/12/supporters-of-evil.html

/ / Withdraw your support entirely from those who perpetrate and make excuses for evil. \ \

I'd like to see Americans enforce the law of the land, and advocate the public execution of those responsible for torture. Again, the TV celebs pretend there is actually some possible meritable argument to support these truly demonic actions as criminal. Bushite have admittingly kidnapped innocent people, then tortured them to death for the pleasures of doing so, 'knowing' also, that they couldn't be held accountable to US, the human species. All for hating us so as loved by Life. They say, we're too weak to stand for freedom's defense against naked tyranny - While Johnny says otherwise: Death to those who advocate torture in war time, for there is no legitimate argument, but for the practice of censorship to understand why the Laws against torture have never failed for defense, but, for the treasonous actions of a

Bill O'Really, who recently reported internationally that the majority of Americans support torture, because it means.... blahblahblah -- Bill Bill. For, it warrants the death sentence in America. Still. Bushite are the enemies of US all my friends, enemies of US all.

Stranger in a strange land,

Johnny Wizard

-

Bush "Iran has openly declared that it seeks nuclear weapons."

/ / "Iran was dangerous, Iran is dangerous, and Iran will be dangerous if they have the knowledge necessary to make a nuclear weapon," Bush told a White House news conference.

Hello!?!? Has everybody forgotten that Bush has already given the secrets of building an atomic bomb not only to Iran, but to every evil empire in the world? \ \

www.whitehouse.gov is where the plans to build your very own nuke were offered for download! Bush sure is seriously evil in just about everything he does when you think about it, no? It's like, he really truly wants to wipe out America, and, er.. he's the bogus President, as stated to be led by a Christ with

nothing to say!! ! ...sometimes you just gotta laugh. Die bushite die.

-

Exposé - The bushite liar is an enemy of Humanity as a thief and traitor

Sayan Sarkozy joins the "There is no NIE" club. http://www.jpost.com/servlet/Satellite?cid=1196847320451&pagename=JPost%2FJPArticle%2FShowFull

Look, there is no evidence.. .. ! So, they can not truly believe their therefore false allegations. But as demonic liars, they intend to murder the innocent as enemies to G-D to thieve further from our precious resources. All because Americans refuse to demand open challenge through international debate with Johnny against neoconner TRAITOR George Norry. Again, no soldiers appose me publicly speaking, Look for yourself. While George is all into murdering innocent children for cash profit, knowing honorable but deeply ignorant American teen soldiers WILL die as evil doers in collateral for HIS personal contempt. George Norry is a traitor to freedom to be a Patriot American. Death to the neocon GOD betrayers who con to escape the war criminals responsible for 911 through the censorship of our voices for

accountability. Death to the bushite, death to the enemies of Man. Death to the torturers of innocent people, death to the enemies of Christ in America. Thank you to the fathers, brothers, and sons who have helped die off more than a hundred and fifty per week as 'suicides'. Bushites are enemies to freedom as justice wills a demand of evidence to form our conclusions regarding a capital offense. Death to the 'lawless' bushite traitors, death to the enemies of a love for a Just God never ending. Make the call, be a man.

Israel--Above the Law? or No Law
http://mparent7777-2.blogspot.com/2007/12/israel-above-law-or-no-law.html

/ / In that case, anyone in the entire world that cries [as the innocent] for freedom and justice for all is a security threat to [the ungodly evil zionist] Israel. \ \

http://physics911.net/

Support our calls for open debate on our international channels of state. CBC, CNN, BBC and FOXNEWS specialists, are warring our lives by forbidding US speaking for freedom's stake. "A free man shall not be imprisoned" is not ideology, it is the freedom to be freely communicated. To except CNN and FOXNEWS is unbiased when it comes to kidnapping and torture, war criming and poisonings, is to except corporate news interests do not serve the interests of defending US, the dying forsaken public. The waves are ours. Let Johnny speak for public challenge on Coast to Coast.

http://revcom.us/a/111/iraq-en.html

/ / "But they
killed him, and his wife and daughters," Fahmi said. The girls were ages 14, 10, 5, 3 and 1. \ \

Again, Lt. Gen. James N. Mattis, the women and child killer, is the American 'Judge' appointed by the bushmob to delineate good from evil on this matter of fully confessed indiscriminate murdering. Again, thieving bushite dope pushers, don't hunt the terror group Aegis, no instead, drop bombs on innocent families, to die in collateral as cowards to tyranny. As so planned by the Pentagon's P2OG. Defend America's America, by supporting the arrest for global public trials of the criminal Bush regime, the evil neocons for the crimes of 911. Please, bill a bushite like "mad dog" Mattis to save an America where innocents are defended from the enemies of Justice. The enemies of God. CNN, CBC, and FOXNEWS is not doing our jobs by reporting blindly lawless bushite thieves for the antichrist are heroes. For starters: Al-Qaida = General Mahmoud Ahmad, and, bombs dropped as the air forces of NATO kill innocent people by criminal intention

carried out by bushite demon liars waving our stolen flags.

CIA photos 'show UK Guantanamo detainee was tortured' by demon enemies
of freedom for America
http://news.independent.co.uk/world/americas/article3239372.ece

/ / identified the existence of photographs taken by CIA
agents that they say show their client suffered horrific
injuries under torture. \ \ The torture of innocent people
they kidnapped. Death to the bushite criminals, death to the
enemies of Justice in God to believe. Man. Fuk. Kill a
bushite for Christ why don't you?

STAND UP

Demand open line communications to defend Freedom through Justice

Al-Qaida = General Mahmoud Ahmad

Defend freedom, and the FBI, by demanding Coast to Coast radio
hosts allow free communications, absent their personal
contempt for preserving freedom to be our America.

Peter Power needs to be arrested immediately for the London
bombings, as does the bushmob for the crimes of 911. CNN,
CBC, and FOXNEWS are enemies of all Soldiers dying for our
failures to speak freely. Molten metal flowing
http://www.youtube.com/watch?v=NIswdgeU0I8

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was
authorized by U.N. Security Council \ \

Treason charges must be sought against zionist reporters who
LIE with such blatant disregard for your freedom in America.

.I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you
know anything worth living for? my dying unjustly brothers
and sisters? My friends, please fear not wisdom communicated
by a REAL Man, for, we explain ourselves to the best of YOUR
ability to listen simply. G. W. Bush used no evidence to
form America's "conclusion" on who did US wrong on 911. So,
Please, stop forsaking yourself, for, we're going nowhere.
Support Johnny's call to demand open debate without censorship
from the magic radio and TV execs, who hide in darkness,
pretending to be our friends, while refusing intelligent
dialog to answer any of our big troubles easily. Why?
because largely, they're powerless without beating us down as
giving 'Christ like' VICTIM so much - with their irrational
ignorance for our survivals by the fittest. The fittest Ideas
that rule this Universe, are the simplest, most easy to

understand, but I digress about GOD'S greatness, for we know,.
the corporate media elites as our voice, "Couldn't Care Less".

/ / U.S. Marines are said to have killed as many as eight
unarmed Iraqi prisoners when U.S. forces attacked Fallujah in
November of 2004. \ \

HA! Trying to ignore the murder of more than 200,000 People
as if OUR lives have no real meaning. WE KNOW they murdered
everyone they could in around between 15-55, but went ahead
gunning for infants and the elderly too under Sattler. Look
it up. Death to the demonic bushite LIARS, death to the
enemies of Man, so says the Son to God as Man to men - kill
the dishonorable bushite enemy and be Loved by all as Savior.

Did You Know: the LIAR bushite ENEMY is warring Freedom to
bring about what was there prior to them criminally invading?

Dying.

Italian President: Intel Agencies Know 9/11 An Inside Job
http://www.abovetopsecret.com/forum/thread319151/pg1

Demand America Take our Calls for Justice as All.

http://www.larouchepac.com/news/2007/12/05/lavrov-there-no-proof-iran-ever-had-nuclear-pro
gram.html

/ / Russian Foreign Minister Sergey Lavrov, [..] said Dec.5
there was no proof Iran ever had a weapons program, as claimed
in the U.S. report. \ \

The Great Johnny

Look, do you want to defeat the bad guys, or not? Bush gave
US zero evidence to form our free thoughts on the 911 Justice
issue. Treason. Simple.

TV Lieutenant General Tom Mc Inerney ~ "We must be ruthless,
especially in the area of collateral damage," in a city where
the population of near 300,000 has been forbidden to leave.
WE'LL then lie to the Grunts, that we are there to get
Zarqawi to defend Iraqis, but instead, we'll murder all the
Peoples indiscriminately by bushite bombers, and like magic,
more GIs will die lawlessly for war criminals to profit the
zionist neocons forever. The anti-Americans, haters of Life
as Glorious, now, who's with me?? Eh?? Who?

Yours naturally,
The Great Johnny

/ / Allegations of forced labor [SLAVERY], lousy treatment of
workers and beatings struck me as something that should rise
to the level of torture at Abu Ghraib. \ \

Christ in America

LOOK, BUSH DOCTORED THE NIE TO CON AMERICA TO DIE AS TRAITORS

How Bush misled the world
http://www.theage.com.au/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. \ \

Doesn't the TREASONOUS bushmob deserve a sentence or two for this?

DEMON LIAR George W. Bush "And we gave him a chance to allow the inspectors in, and he wouldn't let them in."

President Clinton disagreed with taking the country to war in Iraq without allowing the weapons inspectors to finish their jobs,"

Operation Iraqi Freedom Exposed:
Bush Negotiates Permanent Presence in Iraq
http://www.commondreams.org/archive/2007/12/03/5567/

-

www.ifamericansknew.org - check out the vid links here on American paid for, ungodly war criminals attacking women and children with chants against love and G-D.

/ / 0 Israeli homes have been demolished by Palestinians and 4,170 Palestinian homes have been demolished by Israel since September 29, 2000. \ \

Israelis do this as a true political expression of hatred for G-D as Humanity. They need me.

-

CNN Nov 2007
- the treasonous commi propaganda outfit designing to KILL more Americans

/ / the speaker claims sole responsibility for the September 11, 2001, \ \

Yeah, but, how did Laden, with his bulky dialysis machine, get the explosives into building seven then? Or, convince Bush to close all investigations to uncover who was singly involved? Never mind, go about doctoring the NIE from within the Grey House. Blahblahblah - bushites are as evil as they are dumb.

-

http://www.foreignaffairs.org/20060301faessay85202/paul-r-pillar/intelligence-policy-and-the-war-in-iraq.html

/ / "As the national intelligence officer for the Middle East, I was in charge of coordinating all of the intelligence community's assessments regarding Iraq," Pillar writes. "The first request I received from any administration policy-maker for any such assessment was not until a year into the war." \ \

REAL LEADERSHIP

Treat people fairly. Israel's zionist government is UNGODLY.

Why would god will the destruction of life for a criminal thief?

Nato probes Afghan 'bomb deaths'
Nato bombing kills 14 construction workers in Afghanistan
14 killed in Nato bomb error - blahblahblah

Look, anyone who apposes NATO, is a real human being with feelings. They have only murdered innocent people, to help escape the criminals responsible for 911. They push dope, they oppress women, and they defend religious fundamentalism, all by supporting the northern Alliance pro-bush anti-gods without question. Look at this pro-freedom Johnny character who speaks TRUTHS for example:

Destroying America - The Tyranny of Freedom Left Dying Alone

CNN with happy George Norry destroys American soldiers by forbidding US to knowing of General Ahmad, and of WTC iron flowing like water. CNN with George Norry destroys American children by forbidding US to knowing mercury causes neurological damage - instituted through threatening false arrest as irrational. CNN with George Norry destroys America by forbidding US to fight for just causes to defend our dying as robbed forsaken families. Like pensions, mortgages, and lotteries. Please support my demands for US to be heard. Please do it for yourself. CNN, CBC, and FOXNEWS repeatedly report they take our calls, while clearly they refuse. Truth means they lose as the elite war mongering liar thieves, and we win as liberators who take our concerns seriously. Will you try to save your soul when it's all over then? Why not make a call now for your dying self? Please do not leave God to die, as the love for yourself lost to personal indifference.

Catholic Bishop: 9-11 was inside job
http://thetruthseeker.co.uk/article.asp?ID=7580

/ / They [the demon antichrist forces of evil] may well be plotting another 9-11." \ \

/ / Bush and the State Department are silent when a [pro-Bush] Saudi court orders a woman who was gang raped to a punishment of 200 lashes and six months in jail, \ \

Peace "talks" with these enemies of Allah? Again, Condi, the demon whore, speaks nothing but contempt for human rights, yet, orders the bombing of Lebanon with more than SEVEN MILLION LAND MINES, all to be able to say, she hates US to death with MASS MURDER for 'democracy'. Think: she was NEVER elected for squat.

-

Disgraced General Who Pushed for Torture in Iraq Is Now a Spokesman for Democrats?

-

Coerced Vaccinations of Schoolchildren

/ / Prince George's County Public Schools received $11,325 per student [they criminally attack as bushite demon liars] per year! \ \

-

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condoleezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegation, thereby,

securing criminal invasion.

then the demon enemies of America, closed outstanding criminal investigations..

Investigating the Investigation

http://www.alternet.org/story.html?StoryID=17816

"Did the vice president call you and urge you not to investigate the events of Sept. 11?" Daschle flatly contradicted Cheney: "Yes, he did, Tim,"

This criminal action clearly
warrants the death sentence through war crime trials. Bushite

nazis deserve to die by the rights of American law. Why is torture evil corporate america asks no one? "Fu ck y o u" was the censored response from the innocent man up on the cross.

Again, these bushite demons can be easily defeated by the power of wisdom, but coast to coast radio hosts are doing another, 'who cares'? about US dying for a great evil spectacle. While YOU, as alien American are TRULY losing for George Walker Bush's continuing criminal intelligence through bad design excepted blindly without questions, as thoroughly rejected since law came to Be. But SEE? CNN, CBC, and FOXNEWS bush bitch nazi WHORES couldn't care less if we measured; they have millions to sell you out for death once again to the non-competioned thief bidders of treason without reason. Look, if you know of 'it', then why torture ourselves?, sadistically evil nazi dumfuk grunt, of the demon antichrist enemy of all our Humanity Johnny America asks truth fully?

Stephen King "let's waterboard Jenna Bush"

CIVIL WAR IN ISRAEL ?? JEW AGAINST JEW ???
http://desertpeace.blogspot.com/2007/11/civil-war-in-israel-jew-against-jew.html

/ / he told him that his remarks had contributed to "sinat chinam" (hating for no reason) and have given a bad reputation to the movement's prayer houses and places of Torah study, \ \

Not Jews against Jew my friend, NOT JEW. Support G-D'S return to Israel to destroy the enemy zionist nazis by the will of YOU.

Support our rise in America for OPEN COMMUNICATIONS.

EMERGENCY BROADCAST - America is Seriously Wrong

http://www.prisonplanet.com/articles/november2007/191107_vaccine_waiver.htm

Color of Law?

Look, families are threatened with arrest for not agreeing to cause neurological damage to their children. The cause for why their children are not in school, is not the parents fault, but the unlawful decision by the health authority to not allow the children in school. So, arresting the parents is irrational, for, it is the school authority that has disallowed the children an education. So, arrest those that refused children Justice. If anyone.

http://rss.nfowars.net/20071118_Sun_Alex.mp3

Notice, Alex takes no alarm against the criminal perpetrator!

Dishonest Reporting And Iran's Centrifuges
http://cernigsnewshog.blogspot.com/2007/11/dishonest-reporting-and-irans.html

/ / That means - it is impossible for Iran to use these 3,000
centrifuges and their product to secretly make a nuclear
weapon. \ \

-

The Whole Truth - Christ Claims Torture Illegal

Torture IS illegal, yet, the TV threat is trying to teach
America that We, The People, haven't spoken on this issue
since Law came to be. Please, I beg, please fight back for
Humanity by not excepting a zionist's betrayal to G-D on this
subject. TV celebs are programming that waterboarding, head
slapping, and the burning of innocent people to death for a
treasonous bushite's satanic pleasure, is arguably in support
of defending my dying America, through assisting in the
neocon's escape for 911. Death to the torturers of innocent
people, death to the enemies of Christ in America.

sabbah.biz/mt/archives/2007/11/12/nazis-were-right-said-alan-
dershowitz

/ / Welcome to the world of the reality in which a Jewish American
Zionist man can cite Nazis in defence of torture tactics. \ \

The demon isn't Jewish my friend, isn't Jewish. I'm the King
of Jews, who would advocate the death sentence for such
criminal tactics to defend our innocent selves from the
ungodly. Wouldn't you too?, cheer to hear the arrests of the
satanic enemies of Man deprived our wills, instead of
ourselves as the innocent they victimize to thieve from for
Zionist Nazi fascist enemies? A person accused of a criminal
offense without any evidence is innocent. Demand open
communications on our, happy happy demonized to suffer dumber
than dumb coast to coast air wave specialists.

Parents Must Immunize Their Children Or Go To Jail
http://www.prisonplanet.com/articles/november2007/141107Immunize.htm

Liar Liar

http://www.crooksandliars.com/Media/Download/23225/1/wj_rivkin_110607.wmv

http://www.crooksandliars.com/Media/Download/23339/1/twaw_rivkin_swift_111107.wmv
ect..

Look, torture is criminal. Do you physically slap your
neighbors, to find out if they did the criminal's crime?
Should we slap Rivkin to ask him if he plans to commit crimes

against the innocent, and if he then says no, again repeat
till he's rightly dead from hearing a liar's denial?

Torture is a crime warranting a life term sentence or death in
America by LAW - firmly established already by the "War Crimes
Act" of 1776. Demand Justice to save the lives of our
innocent selves forsaken by the for cash profit, private news
parrots. Believe in US demanding open debate for a positive
change why don't you.. Nazi Germans were a happy happy bunch
too over the growing threats of torture and enslavement
through blanket annihilation... initially. Don't let Bush
further hurt my dying America through his personal self
contempt for our shared values.

http://www.whitehouse.gov/news/releases/2007/11/20071107-5.html

Look, November 7th, the demon antichrist stated he and the
neocons ordered the murder of more than a million innocent
Iraqis indiscriminately because, he was simply enforcing UN
resolution 1441. HE LIED. [how else could the UN officially
declare bushites as war criminal? NO CAUSE!!] And
multi-million dollar salaried, "American" reporters, who full
time, claim to represent American interests while you slog
double full-time for corrupt private bankers, refused to call
him on it to defend ourselves from his easily provable demonic
tirades against God as the innocent. On the scene, and still
today... YOU, as American are TRULY dying for George Walker
Bush's continuing LIES. Johnny Wizard is Forever King of
this moment being. If you can't believe it is important for
you to raise your cries for justice likewise, we're all going
to be done for lost to indifference. Defeating the neocon is
serious business my brothers, serious business.

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

/ / commanders may give orders to "shoot first and ask questions
later." \ \ KING RULES: Aim to and kill innocent people, your
guilty of murder. Order such conduct, like amerika's George
Norry would boastfully crow, your a guilty bushite nazi war
criminal.

Bill a bushite to defend Humanity, to return a freedom for
believing. Every thieving bushite dumfuk grunt of the Air
Force is a demonic LIAR, accessory to mass murder. And even
though, CNN, CBC, and MSNBC suggest TORTURING innocent people
to death isn't illegal warranting the death sentence, it still
is, and will remain so for as long as we live to die a bushite
war criminal for defense in America and God, so says the Son
of God, as Man of men. "Die bushite die".

The bushite has murdered many thousands in Afghanistan to push
dope, more than a million in Iraq to steal life as lawlessly

demonic, all the while actively thieving to destroy Johnny's America for the praised by TV 'neocon who?' news peelers.

Bush closed 911 investigations immediately after the terrorist offense of no questions! no questions!

AMERICA RISE FOR AMERICA

Support the arrest of Bush, Cheney, Rumsfeld, and Condi with Myers for the TREASONS of 911 to save Your freedoms to be so, or don't, and see if we care truly ever.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of man. All truth will be disclosed by the revealing hand of US.

-

http://www.crooksandliars.com/Media/Download/23247/1/CBS-FEMA-trailers-110807.wmv

-

THE GREAT KING OF AMERICA

PBS et al.. The bushmob is thieving billions from America as we speak, to further terrorize a dying America lost to the indifference broadcasted daily on almost every radio and TV network as our silenced voices.

Mr. Bush, the terrorist, doesn't care to war for your stolen billions, instead wants to kill even more innocent others as neoconner traitor. In your name as "American." Johnny America begs to disagree with criminals actually, and has taken a stand against these 911 war mongers escaping our authority for proper Public acknowledgment. If you, my reader, would only support yourself.

Please, my friends, fight for our dying America. The TV and radio celebs deliberately refuse to allow US to know: Ahmad funded Atta, and, of the videos of iron flowing like water from the WTC towers - all to KILL ourselves for the enemy liar neocon.

Remember: these thieves have stolen from all still paying Americans dying from true self contempt. No evidence against an accused is US being truly abused.

http://www.crooksandliars.com/Media/Download/22786/1/rice_iran_sanctions_102507.wmv

Listen to this demon nazi witch, the zionist bitch who personally FORBADE a plead to stop indiscriminate killing in Lebanon, assisted in dropping seven million land mines on Lebanon, and was CENTRAL to the invasion of Afghanistan for Enron's master plan, tells US with bushite lies that no, Iran was responsible for the terrorist crimes she fully acknowledges to be responsible for actually. I ASK: ARE THERE any soldiers from America who don't believe this 911 witch shouldn't be tried for high treason as a bonafide TERRORIST? Listen to the end where she says America supports Iran's pursuit of nuclear energy... so why does she want to murder millions of innocent people with fall out then.. EH>? WORLD: threaten to liberate nazi America, if they indiscriminately murder millions more of innocent souls without cause, but for the demon antichrist thieves who speak nothing to defend Humanity. Much like happy happy who cares Germans were under "liberator" Hitler. Except however, in our defense, we at that time, didn't have our internets, or so many, 'you have no power, you have no power' corporate news channels for Americans to quietly sleep through. Americans who refuse to speak outrage in the defense of the Human Race, are Americans not worthy the title of fellow Human beings. All they as bushmob amerika have done, is thieve, destroy and murder from everyone of US since 911. I am growing wearily concerned over whether Americans even can still express real anger over their continuing sacrifice.

-

www.fluoridealert.org

-

FREEDOM

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. Live for freedom dying America! Johnny America wants to be invited on Coast to Coast. Make it happen Man. Justice for god, is Justice for all.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unacceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill

stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

Spare me some money won't you please for this art of wondrous tragedy?, Jeeze.. I seriously need money to feed myself.

/ / "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite TRAITOR and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children practically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones.

-

Not as tyrants have we come, but as liberators
- Adolf Hitler, 1938 -

Terror watch list swells to more than 755,000
http://www.usatoday.com/news/nation/2007-10-23-Watchlist_N.htm?POE=click-refer

Hey! without evidence, we all could be down for abuse as innocent doers for evil Bush.

-

I have the plan. Return all the stolen monies, and hunt those who rape torture, or murder. And.. get the neocons for treason on 911 most especially. So, here we go..

/ / Putin recently declared that Iran does not possess nuclear weapons, is not pursuing a nuclear weapons program and poses "no threat" to any nation, least of all the United States. [...] If Putin is evil, surely Bush is worse than Satan himself. \ \

Bombs Kill People

Nazi Israel, the ungodly nation that murders Christians in G-D's name AS THIEVES, deserves as proven war criminals, to bring about a living nation that respects the Jew by Law, to be just me or You living freely for happiness.

-

http://www.naomiklein.org/shock-doctrine

-

Project For The New American Century
http://www.freedomisforeverybody.org/PNAC.php

"...advanced forms of biological warfare that can target specific genotypes may transform biological warfare from the realm of terror to a politically useful tool."

USEFUL! Tell me, wouldn't YOU have publicly tried, then executed neocon traitors for mass murder if you were dying as Johnny's America?

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Power, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

-

/ / The mere fact that one can deduce a motive for a person or a group does not mean that they perpetrated the act...and it hardly suffices as proof of anything. \ \

Just try telling that to 'why work to make life better' CBC, CNN, or FOXNEWS censors. Look at me!! They refuse

to acknowledge my documented info as REALLY important
to your continued ACTUAL survival.

Who fuking cares right? Certainly not the enemies
of America at the Coast to Coast radio network, who would
kill Americans for the rich neocons without question. It's
JUST American kids getting conned to die as bad guys.

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert
Justice for God and Johnny. In fact, yesterday, they did a
special, all on how "God is NOT Great", giving that bush bitch
demon LIAR, all the space to pontificate it's hatred for
Wisdom, Science, and GOD, with only nods and smiles from the
'illiterate' hord. Remember: A zionist KNOWS it's an enemy of
Humanity when it supports dropping seven million land minds to
murder indiscriminately OUR CHILDREN for decades, or stealing
a Christians Home because they say God says Jews would do such
ungodly acts. Blame innocent Jews the holocaust denying
zionist shout, of which not one, is a Jew. Like me.

-

REMBERANCE DAY

So Remember: Bushite grunts told the world they wouldn't let
anyone out of the city, because [enemy Sattler LIED]
pro-bushite Zarqawi was there present, so the innocent
families who believed they had nothing to fear from the liar
disciples of the ungodly enemy of ALL HUMAN LIVES, remained in
the tiny city to be indiscriminately 'protected' with more
than nine two thousand pound bombs, or made dead instead by
heinous pro-bush escaping war criminals who used white
phosphorous on civilization. All to die our Humanity for the
thieved loss of evidence to demand ourselves of some official
freedom time to deal with our terrorized as suffering reality.

-

CCTV proves police lied:
de Menezes behaved normally before being murdered
http://aftermathnews.wordpress.com/2007/10/09/cctv-proves-police-lied-de-menezes-behaved-n
ormally-before-being-murdered/

-

OH GOD! - to not believe as real Patriots - OH GOD!

http://server7.whiterosesociety.org/content/rhodes/RhodesShow-(8-10-2007).mp3

'Why is it so crazy'?, you might ask an un-responsive big sky of Love? Well, the Bush administration committed 911 with General Ahmad that's why.. and threatening Humanity with torture, is how the neocons plan to fear YOU into speaking nothing for the defense of innocent others.. As a consequence, more than half the monies spent each month on this war against civilized Life, isn't accounted for by anyone. Except those at the Pentagon STEALING from a deafened America. In fact, Moyers at PBS reported none! of the billions flowing out of American pocket books EVERY MONTH for the bushmob war monger shysters is actually audited for the taxing payers.

Mr. Bush, the terrorist, doesn't care to war for your stolen billions, instead wants to kill even more innocent others as neoconner traitor. In your name as "American."

Support my rise against Living's enemy George Norry, by making an effort to demand real Justice for dying American values.

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist evil enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

No evidence against an accused is US being truly abused

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

God Damn America

You f-cks, because Bush told congressmen secretly about truly torturing innocent people to death in YOUR name, doesn't make the crime any less satanic. True Christians will execute bushite torturers with glee. America will pay millions a head for each bush bitch nazi traitor to children as family. The neocons will all be tried to death for treasons like 911, and for supporting a slaughter against Iran. For Petraeus has giving US no evidence to form our conclusions on the validity of his therefore, TREASONOUS statements. Bushite are murderous thieves of Iraq and deserve by the measurements of any civilized man, a action worthy of death as demonic, before allowed to further steal from our Humanity. SAUDI Bush bitch Buford Blount gave out 170 tons of explosives to KILL marines with, and Petraeus doesn't call for his rightful death, nor for death to be brought to bushite soldiers who kidnapped bare footed children to be beaten to death on video tape. hundreds of thousand of guns were 'lost' in Iraq through bushite management skills, and liar Petraeus speaks no outrage. Private death squad goons are committing crimes against GOD, and Petraeus blames no one. MORE than half the monthly bill for these bushite bleeding atrocities to Humanity, are not even accounted for by ANYONE, but for the thieves at the Pentagon who are ROBBING america with Petraeus' silence on the life and death issue of America. Again, Petraeus knows the bushmob did 911, and would rather kill your stupid american teen, than stand for freedom in America by holding evidence a pre-requisite in determining OUR capital allegations. Death to the false accusing bushite, death to the enemies of America,

al-Qaida = General Mahmoud Ahmad. Torture IS against the law, and deserves the death sentence. Bushite Cofer Black MUST be put to death for being a Satanic demon enemy of Human life, who freely admits he tortures innocent people to help escape the neocons for 911. Bill a bushite for America, bill a bushite for God. What do Texans own guns for, if not to bill a

bushite child killer like those in the evil enemy pro-bush air force. Bushite repeatedly have been found killing innocent people without apology,

and now, as reported, the narco-gov has put to death at least twenty Afghans, who were claimed, without trialed evidence, to be guilty of such actions. The narco-gov refuses to call for the execution of known bushite who torture INNOCENT PEOPLE, or rape them, or thieve the 80% of charitable aid given from Canadians. Despite CBC refusing to report on the facts to let US decide for ourselves. Fight back for Christ, fight back for love, fight back for freedom, fight back for God.

Investigating the Investigation
http://www.alternet.org/story.html?StoryID=17816

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" \ \

George Walker Bush, "The Puppet" is GUILTY of TREASON a thousand and one times over already. We all love Alex Jones, but this nwo bullshit doesn't apply to the lawless demon enemies who inflict harm on our humanity because they confusingly tell US, they enjoy it. Murder, rape and pillage for the sake of murdering, raping, and pillaging. Look, I'm sure we'd be able to easily work out our differences, if George Norry's amerka would take our calls for clarity, on Justice ruling our ways to a fool's paradise where those accused of a crime without any evidence would be US, as the INNOCENT forsaken in God's good name.

-

The Son of Man Begs America

/ / Seventy percent of the people are without adequate water supplies and 80 percent lack adequate sanitation. \ \

DEFEND THE PEOPLES OF IRAQ FROM BUSHITE NAZI DUMFUK GRUNTS

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

-

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions,

against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

-

http://server7.whiterosesociety.org/content/rhodes/RhodesShow-(3-10-2007).mp3

The Lawless thieves of Blackwater hire known war criminals from the most brutal of tyrannical regimes to carry out the neocon agenda of 'freedom' for 'Iraqis'. American tax payers pay $1,222.00 per death squad goon, per day, while billing their sacrificing kids, tens of thousands for up and coming medical costs not covered. Did you know they, the incompetent bush regime, still haven't fixed Walter Reed? Who really cares right?

-

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of

all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell well he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

http://www.globalpolicy.org/security/issues/iraq/reconstruct/2007/0824whistlepenalties.htm

/ / For daring to report illegal arms sales, Navy veteran Donald Vance says he was imprisoned by the American military in a security compound outside Baghdad and subjected to harsh interrogation methods. \ \

IN THE LAND OF THE DEMON ANTICHRIST.

-

How is a Zionist Jewish?, I, the King of the Jews Messiah ask my fellow brothers and sisters everywhere. How? FOUR million land mines in Lebanon a godly act is it? Jew only roads not Aparthied, nor stealing a Christian's Home I suppose..? How?

An Oath Every Soldier Swears To God With

/ / Lieutenant Watada \ \

Again a Patriot Soldier whose only crime is that he refuses to commit a crime in Your name. Do something about it. You defend this Patriot American Citizen as if Your America depends upon it. The "Judge" who publicly forbids to hear Watada's freedom defense, an Oath every Soldier swears to God with, is a "Judge" who needs to be privately arrested for treason against YOURSELF. Support my call to demand our voices heard for Just causes, or go die silently to the grave prisonized in a zionist neocon military dictatorship

True Enemy of Liberty

I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really set ourselves free with..

"Al-Qaida" = "General Mahmoud Ahmad"

A neocon bushite soldier is a true enemy of Liberty for America. They as DEMONIC LIARS, are dishonorable THIEVING nazi savages that bomb our innocent families with criminal intent to MURDER. Enemies of Life and Love, a dead bushite is an enemy of GOD halted from victimizing further our loved brothers and sisters, mothers and fathers. Death to the neoconner bushite dumfuk grunting liars who bomb our families, death to the enemies of Christ who war for the escape of the true culprits responsible for 911. TRAITORS.

See my friends, this is why I, plead
for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks to their bitter end.

To Kill a Bushite, is to be Heroic

American soldier: Your enemy is TRULY LIAR happy George Norry. The demon knows of Ahmad, and forbids any guest from uttering such understandings in defense of the DYING dumfuk grunt nazi - Good riddance? Do you care that your country men are dying for the criminal zionist neocon as traitors? Support my demand for US to be heard GOD DAMN YOU. ...or die by the hands of Humanity.

-

New admissions of widespread prisoner abuse
http://www.wsws.org/articles/2007/jun2007/tort-j05.shtml

/ / The Bush administration is [...] broad latitude
for torture techniques \ \

These are crimes against Christ, and any 'Christian' who lawlessly participates in this pro-bush torture of US Humans, MUST be hunted down by the Patriot, to have the STANDING LAW in America enforced to institute the Death Sentence to those bushite responsible for such ungodly enemy actions.

-

'Wiped off the Map' - The Rumor of the Century

Ahmadinejad: Zionists are NOT Jews
http://www.wakeupfromyourslumber.com/node/1249

Dehumanizing the Palestinians
http://electronicintifada.net/v2/article9002.shtml

/ / The Israeli cabinet has voted to declare the occupied Gaza Strip a "hostile entity," [...] The decision was quickly given backing by US Secretary of State [demon 911 witch] Condoleezza Rice. \ \

This is of course recognized by all people to be a crime against human life. But CNN refuses to acknowledge the zionist action, for WE would ALL scream in outrage that American tax payers fund such nazi atrocities against G-D.

CHRIST RETURNS

I again, beg Humanity to speak in opposition to Amerika in the defense of our innocent forsaken dying lives. CBC producers know the bushmob did 911 but lie with propaganda to kill our families for the ungodly as thieving neocon enemies. They refuse to inform ourselves that Al-Qaida is General Mahmoud Ahmad, as according to the FBI. Or that video of iron flowing like water from the WTC towers exists indicating without doubt, the bushmob enemies did 911 as TRAITORS.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Who cares about yourself if you won't listen as reason to? What can you lose when you have granted to be blindly stolen from?

Zionist nazi Israelis, do tell as LIARS, that Israel, the nation that openly thieves, tortures, and murders daily thoses THEY ADMIT are commpletely innocent, are enemies of every religious person denied access to honestly speak the facts as firmly established since the dawn of Man.

"The Central Myth of Our Time"

The Shock Doctrine: Naomi Klein on the Rise of Disaster Capitalism
http://www.archive.org/download/dn2007-0917/dn2007-0917_64kb_mp3.zip

Wow! This is Powerful! An hour with Naomi!!

-

Bush "Iran has openly declared that it seeks nuclear weapons."
www.thecarpetbaggerreport.com/archives/12477.html

Look, CNN, CBC, and FOXNEWS, who know the bushmob did 911, is
saying nothing further! The demon enemy will LIE America into
another war against GOD, and they'll only give you a happy
wave off to see Your child die for the zionist neocon.

Happy Ramadan - [the ungodly enemy] israeli style.
http://www.wakeupfromyourslumber.com/node/3575

/ / [enemy of the Jew] israelis kicked off their day this
morning by shooting an unarmed 16yr old boy for throwing rocks
at them and letting him bleed to death. \ \

Again, not reported on CNN for freedom of nazi aggressions
against life as Christ.

-

http://www.informationclearinghouse.info/article18353.htm

/ / Why are the U.S. media untroubled that there has been no
independent investigation of 9-11? \ \

-

http://youtube.com/results?search_query=%22hadji+girl%22&search=Search

/ / "as the bullets began to fly, the blood sprayed from
between her eyes, and then I laughed maniacally." [, then were
heard the cheers of godless bushite dumfuk traitors obscening
to God and Man as the unholy enemy.] \ \

Instead, we as humanity suffer with yet to be hunted demons
who sing in joy while laughing and cheering over the murder
of our innocent children. God, I beg you to only listen to these
naked demons on video, then join me in calling for Justice as
Life Wills. The company Aegis has been found killing innocent
people for money from America, and Americans speak near nothing
for our defenses as their very own sons and daughters die in total
contempt.

So never lose sight that TV news personalities hold an unwavering
Public commitment to answer our calls for liberty with murder,
as the enslavement of Your dying rights, through willfully
committing criminal acts in our demonized innocent name is
real. Johnny Wizard needs his own international live radio
program to take open line communications.

-

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent
people in Fallujah, and they speak nothing but lies on how

such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state, commi red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of, that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans. \ \

-

/ / Two Years After Katrina, Billions in Relief Funds Are Missing \ \ http://www.alternet.org/rights/60494/

-

Israeli High Court permits torture of Innocent Humans
http://www.guerrillanews.com/headlines/14593/High_Court_permits_torture_of_Palestinians

/ / Israel has illustrated contempt for law and the value of human life, or even possessing an ethical standard of moral behavior with respect to civil and human rights \ \

Of what religion to any GOD, is this ZIONIST nazi behavior condoned? Demonic thieving bushite enemies of Man lie about such behaviors bring about 'freedom', but who of US wouldn't kill such contempt to save the lives of Our innocent beloved families? A bushite kidnaps Iraqis routinely, (or orders the murder of those between 15-55,) and what of any real man present, doesn't immediately arrest or kill such CONTEMPTIBLE bushite loyalists to the ungodly enemy antichrist?

-

Tatum, who freely confesses he's a proud child killer without apology, is being made a free man in evil bushite amerika. The TRAITOR prosecutor has ridiculously stated to our world -

/ / Lt. Col. Paul J. Ware wrote in a 29-page report that there is insufficient evidence to show that Lance Cpl. Stephen B. Tatum did anything other than follow Marine Corps rules when he killed [for no reason, innocent] women and children \ \

TATUM ADMITS he enjoyed slaughtering the defenseless families deliberately!! In fact, he wrote a card to a dead marine's family, testifying that he murdered the innocent young girls for the tyrannies of the antichrist. Evidence that TRAITOR Paul Ware and Mattis hides from the Christian American Family. Will YOU, as an American man, allow these two bush bitch nazi punks to survive as furthering the commitment of more war crimes against the INNOCENT? as a zionist neocon's "Hero"? Will You defend our girls? Peoples of Earth! Help Me save our children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1 and 2, but the reason he did so was because of his training and the circumstances he was placed in, not to exact revenge and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

/ / Ware has recommended to [demonic nazi enemy of Life 'judge'] Lt. Gen. James N. Mattis, that charges be dismissed, \ \

"Mad Dog Mattis,"

MATTIS!! The guy who murdered countless women and children at a wedding party, while after getting caught PROPAGANDIZING to forsaken America the innocent victims as al-Qaida!! CAUGHT! Mattis called innocent six year old girls "al-Qaida"! CAUGHT!

BUSHITE ENEMY OF AMERICAN FREEDOM Lt. Gen. James N. Mattis has been made into a "JUDGE"!! THE WOMEN HATING NAZI FUK! A JUDGE of Men by 'law' in bushville!!!

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

TRAITOR Mattis "The Marines have landed, and we now [as ENRON] own a piece of Afghanistan." [thieving from all for 911's neocon, especially undefended American pensioners... hail satan - 666.]

CHILD KILLING NAZI TRAITOR GETS PROMOTED!

/ / Secretary of Defense Robert M. Gates announced Sept. 11 that the President has nominated Lt. Gen. James N. Mattis for appointment to the rank of general. \ \

http://www.911pressfortruth.com/

TWO OF THE PROTECTED 911 HIGHJACKERS WERE WORKING WITH SAUDI INTEL!

Murder for stolen money in America's America!, and CBC, CNN, FOXNEWS report no cause to care! Treasonous George Norry CONS Americans to murder for the evil neocons with threat of his going "ballistic" against any or all Americans who try to stand up as a Just peoples for what is righT, for Life and/or God by SPEAKING FREELY. Will You try?, or go silent to die as unworthy? Your call bud...

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay twice as much, while dying broke as self made losers without a cause worth preserving. A free market open to waste for profit

Mike Huckabee Publicly Questioned on 911's ISI General!!!
http://prisonplanet.com/articles/august2007/230807_b_huckabee.htm

Do you care to buy the bushite lies, when they commit openly
the very same terrorist acts they say we should all be
outraged against?

Again, KNOWN Aegis goons openly commit crimes against Iraq
done officially to get killed! the supposed to be Patriot
Marine. P2OG.

I can't understand why you can't help get this party up as
starting by supporting our rise to highest acclaim with my
authority free willed to anyone. Let's face it, we're great
because Your great. However, for greed, corporate america
aren't taking our concerns nightly. We want Justice, and WE
will get it if we reflect together with impeccable credentials
as standing with measured reason for proper assessment on
rights making might. Who is who here, a freeing peoples I
tell you, arriving to bring a true patriotism to Life for US.
Are you with yourself as respected an equal under the law
devised fairly for all concerned parties?.. well then...
let's g o ! ! !

be Great!,
for here comes the mighty,

Johnny America - make way! make way!

-

Where is the Evidence?

How so can all of Iranian Military Officers be
"terrorists", while lawless bushite bomb defenseless
innocent peoples indiscriminately routinely, with
praises from the actual demon antichrist responsible
personally for 911 I want to know.

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy."

http://www.thetruthaboutgeorge.com/

Perl of wisdum 'yeah so? Peenackers steal the rights of freedom from people for stolen profits - we rob Americans of their freedom, as is their pocket books, and their wasted effort, all easily conned to be sacrificed for death by false conclusions trumped up by a naked false accuser who will accuse yous lost blindly as the innocent sucker - er.. I mean suckers, Your Mr. Bush Jr., is a demon evil whos attack is not televised for defending yourselves over. Truth and Justice, we own. See?, peenackers are filthy rich from conning your, given life away, right before your eyes. What are we going to do about what is given, bust the bad guys for blatant treason against Cops and the Universe? I mean really.'

The Iraq War Exposed
http://www.netctr.com/iraqwar.html

Neocons are frankly, just dumb don't you know. Don't forget though, their unwavering Public commitment to answer with murder as enslavement of Your rights, through committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program. Any others of all knowing sentience as wisdom being smarter than whoever, even willing to start too a conversation over these matters of justice for freedom ad-infinitum!?

What?

-

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of

the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

www.newamericancentury.org

Jason Bermas "I just want to point out that we're going to encourage the people to look at the evidence for themselves."

-

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida

cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

Intelcenter.com = alqaida videos you can get nowhere else!

-

/ / A group of wounded civilians were also brought to a hospital in neighboring Kandahar. Journalists were barred from filming or talking to them inside the wards. \ \

Freedom from what do bushite murder indiscriminately?

/ / Iowa GOP is STILL planning to use the easily rigged Diebold computers to "count" the vote at the Straw poll! \ \

THIS IS TREASON. But, look, teen soldiers are commanded to be bushite nazi savages, who cowardly refuse to defend America from Mr. al-Qaida, General Ahmad, all to thieve further from the undefended American public.

-

MY DEMANDS

/ / eight million Iraqis require immediate emergency aid \ \

PLEASE HELP US

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of "insurgents" apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? \ \

-

/ /that expose physical and sexual abuse
at the hands of the Israeli army \ \

Realize: American tax payers fund this unquestioningly.

-

Citizens Face Full Asset Seizure

http://www.rense.com/general77/asset.htm

/ / "(ii) to have materially assisted, sponsored, or provided financial, material, logistical, or technical support \ \

So, those who don't support the return of all stolen monies from Iraq, who continue to undermine Humanity's chances for Justice in Iraq, (like every neocon LIAR and foxnews broadcaster, lawless mercenary antichrist disciple, or Haliburton shareholder,) needs their assets seized, and tried publicly for treason as war criminals. Every war profiteer holding more a one hundred thousand dollars will be hunted by the will of Humanity. so says - The Son to God as Man to men.

Bush To Veto Ban On Mercury In Vaccines
http://thimerosal.worldwidewarning.net/www/archives/59

/ / "Under the current administration, mercury has been and will continue to be knowingly injected into the youngest of American citizens. \ \

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube.

They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this world, with our communication technology, would leave me

without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice

and Freedom for all, especially God as Just, and worthy our praise, Peace.

-

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning \ \

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America.

-

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 2007 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

-

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

-

Afghan civilians caught
http://www.chicagotribune.com/news/nationworld/chi-civilians_bdjul08,1,3303701.story?coll=chi-newsnationworld-hed

/ / The men told the same story, of how foreign troops bombed their villages long after the Taliban fighters had left, how the bombs killed women and children, goats and sheep \ \

-

'Up to 80 civilians dead' after US air strikes in Afghanistan
http://observer.guardian.co.uk/world/story/0%2C%2C2115846%2C00.html

/ / Witnesses claim a village in British-run Helmand was bombed for three hours \ \

-

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate 911! What have innocent people to fear from a fair, complete and real investigation? \ \

Let us make life better than the neocon envision, and support our rise to popular acclaim by allowing US to speak openly for public challenge in defense of America.

-
True US Bush Iraq-Afghan Wars Deaths At 21,000
http://www.rense.com/general77/true.htm

"In the last four years of war in Afghanistan and Iraq, the unreported death toll of American military personnel is in excess of 20,000 (20,871)"

It's in cowardice that 'Americans' don't speak out for the lost 'loves' of their dumber than dumb sons.

-

Demon enemy bushite in Afghanistan murder children without real understanding 'by accident', [no evidence is shown to ANYONE, just treasonous demon evil bushite necon spewing, "red handed"] lies after lies, while, the Taliban, we are told, are so much worse, because they would murder "ANYONE." Make sense? No. Remember: (The bush regime has

been found funding Al-Qaida in Iran to commit terrorist acts against COWARDLY soldiers without free minds to speak in their own defenses.)

/ / The group is demanding his impeachment not only for his crimes against humanity but for lying to the American people about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are so very far from where civilized is dreamed to reside. Look, think of US as actors, (because that is who we are,) and support my rise to proclaim by the will of a suffering for real human kind. Believe in US, as if your life depends on it, because it does my friends, because it does. Live free or die unwillingly.

-

Demon G. W. Bush "Our responsibility to history is already clear: to answer these attacks waged against us by stealth, deceit and murder and rid the world of evil."

"Deceit" and "murder" to rid our world of justly what dum-uk enemies?

Bin Laden may have arranged family's US exit: FBI docs

/ / A manifest showed the goods [BUSHITE HEROIN] were to be shipped from Kabul to Dubai and then on to Canada. \ \

"We have nothing to do with poppy eradication. We stay away from [pro bushite heroin to kill YOUR kid with] it as far as we can," Maj. Steve Graham of the Royal Canadian Dragoons

-

'Kill Anyone Still Alive': American Special Ops
http://www.atlanticfreepress.com/content/view/1784/81/

Can you not as a American Man, destroy bushite brayers to defend innocent life? Americans could not care less presently for the value of Human life. Americans do nothing to defend their lives, but officially plan to murder more for the Satanic demon antichrist in silence.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against

the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

/ / US 'used forced [SLAVE] labour to build Iraq embassy' \ \

http://www.uruknet.de/?p=m33389&hd=&size=1&l=e

Look, bushite DO exist as enemies of the Human.

-

Neocon Soldier

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Our Mr. Bush Jnr. "The war is for you or for us [neoCONS] to win. If we [neoCONS] win it, it means your defeat and disgrace forever."

Die bushite die.

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached
http://prisonplanet.com/articles/may2007/210507_b_Impeached.htm

See? Canadians who TRUST CBC would never know by Paul Hunter.

-

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain anti-torture bill to codify a policy of torture that is now embedded in our legal system for perpetuity. \ \

WE'D be hunting down those bushite liars who
torture innocent people to death for their satanic pleasures.
For, you know it does warrant the Death Sentence in America,
right? (You can thank Reagan for that...)

/ / In a move that hardly indicates that he was a terrorist plotting to attack a US government installation Tatar then went to the Philadelphia police department to complain that he was being pressured by someone into getting a map of Fort Dix and that he thought this had something to do with a terrorist plot. \ \

Didn't see this on our TV news either did You?

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

-
Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless

allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky, SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent

stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

Occupation Forces support Afghan Narcotics Trade
http://www.globalresearch.ca/index.php?context=viewArticle&code=20070604&articleId=5514

-

http://blogcritics.org/archives/2005/09/27/214145.php

/ / Why would [subhuman bushite] guards torture a man they considered innocent? \ \ Because they are openly enemies to Christ. I say, kill it for America when you can, God bless.

Bushite will kill America

/ / At 9:32 he saw and heard a bomb destroy the offices of the Pentagon auditors. 40 military officers investigating the missing money were killed. The CTC was destroyed too. You can read more here:

http://johnmccarthy90066.tripod.com/id206.html \ \

AMERICAN

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in

totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

Al-Qaida = General Mahmoud Ahmad

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

-

http://www.godlikeproductions.com/bbs/message.php?messageid=355789

/ / Timothy Griffin, Karl Rove's assistant, the President's pick as US Attorney for the Eastern District of Arkansas. Griffin, according to BBC Television, was the hidden hand behind a scheme to wipe out the voting rights of 70,000 citizens prior to the 2004 election. \ \ Timothy needs to be arrested for high treason, for fixing an election, or instead, what? we'll make him a State US Attorney in bushville?

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as

worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

-

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win." http://cleveland.indymedia.org/news/2007/03/24652.php

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

9/11 WTC Molten Iron

Men pick military as sentence
http://www.centredaily.com/118/story/29432.html

Great, more criminal heros to victimize Humanity for.

-

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable

-

/ / KBR's Tiger Team stayed at the five-star Kuwait Kempinski Hotel, where its members ran up a bill of more than $1 million. This outraged the army, whose troops were sleeping in tents at a cost of $1.39 a day. The army asked the Tiger Team to move into tents. It refused. \ \

See? KBR is now privately running hospital care for the dumfuk grunts, so, what would you expect but rat infestations?

Oh, you never truly thought... what being a "Liberal" or "Conservative" victim is. Are you pro Liberty, or pro tyranny is the question riddled really.

-

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Seriously, the propagandists responsible, need to REALLY, be put to death after found out through US public court proceeding. NO ONE would disagree that Iraq is a war crime, where more than a MILLION INNOCENT PEOPLE have been raped, tortured, or murdered by dumfuk bushite grunts. If YOU actually think about it, all of everyone would gladly kill an unholy bushite terrorist, before allowing it to murder families running for our lives as loving Church goers.

Death to our Enemies

My friends, People are dying because the, Israel=Jew, magic radio and TV crews, wont broadcast THE TRUTHS of our publicly available findings. Police findings.

-

Neocon Gaffney "It is not George Bush, it is not the Neocons,"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

-

REPENT. [from the Greek, meaning to think.]

Life
begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all

19 names of the high-jackers to give CNN, CBC, and FoxNews
just like the neocon's "bin Laden" would have too. Take the
publicly prancing bushite enemy out for questions by yourself,
if he doesn't plead his defense publicly on Coast to Coast by
tomorrow. Remember, there ain't an "Intelligence" group worth
their salt on the face of our Earth, that doesn't know exactly
what I'm doing here honorably for a real Justice made through
careful thought. So, support Johnny Wizard speaking for
public challenges internationally, and with the 23 plus
co-operating for life 'Intel' agencies, along with, anyone
else who can join in on the call. as a growing number of
Patriot Soldiers, who trust yourself to see, this wanting of
Justice isn't complicated. A person accused of a terrorist
event without any evidence, has our accuser a bushite, who
should be watched carefully until verifiable conclusions are
done by the understanding of fact. Not faith. With George W.
Bush making real decisions in faith, expecting us to believe
as corporately broadcasted unabashedly unbiased, that he
is not a deliberate incompetent monster war criminal
of unfathomable evil?, who is just too 'stupid' to understand
why we are innocent until proven otherwise?, is really
something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he
played no part whatsoever in 911, then later, offered himself
for arrest, confident he would be acquitted. Not corporately
newsworthy though, so, few even know why their American child
was later died in the terrorists act of corporate contempt for
US living Freedom with something greater as real Justice wills

THE "IRANIAN" 81MM MORTAR WEB PAGE IS A FAKE!

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

McCain speaks NOTHING to demand the
execution of hiding as 'British' soldiers who on prized video
tape, beat to death young barefoot children for erotic fun,
nor on mercury vaccines not banned minus "The President" in
name. BANNED.

-

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

-

Great words from the lawyer of the thieving bushite child killers of Haditha

/ / "If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Bill Sattler.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

-

/ / Four US oil companies, namely Conoco, Chevron, Amoco and
Philips have concessions in nearly two thirds of Somalia.
This quartet of oil conglomerates was granted these contracts
in the final days of Somalia's deposed dictator, Siad Barre.
The US first military engagement in Somalia was fully
supported by Conoco. \ \

1971. Eton E1 XM + C.Crane Twin Coil Ferrite

Newsgroup: rec.radio.shortwave
Date: 2008-01-25 00:39:49 UTC
From: Brody <brody@hotshot.com>
Message-ID: <pdamj.2975$ow.2155@pd7urf1no>
Source record: 134939

I received the Eton E1 as a gift. After reviewing the pros/cons/quality issues, I decided to keep it.

I saw the C.Crane Twin Coil reviewed as a great AM antenna for the E1 so I bought it. Now I have to connect the antenna to the PAL connector of the E1.

I contacted C.Crane and they told me I needed a PAL to RCA adapter. These seem to be hard or impossible to fine online. Does anyone in this group know of a source for them ??

If not, maybe someone here can tell me if this will work.
The C.Crane antenna uses a RCA jack to connect to the radio antenna connector so... will the following work

(PAL to F adapter) + (F to RCA adapter). These I can find online.

For what it's worth, I know nothing about shortwave radio, The E1 is my first shortwave radio and I am just beginning to learn about the hobby.

Do -you- understand what I wrote? Do you grasp the concept? Please pay attention.

I -never- said the direct and reflected signals would exist at the -same- time 'anywhere on earth'.

What I -did- speculate on is that a *portion* of the echo (the echo's leading edge) will be QRM'd *right as it leaves the moon* (the first 0.75 seconds of the echo) by the trailing edge of the incident wave (its last 0.75 seconds). Therefore, either a shortened echo (due to full cancellation of the 'overlap', which is unlikely) or an echo with a distorted or weakened leading edge (more likely) will ultimately reach the earth, depending on how much out-of-phase cancellation at the moon end of the circuit occured.

Sending Out Signals to Long-Isolated North Koreans
Defectors Who Once Worked for Government of Kim Jong Il Now Broadcast
From South of the DMZ

By Francine Uenuma
washingtonpost.com Staff Writer
Sunday, December 30, 2007; Page A27

....
The North's estimated 23 million people have little accurate
information about the outside world. Listening to foreign news sources
is illegal, part of a government effort to block infiltration of
subversive ideas. But as more North Koreans buy low-cost radios
brought in from China, violating that ban has become easier.
....

All told, Seoul has three privately run radio stations targeting the
North: Open Radio for North Korea, Radio Free Chosun and Kim's FNK,
the only one run by defectors, who are helped by a committed South
Korean staff. Washington-based Radio Free Asia and Voice of America
also broadcast to the North.

Yes I understand what you wrote loser and I'm doing my best to explain
that your thinking is incorrect. I'm the second person tell you this.

> I -never- said the direct and reflected signals would exist at the
> -same- time 'anywhere on earth'.

I didn't say you did. I was trying to give you the bigger picture.

> What I -did- speculate on is that a *portion* of the echo (the echo's
> leading edge) will be QRM'd *right as it leaves the moon* (the first
> 0.75 seconds of the echo) by the trailing edge of the incident wave (its
> last 0.75 seconds). Therefore, either a shortened echo (due to full
> cancellation of the 'overlap', which is unlikely) or an echo with a
> distorted or weakened leading edge (more likely) will ultimately reach
> the earth, depending on how much out-of-phase cancellation at the moon
> end of the circuit occured.

OK you misunderstood what I wrote, which is these EM waves can mix as
you think in a antenna in the part of space where the wave going to the
moon exists in the same space time as the reflected signal. Without the
antenna these waves do not interact. With the antenna they do interact.
Is that redundant enough for you?

Logically, since no antennas exist in this area of space time your idle
speculation is moot. Now you have had two people explain this to you so
if this does not sink into your very dense skull give up.

Let me explain something else to you O'clueless wonder and that's if you
don't get it your problem not mine.

The Grumman G-44 Widgeon was designated as J4F by the US Navy and Coast Guard. It was an amphibious transport aircraft. It was originally designed for the civil market.

Warplanes.com offers the Grumman Widgeon J4F-1 model aircraft. It has a span of 17.25 inches and length of 14 inches. It was a complete replica of the original aircraft.

For more information visit our website: http://www.warplanes.com/.

When I went to the site just now to look at their schedules, I keep getting some Democratic political talk. The URL is correct, but only this mess below shows up on my screen?

About the Trempealeau County Democratic Party

The Trempealeau County Democratic Party is part of the Democratic Party of Wisconsin. The modern Democratic Party in Wisconsin got its start in 1949, when the progressive wing of the state's Republican Party broke away and joined Wisconsin's Democratic Party. Over the next decade, Democrats, invigorated by the new blood brought into the party by those progressives, racked up an impressive series of wins. This included the election of the first Democratic Governor and U.S. Senator, knocking out Joe McCarthy in doing so.

Since that time, the Trempealeau County Democratic Party has fought for those same progressive principles-rallying against unjust wars, fighting along with our labor and environmental allies on issues impacting workers' rights and wages and our shared natural environment. We've taken a lead in the Wisconsin Democratic Party to ensure openness for all party members in our decision-making processes.

The Trempealeau County Democratic Party has monthly meetings each month at the Alternate Ground Coffee House, Main Street, Whitehall, at 7:00 pm. Dates of future meetings can be found below.

We hope you'll join the Wisconsin Democratic Party and become active in the Trempealeau County Democratic Party too!!

-
- What I -did- speculate on is that a *portion* of the echo
- (the echo's leading edge) will be QRM'd *right as it leaves
- the moon* (the first 0.75 seconds of the echo) by the
- trailing edge of the incident wave (its last 0.75 seconds).
- Therefore, either a shortened echo (due to full cancellation
- of the 'overlap', which is unlikely) or an echo with a
- distorted or weakened leading edge (more likely) will
- ultimately reach the earth, depending on how much
- out-of-phase cancellation at the moon end of the
- circuit occured.
-

BP,

What you are saying is the 'theoretical' Signal Time-Line
on the Moon 'might-be' :
[ Roughly 0.1 Second Time Increments ]
EEEEEEEEEE 1 { 'E' 100% Earth Pulse }
EEEEEEEEEE 2
EEEEEEEEEE 3
EEEEEEEEEE 4
EEEEEEEEEE 5
EEEEEEEEEE 6
EEEEEEEEEE 7
EEEEEEEEEE 8
EEEEEEEEEE 9
EEEEEEEEEE 10
EEEEEEEEEE 11
EEEEEEEEEE 12
eeeee l l l l l 13 { 'e l' Mixed Signal Conditions}
eeeee l l l l l 14
eeeee l l l l l 15
```

```
eeeee l l l l l 16
eeeee l l l l l 17
eeeee l l l l l 18
eeeee l l l l l 19
eeeee l l l l l 20
LLLLLLLLLL 21 { 'L' 100% Lunar Reflection }
LLLLLLLLLL 22
LLLLLLLLLL 23
LLLLLLLLLL 24
LLLLLLLLLL 25
LLLLLLLLLL 26
LLLLLLLLLL 27
LLLLLLLLLL 28
LLLLLLLLLL 29
LLLLLLLLLL 20
LLLLLLLLLL 21
LLLLLLLLLL 22

IWFT - The 'potential' Exists for these "Mixed Signal Conditions"
to be Observed in the Signal Received by the Earth Radio.

OK - It is 'possible' ~ RHF

Merda! I was hoping that something had hijacked my browser, and all I
would have to do is fix that. Now it seems like something worse has
happened. :-)

I've relied on this site for years. I would have thought Sampson would
have given us some notification if he was going to stop what he was
doing there.

Well, I guess we will know in a dozen hours or so what happened. Some
of the experts here will figure it out.

And so it goes. :-(

Brody,

What About Listening to the Shortwave Radio Broadcasts
on this very fine 'portable' AM/FM Shortwave Radio ?

For Shortwave Radio Listening (SWL) you may want to use
an External Shortwave Antenna : To make that 'connection'
to a SWL Antenna with a Coax Cable using a PL-259 Plug.

Universal-Radio sells a SO-239 to KOK Antenna Jack Adapter
http://www.universal-radio.com/catalog/portable/0101.html

of course :) One step at a time though.

I listen to some talk radio that I can receive from the U.S. so I
researched AM antennas and settled on the C.Crane

I am looking at shortwave antenna now.

thanks

BD - The Real Pledge of Allegiance ! {Circa 1954}
http://en.wikipedia.org/wiki/Pledge_of_Allegiance
By God . . . Is There Any Other Kind ? ~ RHF
.
Or do you mean : The New Democratic Pledge of Allegiance
to the One World Order of the United Nations of Earth
http://en.wikipedia.org/wiki/Pledge_of_Allegiance

Pledge of Allegiance to the "UN" One World Flag Above All :

"I Pledge Allegiance to the Flag of the United Nations of Earth;

and to the Global People's Socialist Republic for which it Imposes;

One Planet under Strict Environmental Military & Scientific Control;

Indivisible from Exploitation, Coruption, Sickness and Hunger;

with Perfect Liberty for The Peoples Elite Leaders and Rulers;

and the Rich Rewards of Justice for All Who Are Above The Laws."

it's a 'vision' thing ~ RHF -ibid-
.

Lower Mainland, British Columbia, Canada
White Rock to be exact, which is just across the border from Blaine WA

Late night, using the whip on the E1 I was suprised to be able to pick up AM stations in Reno NV, San Francisco, I even picked up one from Calgary Alberta.

I am having a problem though from about 1000 kHz to 3000 kHz. Anything I can receive in that range has another station I can hear at the same time. Always the same station. I can hear it by itself, very loud and clear at 1600 kHz so I assume that this is its assigned frequency. It is Islamic music or chanting, religious I think. It is most annoying. I seem to be able to pick up quite a few stations in this range but always they overlaid with the one at 1600 kHz, loud enough make pretty much everything in this range unlistenable. I havent tried in the daytime yet to see if the problem is the same.

Hopefully the C.Crane AM antenna I just got will be able to help, I have to wait till I get the PAL to RCA adapter though

- I'd sooner vote for J. Fred Muggs than Hillary Clinton..
- and I'm far from a rabid right winger.

Who Is : J. Fred Muggs -circa- 1950s
http://en.wikipedia.org/wiki/J._Fred_Muggs
.
BAD - With Barack Obama being the First African-American
who is an honest and viable Candidate for the US Presidency :
http://en.wikipedia.org/wiki/Barack_Obama
This Reference to "J. Fred Muggs" might be :
* Misunderstood by some with 'sick minds'
* Exploited by others with 'mental problems'
* Simply Used To Raise Hell -by- Hell Raisers

Where Is "Colin Powell" When The Repubicans Need Him ?
http://en.wikipedia.org/wiki/Colin_Powell
I Say : Run Colin Run - We Need You !
http://cache.eb.com/eb/image?id=85184&rendTypeId=4
Why Colin Powell Even Looks Presidential

http://www.textmap.com/heatmaps/person/Colin%20Powell.jpg
IMHO - Americans Generally Know and Like Colin Powell

Thus I Say {Being Ever So "PC" Politically Correct :o} :
.
Remember "ABbH" Any 'Body' but Hillary* in 2008 !
.
Stay Out The Clintoons ! ~ RHF
.

Mike [M II] {Clueless in Can-A-Duh},

One Thing For Sure - You Don't Get A Vote [.]

-Or- Are You One of Those Can-A-Duh-Ians : Who . . .
Crosses the Border and Votes in US Elections ?

-ps- Maybe you have a few US Absentee Ballots to Mail-In ?

About Voting In Canada -and- The Canadian Leadership :

Mike [M II] - Honestly Is it True That : More Canadians Know
Who the President of the USA is {Geoge "W" Bush} : Then
Know Who Is "The Head of the Government of Canada" ?
http://en.wikipedia.org/wiki/Prime_Minister_of_Canada
-aka- The Prime Minister of Canada
VOTING - You Do Get To Vote For Him {Indirectly}
- = Oh Canada ! - What's Up With Dat ? = -

Then again Canadians have that whole other thing with the
"Governor General of Canada"
http://en.wikipedia.org/wiki/Governor_General_of_Canada
Who happens to be "Michaëlle Jean" {She/Female}
http://en.wikipedia.org/wiki/Micha%C3%ABlle_Jean
Who was Born in Haiti ?
Question - Does Anyone Know Her Name ?
OBTW - Technically She is Commander-in-Chief
of the Canadian Military.
NOT VOTING - You Do NOT Get To Vote For Her At All.
- = Oh Canada ! - What's Up With Dat ? = -

PLUS - You Got That Whole "Canadian Monarchy" Thing
http://en.wikipedia.org/wiki/Monarchy_of_Canada
-aka- Monarchy of Canada with a Queen
http://en.wikipedia.org/wiki/Monarchy_of_Canada
Now Here You Go Canada - More Canadians Know
the Name of the Queen : Elizabeth II of the United Kingdom
and Canada etc; Maybe cause HRH has been around so long.

http://en.wikipedia.org/wiki/Elizabeth_II_of_the_United_Kingdom
The Queen in-fact holds the position of "Head of State"
http://en.wikipedia.org/wiki/Head_of_state
NOT VOTING - You Do NOT Get To Vote For Her At All.
- = Oh Canada ! - What's Up With Dat ? = -

FWIW - In the USA Our "Monarchs" are limited to Butterflys
http://en.wikipedia.org/wiki/Monarch_Butterfly

OH CANADA ! - WHAT'S UP WITH DAT ?
http://en.wikipedia.org/wiki/Canada

i want to know ? what's with dat ? ~ RHF

"Radio: Wall Street Shuffle"

What's the big deal?

Radio stocks were plummeting long before fears of a recession. At last the radio industry is first in something again - first to be worst.

A couple of weeks back I listed devalued radio stocks. It's only gotten worse.

That 90 percent-plus club keeps growing: Spanish Broadcasting, Radio One, Emmis, Citadel, Regent. 90-percent. That's the value they've lost.

Let's take a quick trip to Los Angeles - the number one radio market in America. Even in the worst of times there were always buyers awaiting an opportunity to pick up an FM or two or three in that market. But that was yesterday.

Supply and demand? It's not even a buyer's market. No one's buying.

You have two major chains - Radio One and Emmis - and neither one's getting as much as a nibble for the troubled FM properties they're trying to unload.
So do you take them off the market and try to make another go of 'em with new formats, which you can't really afford to change or market - or do you hang a sign on 'em reading, "New! Lower Price?" That's the one you put up before "Priced to sell" and "Fire sale."

This is the first time I've heard excuses being made for the Los Angeles radio market. My favorite? There are too many stations in that city. That used to be the last-ditch line you'd use to define Rust Belt markets.

Could it be that there are no greater fools remaining - as in there are always greater fools willing to pay even more than you did for a property you paid too much for?

How about those leveraged buyouts? Will BainCapital and Thomas H. Lee determine that they're better off paying the $500 million break-up fee to back out of the Clear Channel LBO deal? Breaking up may not be that hard to do.

Remember, they're doing it for the children. Lowry's children.

Here's the choice. Stay the course while Clear Channel continues to plummet? The deal, which was supposed to close last year, is now targetied for February or March. What'll their value be by then? Will

Bain and Lee's backing banks risk it or cut their losses. I'd say flip a coin except that it's a heads I win, tales you lose deal. There are few things worse than to have a vested interest in a dysfunctional corporation.

Bain/Lee offered $39.30. As I write this Clear Channel's down to $32.14. Ask yourself - what would (BainCapital founder) Mitt Romney do?

It's a shame when facts keep getting in the way.

I got an advance on what the number one song will be on Clear Channel's corporate playlist. It's a remake of Prince's "1999." They changed the lyrics to "...we're gonna party like its 1929."

And did you hear the one about the Cumulus and its go-private deal? The gelded bulls at Merril-Lynch lost $8.6 billion and have problems far more pressing than a radio deal gone sour - especially when those that set up the deal are no longer with the company. We're talking - what - a five dollar drop since the deal was set? The deal's clouding up.

There's buyer's remorse and there's buyer's morose. With Cumulus it's one and the same.
*
I understand the bad blood started when everyone in the room claimed to have the superior intellect.

And if you need proof that there's a glut of too many radio stations - drop by the FCC offices where they held an auction for 14 AM radio stations in various markets and no one showed.

We already know of a few deals where clusters in smaller markets sold for less than their original purchase price. There'll be more.

We also know that there are creative, resourceful managers and talent waiting to get back in when the proper pragmatic deals are done. Other smart managers and talent that still have jobs are laying low and pretending to being good soldiers as they await the inevitable.

When radio is restored it'll be different and will require the skills of linking old media with new - and that means far more than just a stream encircled by lowest common denominator features.
*
Years ago Bob Sillerman told me that thriving businesses have fun, make money, and having fun making money. He's right.

You know the problem is the crisis stage when pro-radio trades begin expressing commiseration for all involved and offer optimism that a judicious resolution to the calamity will be found.

Just and rational. Those words haven't been uttered in radio since the Telecom Bill was passed in 1996.

The math is simple. The values have to be realistic for radio to be profitable again.

Going down?

http://gormanmediablog.blogspot.com/2008/01/radio-wall-street-shuffle.html

Well, Eduardo - which will it be?

Mike [M II] {Clueless in Can-A-Duh},

One Thing For Sure - You Don't Get A Vote [.]

-Or- Are You One of Those Can-A-Duh-Ians : Who . . .
Crosses the Border and Votes in US Elections ?

-ps- Maybe you have a few US Absentee Ballots to Mail-In ?

About Voting In Canada -and- The Canadian Leadership :

Mike [M II] - Honestly Is it True That : More Canadians Know
Who the President of the USA is {Geoge "W" Bush} : Then
Know Who Is "The Head of the Government of Canada" ?
http://en.wikipedia.org/wiki/Prime_Minister_of_Canada
-aka- The Prime Minister of Canada
VOTING - You Do Get To Vote For Him {Indirectly}
- = Oh Canada ! - What's Up With Dat ? = -

Then again Canadians have that whole other thing with the
"Governor General of Canada"
http://en.wikipedia.org/wiki/Governor_General_of_Canada
Who happens to be "Micha&#65533;lle Jean" {She/Female}
http://en.wikipedia.org/wiki/Micha%C3%ABlle_Jean
Who was Born in Haiti ?
Question - Does Anyone Know Her Name ?
OBTW - Technically She is Commander-in-Chief
of the Canadian Military.
NOT VOTING - You Do NOT Get To Vote For Her At All.
- = Oh Canada ! - What's Up With Dat ? = -

PLUS - You Got That Whole "Canadian Monarchy" Thing
http://en.wikipedia.org/wiki/Monarchy_of_Canada
-aka- Monarchy of Canada with a Queen
http://en.wikipedia.org/wiki/Monarchy_of_Canada

Now Here You Go Canada - More Canadians Know
the Name of the Queen : Elizabeth II of the United Kingdom
and Canada etc; Maybe cause HRH has been around so long.
http://en.wikipedia.org/wiki/Elizabeth_II_of_the_United_Kingdom
The Queen in-fact holds the position of "Head of State"
http://en.wikipedia.org/wiki/Head_of_state
NOT VOTING - You Do NOT Get To Vote For Her At All.
- = Oh Canada ! - What's Up With Dat ? = -

FWIW - In the USA Our "Monarchs" are limited to Butterflys
http://en.wikipedia.org/wiki/Monarch_Butterfly

OH CANADA ! - WHAT'S UP WITH DAT ?
http://en.wikipedia.org/wiki/Canada

i want to know ? what's with dat ? ~ RHF

It does not matter whom you vote for, the direction
of ANY country is dictated by the unelected, probably
invisible, monied elite who pay the campaign expenses,
etc. miki.

>
> jw

I have a Yamaha 4600 receiver and JVC car radio with HD radio.

On AM, only 1190 KEX broadcasts in HD. KEX is a talk radio station
with little stereo content. A few commercials are in stereo and
they really jump out. HD audio sound quality is similar to analog
on a 680NAB tuner.

Quite a few FM stations have HD. I listen to all classical KBPS.
Sound quality is indistinguishable between FM and HD except for
the noise floor. KBPS compresses the HD signal just as much as
the analog signal.

The non HD AM reception on the JVC car radio sucks. Reception is
weak and the audio is poor. HD sound is fine, but the least bit
or powerline interferece knocks the radio back to muffled analog.

HD FM on the JVC car radio is weak, dropping back to analog at the
slightest provocation.

I would like to see a Ramsey kit am transmitter with HD.

Well.. I posted the following reply last night but it didnt appear on my news server so I am reposting it...

Lower Mainland, British Columbia, Canada
White Rock to be exact, which is just across the border from Blaine WA

Late night, using the whip on the E1 I was suprised to be able to pick up AM stations in Reno NV, San Francisco, I even picked up one from Calgary Alberta.

I am having a problem though from about 1000 kHz to 3000 kHz. Anything I can receive in that range has another station I can hear at the same time. Always the same station. I can hear it by itself, very loud and clear at 1600 kHz so I assume that this is its assigned frequency. It is Islamic music or chanting, religious I think. It is most annoying. I seem to be able to pick up quite a few stations in this range but always they overlaid with the one at 1600 kHz, loud enough make pretty much everything in this range unlistenable. I havent tried in the daytime yet to see if the problem is the same.

Hopefully the C.Crane AM antenna I just got will be able to help, I have to wait till I get the PAL to RCA adapter though

Hmm. I'm sure if Senator Durbin had given this issue a moment's thought, he'd realize it's unfair to force poor people to pay for their IBOC radios. The Republicans would then counter that the only fair give-away would include guys like Warren Buffet and Bill Gates.

Both parties would agree that it's grossly unfair to expect the current generation of voters to pay for anything, but we would be happy to borrow the money from our eternal pals, the Saudi Arabians and the Commie Chinese.

Are there any HD radios that actually have a good AM front end. We have the Boston Acoustic non-HD clock radio. While the AM band has very good sensitivity, the adjacent channel selectvity is a bit wide. Also, the LO isn't very clean....early evenings, I can hear 49 Meter stations coming in around 950kHz. This is because of mixer products occuring from the 5th harmonic of the LO. This is even while using an external tuned loop antenna. Inexcusably poor design, from an RF standpoint.
I wanted to clean up the design a bit.....when I called Boston Acoustic and asked for a schematic, I was told "we don't release that kind of information". Translation? We want to continue selling junk to the public, and we don't want anybody improving our poor electrical design. Needless to say, I never bought another Boston Acoustic product. Come to think of it, their speakers were never anything to write home about either.

It would be nice if we actually had some leaders that actually care. He was one of 4 or 5 people in Congress that I e-mailed about this situation.....I never heard from any of the others. They must be to busy to listen to the people.

I don't think any of them care. The Ibiquity folks must have quite a bit of money, and/or quite a bit of clout. It is funny, when you hear the folks on NPR referring to Hybrid Digital radio as High Definition radio. Same thing with the FM stations in the Chicago area. My real issue is with the MW intereference, especially in the evenings. What were they drinking when they authorized evening IBOC?

Brody,

Many say the the Eton E1 Radio using the Whip Antenna works
almost as well as a Car Radio using it's Whip Antenna.
- - - The Cup is Half Full.

Other's Fault It -for- Not Having an AM/MW Ferrite Rod Antenna.
- - - The Cup is Half empty.

1 - Place the Eton E1 Radio on a small Table in the center
of a Room; where you can Rotate the Radio 360 Degrees.

2 - Fully Extend the Eton E1 Radio's Whip Antenna.

3 - Lay the Whip Antenna Down so that it is Horizontal [Flat].

4 - Select an AM/MW Band 530 kHz ~ 1710 kHz Radio Staion
or tune into a Tropical Band Frequency 1.8 MHz ~ 3 MHz
{actually up to 5 MHz}.

5 - Then Rotate the Eton E1 Radio along with the Whip Antenna to
Peak -or- Null-Out the Radio Broadcast that you woul like to hear.

-ps- A Lazy Susan makes Rotating the Radio a lot eazier.

The Question Is Still Open : { In Search of an Answer }
? Wonder What Is The Tuning Resolution of the new
Grundig Satellit 750 Radio ?

Anyone Got The Answer as to the "Tuning Resolution"
of the new Grundig Satellit 750 Radio for both :
Shortwave AM __ kHz ?
Shortwave SSB __ Hz ?

Hello - Someone get on the Telephone and give Eton Corp
[Grundig Radio of North America] a Call and Get-the-4-1-1

on the Tuning Resolution of the Grundig Satellit 750 Radio.

i want to know ~ RHF

KEX and KGW used to sound great in AMS. Should have stuck with it.

>
> Quite a few FM stations have HD. I listen to all classical KBPS.

> the noise floor. KBPS compresses the HD signal just as much as
> the analog signal.

I used to listen to KBPS (both AM and FM... AM mostly on my telephone, since
I was about 4 blocks from Benson Tech) and KMHD quite a bit. Classical is
getting very hard to find. Anyone who uses compression on classical should
be strung between two of the antenna bays and covered with some substance
that attracts eagles and hawks.

> The non HD AM reception on the JVC car radio sucks. Reception is

> slightest provocation.
>
> I would like to see a Ramsey kit am transmitter with HD.

I can see the range now.... connect the antenna directly to your radio for
reception. :) I'd sooner see them do one for AMS... like the one that Chris
Cuff built, but with a bit more range.

2046. (OT) : What About - Ron Paul's Superficially Goofy Appearance ?

2056. New portable Coby HDR-700 only $149 and 5 hours on battery life!

Newsgroup: rec.radio.shortwave
Date: 2008-01-26 00:50:37 UTC
From: PocketRadio@gmail.com
Message-ID: <1bb9577b-ad5a-4763-891d-2ae28a061231@i12g2000prf.googlegroups.com>
Source record: 135023

"Additional Functions: HD Radio tuner receives crystal clear digital broadcasts with no subscription fees; Receives AM/FM analog broadcasts; AM Loop Antenna; Preset station memory; High-contrast LCD display with backlight; Integrated rechargeable battery provides up to 5 hours of play time. The portable HDR-700 mono model features embedded rechargeable battery, SD card slot to play back MP3 files, 3.5mm line-in jack, remote and splash-proof case at a suggested $149. It ships in the first quarter."

http://www.cobyusa.com/?p=prod&prod_num_id=194&pcat_id=3005

Wow - a WHOPPING 5 hours on the rechargeable internal battery! External AM-loop supplied. Wonder, what it uses for FM - does one have to buy a seperate portable FM-dipole antenna? LOL! LMFAO!

2057. Re: Eton E1 XM + C.Crane Twin Coil Ferrite

Message-ID: <20153-479A84D2-3676@baytvnwsxa002.msntv.msn.com>
Source record: 135024

You do not need an adaptor with the twin coil ferrite antenna just use the ferrite rod and find the sweet spot on your radio. That antenna does not work with shortwave just am. Go to youtube and search twin coil ferrite antenna.

For God's sake it's not possible. Didn't you read my examples? Can't you think at all? EM waves don't directly interact with each other anyway. Think what would the result would be if this luny-tunes idea were true.

How about the people that designed the experiment? Do they have a functioning brain? I would say yes! Do you? I would say no and that also goes for Billy boy.

How embarrassing.

That's actually a pretty good step in the right direction as those
radios have been sucking down over an amp. For five hours use they must
be using a computer lap top size battery.

If they'd drop the HD capability this might be an interesting receiver.

For the X1, you do need the adapter. It has no built in ferrite antenna, so
no way to couple the external into it by induction.

My excellent Sony ICF-S10MK2 pocket-radio was only $10 (including
shipping from J&R Music) - it gets about 200 hours on a "AA"
batteries, requires no external antennas, and doesn't suffer fron
digital dropouts. LOL!

Surprise!

The chipset commonly used in consumer products can already deal with a
combined 40 kHz / 60 kHz service.

In Japan, JJY broadcasts on 40 kHz from the Ohtakadoya-yama station
and 60 kHz from the Hagane-yama station.

The CDMA cell phone standard, used by Verizon Wireless, Sprint, and
Alltel, among others, requires GPS synchronization at the base
stations to effect seamless handoffs between cells. This isn't to say
that they couldn't synchronize using other methods (e.g., ground based
longwave signals), but GPS is what is normally used.

Analog NTSC television in the U.S. had (has) standard means for transmitting current time. As part of the modern Vertical Interval Retrace (VIR) mechanism that was originally used for closed captioning (transmitting digital data on a couple of the blanked scan lines at the top of the frame), packet types are defined for such things as parental ratings, program title, and time-of-day.

The problem with the NTSC VIR system is that it typically requires manual set-up and oversight by the engineer in the control room. There have been some spectacular human-factors problems. In one case, a new Chief Engineer didn't even know that his studio had a time-code generator, which ultimately put out wildly wrong data, messing up VCRs all over the San Francisco Bay area. In another, FOX-TV Network Control in Los Angeles managed to put VCRs all over the country on Pacific Time.

The ATSC digital television standard also has provision for time dissemination, in the standard having to do with the programming guide. When I looked into it about 7 years ago, the specification was rather coarse -- accuracy of only +/- 3 seconds was required. However, these standards are updated periodically, and it may have gotten tighter. Also, since this part of the ATSC system has some importance (e.g., controlling personal video recorders), I suspect that the networks are doing a much better job these days in ensuring quality data. (My ATSC televisions seem to pick up the time just fine.)

They may have licenses that allow them to cover 98% of the surface
area (to use your number), but actual coverage is nowhere near that.

http://www.wireless.att.com/coverageviewer

(And this includes both the older 850 MHz and newer 1.9 GHz bands.)

2077. An interesting comment...

Newsgroup: rec.radio.shortwave
Date: 2008-01-26 03:30:19 UTC
From: swler@live.com
Message-ID: <2c82509e-017a-43bd-850d-7e7caeeeec86@e6g2000prf.googlegroups.com>
Source record: 134844

My wife and I had a nice dinner with a friend who is a professional astronomer tonight.
She had some of her advanced students who are interested in SETI and she asked me
to give some practical hints based on my "many years of messing with radio".

It was a very interesting night with some very smart kids, to me anyone under 30 is a kid.
One young lady asked about the "wisdom of trying to listen to weak signals from within a
strong noise locale". I explained that in spite of the noise, decent DXing was possible, though
I admitted that for serious DX work I used a friend's deed woods cabin.

She laughed and told me that it appeared that trying to listen to HF while near or withing a
city was much like trying to observe stars from campus. The campus she referred to is
well within the Lexington KY metroplex. A kind of dark area surrounded by 'gigiwatts' of
street lights.

I hadn't thought of it in exactly those terms, tough I will relay some comments made by
my wife during one 4:00AM drive to eastern Kentucky for a family emergency. My wife
commented that long before the sky noticeably lightened at dawn, the stars seamed to
fade out. We had a car with a moon roof and she was leaned back in the car seat watching
the heavens. I commented to her that she was seeing the signal (stars) to noise (sunlight)
radio decreasing.

I had never really given serious thought to the nightmare those within major metropolitan
areas face in trying to listen to weak LW/MW/HF signals. We have discussed noise
reduction techniques in this group but I think the student brought up a point that we
all know but ignore. If you live in a condo or apartment building, or even in they typical
suburban neighborhood, the noise is a fact of life and like a backyard

astronomer, to
do serious work you either have to wait for a power outage or do you
hunting from
quieter area.

I realize that this is a very simple observation, but I wonder if we
aren't holding some
sort of false hope for want to be SWLs located in the heart of a noisy
city. In both
this group and via Email I have offered advice to help mitigate their
local noise, but
I suspect I am not helping them as much as I once thought.

Any comments?

Terry

Terry,

Are you helping others? It would be up to those who have been helped to indicate their success. A healthy discussion of antennas and noise abatement is probably beneficial to many.

For those wanting to listen to SW broadcasts in a noisy environment your posts point out that there are some things that can be done to improve reception. However, the solutions are not necessarily universal, some things may provide no apparent improvement. Folks in problem reception areas may have to try several different things to improve reception. As more information is posted, more people can benefit.

If your efforts help more people enjoy SW listening, then your posts are worthwhile. It may also generate interest in going to quieter areas for SW listening. This be a way for folks too increase their enjoyment of the hobby.

Folks living in noisy areas should recognize that they may not get perfect reception, but there are many things they can try to improve their reception.

Keep up your efforts, your posts are worthwhile.

Hi Terry
I subscribe to The SETI newsletter and try to read it @ times.
I did the start thing a little but just din't have the time to spend with
it.
I lived in Ridgecrest, Ca. way out in the desert and we would go 15 miles
out of town and over a hill to get away fron the lights but still could see
the glow for LA, Backerfield and a little from Ridgecrest. It was cool to be
able to use a flash light to point at starts and things. I also used my
motor home as a platform to DX from way out in the desert at night, the
starts looked like you could just reach up and pick them with your hand. I
think the "Quasires" the red, white an blue flashing thing that came up in
the east and looked like they were coming down the road after me. That's
where some of this "flying sauser" stuff comes from.
Anyway, I got in some good Dxing at night in the desert. I go out beside
the Pacific on Lazon, The Philippines about 5 miles from no where and DX
here when I can with my YB400 or the Sat 800. I also run my radios on a big
old D50 12v battery. I charge it when I am out of the room when it gets low.
I did the samething in Ridgecrest to stay away from EMF. I use a long wire
sloper with an "L" when ever I can!

Yeah, maybe for like two people.

All indications I have from reading the news group is that nobody
listens to what I post about antennas. If I get a response it's usually
an argument that they tried a similar thing and it was no better to the
antenna I describes works different than theory. Looks like it's pretty
much a waste of time.

Next week someone will post the same question and other people will respond with the same wrong answers.

If it's at all technical you be lucky if one person out there reading the news group that gets it. I used to think I was disseminating information in this news group. Now I know better.

You don't get it even after I posted about it?

You can go educate yourself but that takes work doesn't it? So you won't do the work you will instead continue to remain ignorant either for the reason of ability or laziness but that's your problem not mine. So do continue to make foolish posts. They are very entertaining.

It's probably the old version of Safari I'm using then. I've noticed
that I have more trouble with some web sites these days as Apple is not
supporting this version of the browser any more. The latest operating
system Leopard still has some issues and I'll probably wait a little
longer to upgrade.

<With all of my aliases and postings on the Web, you should have been
<able to figure out my name and quasi-location, by now.

I could care less who you are. You do nothing but post lies (like your alias
or sock puppet who said Emmis and Radio One are selling stations in LA) so I
would have little interest in knowing who you are.

< So, has
<Univision raped your pension, yet?

Huh? Companies today don't have pensions, as a rule. We have 401-k's and
such, and the money is not administered by the company on a 401-k.

I do not think my imperfect grammar creates a communication problem to
the extent that reading comprehension causes you. I think that it is
likely that your level of ignorance on the subject may also have
something to do with it.

What you say is true, but what I said is also true. The waves are not
"wrecked" and after the waves pass each other, they are are the same as
before they overlapped.

I found a reference on the web

(http://www.smgaels.org/physics/amsco_review_and_glencoe/chapter04.pdf)

that says it much better than I could. On page 109 the author states:

(Beginning of Quote)
"Two or more waves may pass through a medium at the same time. When this
occurs two rules apply. First, the total displacement experienced at any
point where waves meet is equal to the sum of the displacements of the
individual waves at that point. This is known as the principle of
superposition. Second, waves pass through each other, with each wave
unaffected by the passage of the others. After meeting, the individual
waves continue traveling in their original directions and with the same
characteristics as before."
(End of Quote)

<SNIP>

> What you say is interesting, but...wave theory notwithstanding, what we
> have are TWO RF signals on -essentially- the same frequency (ignoring
> Doppler, libration, etc), the incident and the reflected. And I think we
> both agree that the signals "overlap" for .75 seconds (as so aptly
> stated in your 'train' analogy).

Actually they overlap for very close to 2 seconds. Thinking back to the train analogy, the instant the pulse hits the moon (cow catcher on the engine) and starts back the other way as an echo, we have an overlap. That means 99.99% of the pulse (train), or almost 2 seconds worth, still has to hit the surface and reflect before there is no longer an overlap.

> Just like the old USSR jamming the VOA
> -- two signals on the same frequency. Why wouldn't they interfere for
> the .75 seconds in question?

I think they do to the extent of the "superposition" of the waves, and if you were in a space capsule with a receiver 1000 miles from the surface of the moon, I think you might indeed hear that interference.

>

I agree. I thought your opening question, "what is to keep the leading part of the echo from being QRMed by the trailing part of the transmitted signal?", was asking why the overlapping signals (transmitted and echo) didn't QRM the echo at the receivers on earth. That is why I gave the example of the stones to show that did not happen. I did not realize you were indicating a hypothetical receiver where the signals are overlapping. My apologies.

Sorry, I've forgotten what the various car radio form factors are,
so this might not be the right one for you, but a company in Florida
called Continental Imports sells the Becker Mexico:

http://www.continentalimports.com/be_radios.html

I got the cassette version 2-3 years ago, and it has very good
sensitivity. (Except when my antenna connection goes loose, but
that's another story...)

Superposition is the concept. The EM waves in space do not interact. Yes
they certainly would interact in an antenna where they would create a
vector sum.

Since it is the same signal the interaction in the antenna would be to
weaken if out of phase to strengthen if in phase. It would not sound
like interference.

- You don't get it even after I posted about it?

Dang - Telamon - You are getting smarter with every post.

- You can go educate yourself but that takes work doesn't it?

On this we could agree.
Education = Work
Work = Acomplishment
Acomplishment = Education . . .

- So you won't do the work you will instead continue to remain
- ignorant either for the reason of ability or laziness but that's
- your problem not mine.

Yes 'my' Ignorance is 'my' Problem -and- Your Problems are
Your Problems : One of Them Being Arguing With 'me'.

- So do continue to make foolish posts.

Clearly History Repeats Itself : When We Don't Learn From It.
-ps- So Do Continue To Make Replies To Same {Foolish Posts}.

- They are very entertaining.

HEY - SEE THERE I HAVE SOME VALUE :o)
-and- THAT IS SOMETHING AFTER-ALL !

Telamon:

I have been reading this thread and wonder how the movement of Earth
compared to the moon would affect the signal?
Wouldn't this also ensure the signal would never interfere with itself
as the signal would always be different location on the moon due to
rotational movement.

-
- Telamon:
-
- I have been reading this thread and wonder how the movement
- of Earth compared to the moon would affect the signal?
- Wouldn't this also ensure the signal would never interfere
- with itself as the signal would always be different location
- on the moon due to rotational movement.
-
- Ken I.
-

KEN I. - There must be many "Major" and 'minor' Factors :

Most likely the Biggest Factor was the Separation {The Distance
Between} of the Earth Pulse Sending Site in Alaska and the Lunar
Reflection Receiving Site in New Mexico.

The HF Active Auroral Research Program (HAARP) in Alaska
http://k9zw.wordpress.com/2008/01/18/haarp-lwa-eme-bounce/

and the Long Wavelength Array (LWA) in New Mexico are
planning an additional Lunar Echo Experiment for Jan 18-19.

WHY - Being in a 'place' where you could Hear
both Signals Independently :
* Earth Pulse via Skywave {One Path}
* Lunar Reflection TransSkyWave (2x Out-and-In) {Other Path}

Effectively the Great Distance from Earth-to-Moon 238,857 Miles
renders the Variation in the Altitude of the Moon's Surface : the
Ups-and-Down to be a Non-Factor.

But there is the actual Surface of the Moon itself : Size/Area;
Material Composition; Hardness; RF/EM Properties; etc
Moon Diameter : 2,160 Miles
-and- YES this could be a Factor in the Reflection of Each
Earth Pulse as a Series of Independant Events.

However - HAARP is a Very Large Array {Antenna}
* It Sends Out A Very Focused Signal from at Wide Area
* A Large Area of the Moon is Covered by this Signal
-if- Not All of the Surface
* The Moon is a Very Large Convex Surface that is being used
as a Reflector for this Signal. Given the Larger Distances that
are involved it may be considered to be a "Flat" Surface.

Doing-the-Math :
Earth-to-Moon Distance : 238,857 Miles
Lunar Orbit : 1.5 Million Miles
Moon Diameter : 2,160 Miles
Half Lunar Surface Circumferance : 3391 Miles
Therefore the Half-of-the-Surface of the Moon being used
as a Reflector is 'only' about One (1°) Degree-of-Arc with
respect to the Earth as being the center of it's Orbit.

Thus given it's relative small Half-Surface Size and Distance
from the Earth it can also be considered a "Point Source"
Target and Reflector.

TBL - To me it all boils down to :
How Good Is "The Entire Half-Surface" of the Moon as a Radio
Frequency Signal Reflector for the Frequencies being Transmitted.

Individual Pulse Time versus the Earth and Moon Movements Times :
* Individual Earth Pulse Time Two Seconds (2")
* Earth Rotation 24 Hours ~ 86,400 Seconds [1:43,200]
* Lunar Rotation 28 Days ~ 2.42 Million Seconds [1:1.21M]
Clearly the Movement of both the Earth and the Moon in
just the Two Seconds (2") of the Individual Earth Pulse is
NOT a Significant Factor.

However -IF- It were you could 'Fractionalize' the Two Seconds
(2") of an Individual Earth Pulse into 200, 2000, etc Discrete

Parts and then Evaluate each Discrete Part and Add them all
back together again to have something [some number*}.
* Most Likely the Exact Number of . . . . . .
Angels That Can Fit-On-To-The Head-of-a-Pin. :o)

Well, look what John had to say about HD/IBOC:

"NPR story on HD radio startup"

"Problems with the system that pervade the entire HD/IBOC data and codec from beginning to end, all the way to the signal on the air persist. The codec, by today's standards, is grossly inferior on FM and literally unspeakable on AM (gee, I had no idea). Since they're hardwired into the receivers, they won't be changed anytime soon, if ever."

"But it goes beyond that. There were bad choices of network layer such that reliability is compromised. The code used in exciters has a severe memory leak, so the exciters crash routinely. The receivers can be locked up solid by malformed packets, requiring a power cycle to restore operation. The list goes on and on and on."

"Will any of this get fixed? Probably not, since all the money right now is going to promotion, not to technical bug fixes. This is a system that has been in development for a decade and a half, and it still has problems from beginning to end that range from audio encoding, through the transport layers, to the encoding, and now, with the spectral regrowth problems, to the broadcast bands themselves; you know...that which is supposed to be serving the public. I would love to be implementing digital radio. But this is garbage."

http://tinyurl.com/2kbzsn

Do you still think he is, "a good and respected engineer in the Bay Area"?

- - You do not need an adaptor with the twin coil ferrite antenna
- - just use the ferrite rod and find the sweet spot on your radio.
- - That antenna does not work with shortwave just am.
- - Go to youtube and search twin coil ferrite antenna.
* http://www.youtube.com/watch?v=M348V1uNxC4

TWIN COIL FERRITE AM ANTENNA DEMO {YouTube.Com}
http://www.youtube.com/watch?v=M348V1uNxC4

- For the X1, you do need the adapter.
- It has no built in ferrite antenna, so no way to couple
- the external into it by induction.

WHERE THERE IS A WILL THERE IS A WAY :
{Maybe not a good effective way -but- never the less a way.}

Building an "Over-the-Whip Antenna Coupler" :

1 - Eight Inch long Plastic Tube that Fits over the Whip Antenna.

2 - Forty-Eight to Sixty Turns of Insulated Stranded Hook-Up Wire
evenly space along the Plastic Tube. Secure with Black Plastic
Electrical Tape and secure the Tape with a Black Plastic Wire Tie.

3 - Both Ends the the Hook-Up Wire connected to an RCA Jack.

4 - Slide the Over-the-Whip Antenna Coupler over the Whip Antenna.

5 - Connect the RCA Plug {Output} of the C.Crane AM/MW
Twin Coil Ferrite Rod Antenna to the RCA Jack.

Turn-On the Radio and Antenna and Enjoy Listening :o)

That Something Extra :
Add and SO-239 to RCA Plug Adapter to your Radio Shack Parts :
Use this Adapter to connect your Outside Wire Shortwave Radio
Listening (SWL) Antenna to the Over-the-Whip Antenna Coupler.
Place the Over-the-Whip Antenna Coupler over any 'portable'
AM/FM Shortwave Radio's Whip Antenna and Enjoy.

it ain't perfect -but- it works ~ RHF {pomkia}

I met Ron Paul 32 years ago and was immediately impressed by his honesty, which is unmistakable. He turned me into a libertarian, even though the name was pretty much unknown in 1976. I voted for him in 1988 and have just registered Republican so I can vote for him next month.

He always speaks what he believes and for that I'm willing to excuse his shortcomings. I'd love him to be President and for there to be a veto-proof populist-progressive coalition in the Congress. We'd get some good debate going and get this sorry excuse for a country turned around. Hell, the unwashed masses might even realize politics done right is a hoot and start getting involved.

Reason I ask is that it seems as though you are hearing an image up on 6950.
That would be 6040 + 2 X 455 kHz IF freq. = 6950.

And, it just so happens that the VOA is currently on 6040 (at 1445) in Mandarin
via the Marianna Islands.

TV stations that synchronize to avoid ATSC into analog interference use
GPS as well. They have to be within 6 Hz of each other.

The FCC has failed to protect the airwaves by allowing all manner of crappy electronics to pollute the skies with all manner of buzzes. The FCC was started to get rid of all the whistles and interference. Since then the whistles are gone but the buzzing is stronger than ever.

OK, then it's probably either 6040 that you were (or are) hearing as I see that the R75 uses a 450 kHz IF in AM mode (455 in sideband) in which case you were probably hearing 6050 That would be 6050 + 2 X 450 kHz IF freq. = 6950. In which case it would be China, PBS Xizang in Mandarin.

I'm not surprised. Shutting up keeps your career advancing. Today I
stumbled across another news article...I wonder if they share the same
oil investments.

==========
The bad news for Obama (above) is that he turns out to be a relative of
Dick Cheney. While researching her latest book, Lynne Cheney, wife of
the Vice-President, discovered that her husband is eighth cousins with
Obama. Campaign spokesman Bill Burton responded: "Obviously, Dick Cheney
is sort of the black sheep of the family."

Obama's family ties with the Bush administration don't stop with Cheney.
According to an article in the Chicago Sun-Times last September, Obama
is also an 11th cousin of the President George W Bush. The two share a
17th century Massachusetts relative.

free mac mini..... here is how you can get a free mac mini. all you have to do is go to this site below, complete one offer and refer so many people to get your free mac mini. i have done this before and got a free ipod. the offers are pretty easy and half of them don't require you to buy anything. stamps.com is an easy one - you have to give a credit card for the four week trial - but you don't have to spend any
$
$ and just cancel before the trial is up. you have nothing to lose. just click on the link below and sign up. thanks!

Telamon, ignore the troll.

His "something to do with it?" shows that he has a poor grasp of
grammar and should not
hassle others until he masters the subject.

Do you actually think HE read the letter and wrote the reply himself?
Most likely, some aide or intern got the message and sent the wrong
stock reply.

Man you don't know the half of it!

For two months in the summer of 2007 I worked at, managed green EEs, a
EMI certification laboratory. The lab was concerned only with
conducted
emissions. And the junk that passes even Class B acceptance is
frightening!
I had a chance to test some of my own equipment, and while all of it
except
my wife's APAP(sleep apnea breathing maching) was legal under Part
15,
Class B.

And it all wiped out radio reception from below MW to above 20MHz.

The FCC is too interested in selling off spectra to care about
anything else.

And what makes it much worse is the FCC along with the EU countries
now
allow manufacturers to "self certify" and most of this on done by
computer
simulation with very little testing.

Durbin is pretty widely known to be kept isolated from outside
influences, and is led around with the ring in his nose by his staff.
It's very possible he's not aware of the interference caused by IBOC,
and has, instead adopted the position of acceptance handed him by, as
you said, an aide, or associate pursuant to political agendae, and
contributorship.

Durbin is one of the slimiest of the Illinois politicians, and like
our beloved Governor (nice hair, not much under it-----thank you
G.Gordon Liddy) is prone to say whatever he needs to say to get critics
off his back. And then forget the conversation before the words have
died in the room.

> TV stations that synchronize to avoid ATSC into analog interference use
> GPS as well. They have to be within 6 Hz of each other.

For that matter, there is an ATSC standard for broadcasting television on a single-frequency network within an area of license. That is, a station would have multiple transmitters (lower power, of course) all broadcasting in sync and on the same frequency (the assigned TV channel). The advantage, besides potentially less expensive transmitter facilities, is that a broadcaster can put up antenna in such a way as to ensure better coverage over their entire market.

Yes, there would be destructive interference in places, but since the signal is 6 MHz wide and at 600 MHz, only a small portion of the entire band would be affected at any given location. The error correction takes care of it.

The timing requirement for this is quite tight.

Interesting point. It would seem that might be the case, at least in theory. Sort of like the Young's double slit experiment with a single monochromatic light source passing through two slits and interacting to create bands of constructive and destructive interference. I wonder if in practice though if Doppler and other effects might alter the frequency enough so that it would still sound like interference at the receiver.

That two slit experiment however would also tend to indicate that EM waves do interact in space regardless if there is an antenna around or not. Perhaps the antenna is only the vehicle for capturing the interaction and not required for the actual interaction.

Or perhaps it is only a matter of semantics.

I think at the HF frequencies of HAARP the beam width is much too wide
at those distances to focus on one spot. That, along with the fact the
angular movement is so small compared to the speed of the radio wave,
would seem to preclude that from happening.

We have sure batted this topic around enough :-).

What is happening here is that the two waves of varying phase fall upon
a different medium like white paper that causes them to interact and
readmit a light level (an output) according to the phase result of the
two incoming wave inputs. The antenna and white paper perform the same
function allowing the EM waves of different phase to interact.

> We have sure batted this topic around enough :-).

The EM waves will not interact with each other in space. Can you imagine
the chaos that would result on earth if this were to occur with all the
different EM waves at your location nothing would be receivable. You can
see this point right? If this were not true then any medium could only
ever carry one signal at a time light or radio both being EM waves.

What happens if there is an antenna that picks up the forward and
reflected signals then defines or creates a different environment of a
specific local vector sum of the resulting fields in the elements at
that point in space. This vector sum being the interaction in the
antenna where the forward and reverse direction signals would either add
or subtract according to the phase relationship at the antenna
terminals. You would then sample the result a measurement device.

If you left the transmitter on you would create by superposition a
standing wave between the earth and moon and this could be detected with
an antenna that would pick up both as it moved along between the earth
and moon. This is no different that forward and reflected waves in any
transmission environment. Don't lose sight that the antenna has to pick

up both signals for them to mix.

I got a r7a that is for sale or possible trade for an all mode
transeiver..Let me know what you got..
The receiver works on all bands except 14 and 28 mhz band..The freq display
is all over the place on these two bands..I had planned to send it off for
repair but never got around to it..Probably needs a good alignment..
The radio is in good condition for its age..If you want pics just email me
and I'll send them over..
Best offer over 400.00 or trade..
Going on ebay if no one here wants it..
Please email me for faster reply.
tino257@sbcglobal.net
Thanks Bruce

2166. Re: Antenna Pre-amps MFJ 1020C

Dear Mr. Green,

I own the original MFJ-1020 and the later MFJ-1020B. Both are adequate - no more - when used indoors with the short whip antenna. If you are able to attach 20 feet - any more and you'll overload it - of insulated wire to the back via the RCA jack and can run that wire outside, the performance will improve greatly. The trouble, of course, when traveling, is that you have to open a window (not always possibly in a hotel) to run the wire outside.

It might be worth a try, however, as it is not too expensive. Personally, however, I would recommend trying a Sony AN-LP1 Active Antenna for about the same price. Unfortunately that antenna is available only from a Japanese eBay dealer called Buy From Japan. I do understand, however, that he is extremely reliable and ships very quickly. (I personally have never dealt with him.)

Best,

Joe

Good observation. As an amateur astronomer, I am fond of pointing out to people that all light pollution is wasted energy. Somebody's paying for electricity, converting it to light, and throwing it away, up into the sky.

That is not so much the case with RFI (although, strictly speaking, it is still true; RFI is wasted energy).

- He covered up My Lai when in Vietnam.

David,

(OT) : Getting the My Lai Massacre Facts Straight
http://en.wikipedia.org/wiki/My_Lai

1 - The Truth is that the My Lai Massacre occured on 16 March 1968
during the Presidency of Lyndon B. Johnson and it was the LBJ
Administration that initially Cover-Up the My Lai Massacre.

-ps- John 'ff' Kerry was not in Vietnam in March 1968; and he was
in the US Navy not the US Army; he did not have anything to do
with the My Lai Massacre.

-ps- Bill Clinton was a Student {Deferment} at Georgetown University
in Washington D.C. in 1968 and Interned for Arkansas Senator J.
William Fulbrightand famous for his support of Racial Segregation;
then when to England on a Rhodes Scholarship; and never when
to Vietnam.

2 - The real Investigations of the My Lai Massacre began in March
1969 and the Trails began in September 1969; both occured during
the Presidency of Richard M. Nixon*.
* Nixon Did Not Cover-Up the My Lai Massacre.

3 - The My Lai Massacre became a Major News Story in the USA
in November 1969.

MIKE & MIKI {My Good Canadian Friends :o}

yes, Yes. YES ! - Imagine If . . . there were now 12 Million
Illegal Alien Invaders from Mexico presently Living in Canada.

It would change the National Idendity of Canada forever.

Here is 'my' American Good Neighbor Program for
the "NAFTA" Unification of Canada and Mexico :
[NAFTA = North American Free Travel {Across} America]
I Propose a System of Sealed Non-Stop Express Trains
going from Six (6) US-Mexican Border Cities connecting
directly to Six (6) US-Canadian Border Cities.
* Sealed Non-Stop Trains with Free One-Way Travel
including 3-Boxed Meals etc.
* Each Train carrying about 1000 Illegal Alien Invaders
from Mexico Daily to Canada.
* Run the Trains Three-Times-a-Week Year Round
* Do-the-Math : 1000 x 6 x 3 x 50 = 900,000 New
Canadian Citizens a Year for Ten to Twenty Years.
* US-Mexican Border Import Cities :
San Diego, CA

Yuma, AZ
Nogales, AZ
El Paso, TX
Larado, TX
Brownsville, TX
* US-Canadian Border Export Cities :
Blaine, WA
Sweetgrass, MT
Pimbina, ND
Detoit, MI
Buffalo, NY
Champlain, NY

=PS= The Empty Train Seats on the Return Trip from Canada-to-Mexico : Could be sold to Canadians wanting to visit Mexico and to Mexicans returning to Mexico.

Actually, Roy, most likely the source was a lobbyist working for
iBiquity.

Careful...mentioning his name is like saying 'Betelgieuse'....three
times and he appears.

But to the point...given what we've seen him post here, and the
inconsistencies in some of his claims, I've wondered if that's not
precisely what he's doing.

The page creator needs to learn how to write proper html. Generating web pages with MS powerpoint means they can only be viewed properly with Internet Explorer.

That said, the useful content is minimal.

2195. Re: Antenna Pre-amps MFJ 1020C

> Using an ICOM R-20 Communications Reciever
>
> =-=

the r20 isn't going to be able to take much of an antenna w/out
overloading badly on hf. it simply wasn't designed for that sorta
thing. i've had my r20 overload before on the hf bands with only a
sangean an-60 reel-out wire

on the upside, you can back off the gain with the mfj unit.

much better off taking that money & putting it toward a Kaito/Degen
1103 for your hf listening, or spending more & getting an icf-sw7600GR
for hf.

Controleed access will require the purchase of new HD radios - that is
part of the scam.

Unless HD radios are software ungradable, there willl be a never
ending cycle of having to buy new HD radios - again, part of the scam:

"HD Radio on the Offense"

"But after an investigation of HD Radio units, the stations playing
HD, and the company that owns the technology; and some interviews with
the wonks in DC, it looks like HD Radio is a high-level corporate
scam, a huge carny shill."

A basic web search on wave propagation theory says *nothing* about needing an antenna for the signals to add or cancel. HSD gets it; RHF gets it, but you don't seem to get it. Here are a few references that may help you:

from http://en.wikipedia.org/wiki/Interference

> Theory
>
> The principle of superposition of waves states that the resultant
> displacement at a point is equal to the vector sum of the
> displacements of different waves at that point. If a crest of a wave
> meets a crest of another wave at the same point then the crests
> interfere constructively and the resultant wave amplitude is greater.
> If a crest of a wave meets a trough of another wave then they
> interfere destructively, and the overall amplitude is decreased.

[please note: it just says 'if they meet'. Nothing about needing an antenna.]

> Characteristics

> All waves have common behavior under a number of standard situations.
> All waves can experience the following:
>
> * Reflection - wave direction change from hitting a reflective
> surface

> * Interference - superposition of two waves that come into contact
> with each other (collide)

[Please note it says nothing about colliding in an antenna]

from http://en.wikipedia.org/wiki/Superposition_principle

> First version of the superposition principle
>
> * The phenomenon of interference between waves is based on the
> superposition principle. Waves are usually described by variations in
> some parameter through space and time (for example, height in a
> water wave, pressure in a sound wave, or the electromagnetic field in
> a light wave). The superposition principle says that the net
> variation in that parameter caused by two or more waves traversing
> the same space, is the sum of the variations of that parameter which
> would have been produced by the individual waves separately. (For
> waves described by vector fields, such as electromagnetic waves, the

> smaller amplitude than the component variations; this is called
> destructive interference. Other times, the summed variation will have
> a bigger amplitude than any of the components individually; this is
> called constructive interference.

[Again, please note that -nothing- is said about requiring an antenna.]

from http://antoine.frostburg.edu/chem/senese/101/quantum/glossary.shtml

> Interference. Interfering.

> Compare with constructive interference and destructive interference.
> The amplitudes of waves moving into the same region of space add to
> produce a single resultant wave. The resulting wave can have higher
> or lower amplitude than the component waves. See constructive
> interference* and destructive interference*.

[Again, please note that they refer to 'same region of space', and say nothing of requiring an antenna]

Nothing in wave theory says an 'antenna' is required for interference to occur.

Finally, I originated a polite, on-topic post. You responded with vulgarity, name-calling and rudeness. Hopefully, you will eventually awaken to the fact that your obnoxious behavior hurts no one but yourself and serves only to illustrate your character (or lack thereof).

-You- miss the point, right?

From: http://en.wikipedia.org/wiki/Interference

> Interference is the addition (superposition) of two or more waves
> that results in a new wave pattern.
>
> As most commonly used, the term interference usually refers to the
> interaction of waves which are correlated or coherent with each
> other, either because they come from the same source or because they
> have the same or nearly the same frequency.

Please carefully re-read the part that says: "because they have the same
or nearly the same frequency".

So, yes, that is why we experience QRM (interference) on earth: because
some signals are at the same or nearly the same frequency and that is
why everything else doesn't interfere with everything else -- because
they are *different* frequencies. No antenna needed!

"... Tom Glen, a 21-year-old soldier of the 11th Light Infantry Brigade, wrote a letter to General Creighton Abrams, the new overall commander of U.S. forces in Vietnam, accusing the Americal Division (and other entire units of the U.S. military) of routine and pervasive brutality against Vietnamese civilians. The letter was detailed and its contents echoed complaints received from other soldiers.

Colin Powell, then a 31-year-old Army Major, was charged with investigating the letter, which did not specifically reference My Lai (Glen had limited knowledge of the events there). In his report Powell wrote: "In direct refutation of this portrayal is the fact that relations between America[n] soldiers and the Vietnamese people are excellent." Powell's handling of the assignment was later characterized by some observers as "white-washing" the atrocities of My Lai..."

Kinda figured that, Rickets. You are after all a drug addled 'tard boy who obviously knows little about the SWL/DX hobby.

Don't you think it's time you toddled your sorry ass down the street?

Your error is assuming that echo is modified by the incident wave. The waves pass by each other without interacting.

When you try to observe the waves, using any method, you get the sum of the two signals. So anywhere they 'overlap' you will see interference. This is superposition.

If you look at a point where there is no overlap, you only see one signal. Then you observe no interference.

You seem to be contradicting yourself here. Above, you say they will
"pass by each other without interacting". Below, you say "anywhere they
'overlap' you *will* see interference". [emphasis added].

> When you try to observe the waves, using any method, you get the sum of the
> two signals. So anywhere they 'overlap' you will see interference. This is
> superposition.

I agree -- and if you read what I said above (or tried to say) was
addressing the overlap, which due to superposition, will either
constructively or destructively add; in either case, the 'overlap'
portion of the echo (leading edge) -will- be modified (or degraded or
interfered with, however you want to look at it) by the trailing edge of
the incident signal, and that portion of the echo, when received on
earth, will be perceived as such.

Aren't we really saying the same thing???

Ah, but we also have YOU, an obviously drug addled, mentally challenged, dumbass Canuck!

Don't you think it's time that YOU found a new playground as well? You obviously know little about SWL/DX as well.

A drunk again dxAcehole, Supreme Commander United Michigan Militias
(S.C.U.M.M.) wrote:

> Toddle along, 'tard.

Abusing your narcotics again or just still drunk from last night?
you have a long history of posting insults when you've been drinking.
Get help. There is a twelve step program near you.

There are also Military review boards which will be looking into your
unstable and unacceptable behavior. You aren't fit to lead anybody, as
your maturity level is exceeded by any twelve year old.

The wit and wisdom of Steve Lare, immature US Military Commander with an
alcohol problem:
==========

I ain't white, but unlike you, I dislike no one...

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Cry me a f00kin river.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying
old bastard boy!

I went and bought ammo... I still gots it case them tard boys such as
edweena
gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

As always, your head is up your f00kin ass.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Yes, I am witty, and I am wise!

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company, in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians... ya got a problem with that, boy?

Ya right, suck my dick...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Damn, the Canucky Niggah didn't have a damn thing to say...

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire!

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

Believe it, it's like a dream to be with you again...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

This is a family oriented newsgroup. Posting your anal perversions here
is completely out of line, pervert. The reasons you were asked to leave
the US Navy are a matter for you and your psychologist to discuss.

The fact that you need advertise just exactly WHAT it is you do with
your *ass* shows you haven't changed your deviant ways.

Get help, pervert.

Actually, iBiquity has no lobbyists on the hill... just their on staff that
visits the FCC.

Nothing I've posted can top your claim based on having, once upon a time,
gotten a FORMAT added to a LOCAL buy that it would be easy to get an agency
to change the client DEMOS for a buy...

Hogwash, your claim to have actually *owned* radio stations, your claim to have held a valid *amateur radio license*, and your claim to be *Hispanic* amongst others certainly tops 'em all...

Sweetheart....no one, not even me, said it was easy. I said it was
possible. And it is. It happens every day.

Why? Because the station develops a relationship with the agency.

Orders and purchases are about the product.

SALES, on the other hand, is about relationships.

No one has ever said that building the relationship is easy. But it
IS possible. Because it happens every day. EVERY DAY.

And someone with your experience knows that.

And for those of you in Rio Linda, the above is an example of one of
those inconsistencies to which I referred.

David,

OK Point # 1 from your own citation states :
"routine and pervasive brutality against Vietnamese civilians."

OK Point # 2 from your own citation states :
"the letter, which did not specifically reference My Lai"

DOH ! - Followed by Point # 3 from your own citation then claims :
"white-washing the atrocities of My Lai"

The Facts Do Not Add Up -except- To Show that the Writer had
an Agenda and Slanted the Conclusion to BASH Colin Powell.

The Democrats and the Liberal Media attempting to Blame
Colin Powell for the LBJ Administration''s War Crimes.

earth-to-david a truth/reality check is in order ~ RHF

. . . . . .

(OT) : Once Again - Getting the My Lai Massacre Facts Straight
http://en.wikipedia.org/wiki/My_Lai

1 - The Truth is that the My Lai Massacre occured on 16 March 1968
during the Presidency of Lyndon B. Johnson and it was the LBJ
Administration that initially Cover-Up the My Lai Massacre.

2 - The real Investigations of the My Lai Massacre began in March
1969 and the Trails began in September 1969; both occured during
the Presidency of Richard M. Nixon*.
* Nixon Did Not Cover-Up the My Lai Massacre.

3 - The My Lai Massacre became a Major News Story in the USA
in November 1969.

the true be told ~ RHF

Wasn't John 'Fraud' Kerry suspected of shooting someone in the back? And then later going back to have someone re-create some of his 'heroic' actions on film?

Wait until they shut down all the ports from Vancouver to Coronado and
shift all the Red Chinese imports to Mexico, where it's OK to shoot the
union organizers. They're building a truck highway from Laredo to
Canada in secret.

Do you thank war criminals when they follow illegal orders? I don't
support the troops when they cooperate with murdererous leadership.

MIKE & MIKI {My Good Canadian Friends :o}

yes, Yes. YES ! - Imagine If . . . there were now 12 Million
Illegal Alien Invaders from Mexico presently Living in Canada.

It would change the National Idendity of Canada forever.

Here is 'my' American Good Neighbor Program for
the "NAFTA" Unification of Canada and Mexico :
[NAFTA = North American Free Travel {Across} America]
I Propose a System of Sealed Non-Stop Express Trains
going from Six (6) US-Mexican Border Cities connecting
directly to Six (6) US-Canadian Border Cities.
* Sealed Non-Stop Trains with Free One-Way Travel
including 3-Boxed Meals etc.
* Each Train carrying about 1000 Illegal Alien Invaders
from Mexico Daily to Canada.
* Run the Trains Three-Times-a-Week Year Round
* Do-the-Math : 1000 x 6 x 3 x 50 = 900,000 New

Canadian Citizens a Year for Ten to Twenty Years.
* US-Mexican Border Import Cities :
San Diego, CA
Yuma, AZ
Nogales, AZ
El Paso, TX
Larado, TX
Brownsville, TX
* US-Canadian Border Export Cities :
Blaine, WA
Sweetgrass, MT
Pimbina, ND
Detoit, MI
Buffalo, NY
Champlain, NY

=PS= The Empty Train Seats on the Return Trip from
Canada-to-Mexico : Could be sold to Canadians wanting
to visit Mexico and to Mexicans returning to Mexico.

Bienvenido y Hola a Canad&#65533; Amigos ~ RHF

Add on a program whereby they would be channeled to
a reception center and automatically shipped to Afghanistan
and I would be interested. miki.
.

The man served with Honour. He's earned his pension.

And if I'm reading the subtext correctly, he's also investing his money. If he's building anything through his investments, his pension and his investment earnings can afford him a rather comfortable life, in spite of his disability.

Interesting that you should take this position, given that one of the common anti capitalist rants is that pensions are being denied loyal employees.

So, you're saying that corporate employees are entitled to live off a pension, but military employees are not?

How.....typically Canadian.

Last February, I sold those three old vans and a 1986 Ford Crown Victoria LTD car (I used to call that car my Pimpmobile) that I used to own to Bill Short in Summit,Mississippi.Bill Short and an elderly guy they call Uncle Charley (they both live in Summit, Uncle Charley is Bill Short's buddy, Uncle Charley only came along with Bill Short for the ride) and two local Jackson buddies of mine came over here with their trucks and trailers to help load those vehicles up.

A few years ago, somebody gave me a blow up doll for Christmas.(I never used that doll) I showed my doll to Uncle Charley.A few months ago, a buddy asked me if I still have my blow up doll.He said Uncle Charley wants it.Uncle Charley must be at least eighty years old or older, he has to use a walking cane when he walks.

It sounds like the range function for the low band and high band VCOs is not functioning. It could also need cleaning of all of those Molex connectors on the DR-7 board. If you do get it repaired by John Kriner, this radio will go from a "parts unit" to something that will bring you over 1000 dollars. Right now, your current price will be about what you might get. If you do get it repaired, you will still be able to get a transceiver and have money left over.

Hey guys, if it's not Mexico, or Canada or anyone else you think you can hate and get away with it then why don't you try one of the big boys and run them down. China, they're taking all your jobs and ruining your economy. Russia, ready to pounce on anyone who come near their soil. What's the matter boys, afraid of real force that can reckon with ya. Hell start running down either of these, please and we'll stand back and watch what happens. Canadians don't shit on you, you shit on yourselves. Mexicans are just looking for a better life as your ancestors did. Not their fault "your" government is so easy on them. You have a mouth to speak with and a brain to tell it what to say. Canadians are your comrades in arms and they sure can fight as well as any of you's and do. They also give their lives as Americans do. Makes it a little harder when the enemy is both in front of and behind you. Get in the game boys, or we all loose.

It sounds like you are having cross-modulation in the 1st mixer. Some RF selectivity ahead of that mixer should minimize the problem. Are you connecting any kind of extra wire to the whip antenna? Are you using the whip antenna only?
I have experimented with the Radio Shack passive tuned loop, using the PAL antenna input. No matter which way I have the loop aimed, and whether or not I have the loop antenna close to or far away from the radio, I do hear some birdies that appear to come from the uP. Since this doesn't occur when using the whip antenna and since the distance of the loop antenna from the radio doesn't make any difference with this noise, it appears to be from conducted emissions at the circuit board.
The designer of this radio chose to have the external DC jack located right next to the external antenna connector. This is the worst thing that could have been done, since the return currents from the noisy control circuitry are going to be modulating the ground system in the radio. What this means is that the PAL antenna connector is going to have a noisy ground shell.
I haven't tried this external connector with a long wire antenna, and I haven't tried it with batteries. Batteries may eliminate the problem, unless the voltage regulators in this area of the radio are used, even on battery power.
Whenever a circuit board layout is done, the power supply return should always be as far away from the sensitive, small signal circuits as possible. Too bad this wasn't done with this design. Overall, I do like the radio, but I may have to use a ferrite choke in series with the ground return on the PAL connector to solve this problem. Maybe, after I finish the other 10,000 projects I am already working on!

Hey guys, if it's not Mexico, or Canada or anyone else you think you can hate and get away with it then why don't you try one of the big boys and run them down. China, they're taking all your jobs and ruining your economy. Russia, ready to pounce on anyone who come near their soil. What's the matter boys, afraid of real force that can reckon with ya. Hell start running down either of these, please and we'll stand back and watch what happens. Canadians don't shit on you, you shit on yourselves. Mexicans are just looking for a better life as your ancestors did. Not their fault "your" government is so easy on them. You have a mouth to speak with and a brain to tell it what to say. Canadians are your comrades in arms and they sure can fight as well as any of you's and do. They also give their lives as Americans do. Makes it a little harder when the enemy is both in front of and behind you. Get in the game boys, or we all loose.

Source record: 135136

Need some ideas for a good AM/FM/SW "Fringe Area" receiver with good selectivity and sensitivity for rural area reception.
Must be 120VAC power source. Battery power can be optional but not necessary. Can be table or portable.
I've been looking at the CC RadioPlus, GE SuperRadio III, Radio Shack Optimus and DX Series, Kaito 1100 series and others. Each has a downside and some a significant downside. As far as price range goes, around $300 would be the max.
Your input would be greatly appreciated.

I owned 12 operating stations, "bought" a ham license (there was no exam
for anyone, just a fee) and am, by US definition, Hispanic as that is my
culture, the one I live every day.

> Sweetheart....no one, not even me, said it was easy. I said it was
> possible. And it is. It happens every day.

I spoke with execs from a major national rep firm, and they say, just as I
do, that getting an agency to change a demo is next to impossible. One of
them, a few weeks ago in NYC, said they could not even remember the last
time they heard of it happening.

What stations do is adjust pricing so that whatever amount of listening in
the target demo that the station has is competitive with the agency goal for
that demo. The spillage is free.
>
> Why? Because the station develops a relationship with the agency.

Agencies don't set demos. The client does, and the demo is usually based on
ROI.and product design, boh of which are inmutable.
>
> SALES, on the other hand, is about relationships.

Relationships can get you considered if your are 7th in a demo and the buy
is only five deep. They can not change the demo spec from the client

>
> No one has ever said that building the relationship is easy. But it IS
> possible. Because it happens every day. EVERY DAY.
>
>
> And someone with your experience knows that.
>
> And for those of you in Rio Linda, the above is an example of one of
> those inconsistencies to which I referred.

When my experience, as GSM and NSM as well as GM, our managers' experience and our rep's experience all say that changing a demo spec happens once in a blue moon, I believe them more than your single anecdote. What you describe seldom if ever happens, even with the best relationships as the agency relationship with the client is not going to be sacrificed for a friendship with a radio station when radio is and has been a small part of the average client's budget.

I am certainly not going to defend DXass, but pensions are earned retirement
benefits. They are intended to support people after they have done a useful
life's work.

No it is not the same. The waves do not interact with each other. It is the ability to observe them that is the problem. Where they overlap you are seeing the sum of two independent waves. When the wave moves beyond the overlap, it has not been changed. Outside of the area of the overlap, there

is no evidence of the prior overlapping.

Hi,
I bought a Superradio III and live in SE Florida. I regularly pick up
WBZ, Boston, the NYC stations, WABC, WCBS, WINS, and a lot of the
Philly stations, WPHT and KYW. I also pick up WBBM Chicago and all
stations in between. It was $49.95 at ACE Hardware.

What was that Lee Marvin said to Keith Carradine in The Emperor of the North movie when Lee threw Keith off of that Train? Go on up to Canada! They will throw you a piece of meat.You are not fit to ride this Train!

Lee Marvin was in the U.S.Marine Corps.He was a Scout Sniper, in 21 landings.He was injured by Japanese fire which injured his sciatic nerve.He wound up as a plumber in New York City.One of the movie cast people got sick when a movie was being filmed.They asked Lee to take his place in the movie.And the rest is History.

- Wait until they shut down all the ports from Vancouver to
- Coronado and shift all the Red Chinese imports to Mexico,

waiting, Waiting. WAITING !

- where it's OK to shoot the union organizers.

David - Where Is Your Proof ?

- They're building a truck highway from Laredo to Canada in secret.

Wow Really ! - OK so they must be building it at Night so no one
can see it being built. Then they Camouflage it during the Day so
no one can see it in the Light of Day Plus they have a 'secret' work
force from China doing all the construction work on it.

For AM-FM-SW I highly recommend the CCRadio Plus or an equivalent under another brand. Sensitivity on AM, FM, and SW is excellent, selectivity is good on all bands. Sound is better than all others you listed except the SuperRadio. However, the SuperRadio does NOT have SW. I believe you would find the CCRadio Plus better on AM and FM than the SuperRadio plus. I get good FM reception on the CCRadio Plus that I can't get worth listening on any other radio in my home. It's a great receiver.

Sorry, I respectfully suggest you might be incorrect here. In your second paragraph, you say "So anywhere they 'overlap' you will see interference.This is superposition". I agree with that.

I think all of us agree that because of the timing of the signal, the last part of the incident wave will 'overlap' the leading edge of the echo, just starting to head back to earth. Per YOUR statement above, they are overlapping and thus will 'interfere'. (and by 'interfere', I mean your 'super positioning' will cause the leading edge of the echo to be 'distorted', either because of constructive or destructive addition. This distorted front edge of the echo will continue on to earth along with the un-molested last part of the echo. Once the overlap/super positioning has created the distortion (or interference or whatever you want to call it), it will stay there. How can you 'UN-ring' a bell that has been rung?

Yep, I own and drive my big old lonnng body, taller than I am 1978 Dodge van.I would drive my 1948 Willys Jeep, but I am too fat to get behind the steering wheel and those seats don't slide back either, they are jam up agains't the rear wheels wells.I certainly am not going to be driving my 1914 Ford T Model Runabout Roadster car to the food store and to the Tobacco Market discount store and to the Animal Health Products store for doggy's Pro Pac www.propacpetfood.com dog food.Those nitwits around here drive crazy on the roads.I won't ride my 1961 made in Germany Hercules Moped, (it has bicycle pedals on it) 16 original miles on my Moped, wayyyyyyyy too slow.

That 1990 Chevroet RV van the guy who lives behind me has for sale, for $1,100? That damn thing has throttle body fuel injection, I don't want that piece of crap.I know how to work on carburetors, I don't want anything to do with fuel injection.You want to buy it? I can give you his phone number.His last name is Harris.Doggy is doing just fine, sleeping under the wool blanket on her couch.

If you can master correct, expressive, Spanish, write to my partner in several of the radio stations (Guayaquil 660 and 1140 Cuenca), Lic. Jaime Nebot Sadii. He is now the mayor of Guayaquil, and can be contacted at city hall there... don't take my word for it, look up his name and the alcaldia in Guayaquil to get confirmation he is indeed the mayor and the address of the city hall.

Here is a start: http://www.guayaquil.gov.ec/19.gye

He can certainly tell you he invited my partnership of failing Radio Carrousel 660 in Guayaquil because of my success with my stations in Quito and Ambato... 5 FM allocations in Quito, 3 AM's (at the time... another was added later) and stations, at the time, under construction at Bahia de Caraquez and Lago Agrio.

All those stations were licensed to corporations that were, in turn owned by Radio Musical, Cia. Ltda., 100% of whose shares were in my name.

As to the ham license, they basically gave them away in boxes of Corn Flakes there. There was no license exam, just a fee. Since, in a nation where the average family income was, in 1965, less than $1000 a year, anyone who could afford a rig was given a license.

Look up the definition of "Hispanic" on the Census' website; anyone who is culturally Hispanic is Hispanic.

BP - Seems Like IAPIAT - You Would Have To Be . . .
On The Surface of the Moon to Experience this 'Overlap'.

Down here on Earth you simple get two separate Signals
that come from two different Sources along two separate
Paths to your Earth bound Radio {Location}.

lets talk about reality not iapiat ~ RHF
.

You can't do s**t cause you're a fraudulent little prancing 'tard boy.

If you could do anything, like any good little 'tard boy, you'd have threatened
to sue me by now.

You can't. Why, because you're a phoney baloney little two bit 'tard boy!

Go give your boyfriend a blow job!

Whip only, I don't have the proper adapter yet to connect the external
antenna.

I have noticed that touching the whip will increase the loudness of the
station causing the problem.

By accident I found out that turning off DX mode eliminates the problem.

The operative phrase here is "next to".

>One of
> them, a few weeks ago in NYC, said they could not even remember the last
> time they heard of it happening.

"I can't remember it happening" is about the lamest possible argument
for "it didn't/cannot happen". You would benefit from a course in
elementary logic.

Actually, it does happen with some regularity.

I can almost believe this, since this is the only way you could get a
ham license.

There was no license exam, just a fee. Since, in a nation where the
> average family income was, in 1965, less than $1000 a year, anyone who could

Another pathetic appeal to "authority". Yawn.

Heh - I was showing my granddaughter how to play with her full sized
metal slinky last night. Shortwave never crossed my mind. They do
make a decent portable antenna.

Whip only, I don't have the proper adapter yet to connect the external
antenna.

I have noticed that touching the whip will increase the loudness of the
station causing the problem.

By accident I found out that turning off DX mode eliminates the problem.

> be 'distorted', either because of constructive or destructive addition.

The overlap is -not- modifying either wave. It is the ability to observe
that leads to the perception of distortion. Perhaps some poor analogies
will help.

1) Two ships are traveling towards each other on the ocean. You see them as
silhouettes. As they pass each other, the silhouette you see is the
combination of the two. Your view is therefore distorted. Once they pass,
there is no overlap and each is unchanged.

2) Take two light beams, one red and another green. Cross them so they form
an "X" and in the distance they shine on a wall. The red beam will cause a
red spot to appear on the wall, the green beam will form a green spot on
the wall. If you hold a piece of paper in the beams where they cross you
will see a different color. This is because of the superposition of the two
beams. They pass through this overlapping region and are unchanged.

In both cases, you see something different at the overlap, but the original
items are unchanged when they leave the overlapping region.

> This distorted front edge of the echo will continue on to earth along
> with the un-molested last part of the echo. Once the overlap/super
> positioning has created the distortion (or interference or whatever you
> want to call it), it will stay there.

You have to understand the meaning of the words I used. Note I used the
phrase "try to observe the waves". The problem is that by trying to look at
what is going on at a specific location, you don't see the bigger picture.
Looking inside the overlap you appear to see a distorted wave when you are
actually looking at two independent waves that get added together by
whatever you are using to observe them. Once they get past each other they
are unchanged.

It is not that the waves are changed. The limitation is in your ability to
observe them.

> How can you 'UN-ring' a bell that
> has been rung?

That is a totally different thing. When you ring a bell you are applying a force to the bell. You are interacting with the bell. Overlapping waves are not interacting with each other.

For my own purposes, I do not have to. I have a job, and all this turned up on a background check years ago.And, generally, it is the person who makes an accusation who has to prove that what they allege is indeed fact. You know, innocent until proven guilty. Since our village lush can't prove what he says, the absence of any contrary evidence speaks for itself.

To assist the drunk-every-weekend DXass, I have provided countless names. Dozens of employees from the time I owned and managed the stations, associates and acquaintances, etc. all of whom knew I owned the stations. Official documents are doubtless no longer in existence in a nation that only recently computerized the licensing and operation of radio stations, but many many people witnessed my ownership and can attest to same. All it takes for DXass is to make a couple of contacts and he will find, conclusively, that I owned and operated a dozen stations, starting with HCRM1 in Quito which signed on 12/5/64 to become South America's first Top 40 music station.

In fact. one contact I mentioned early on is Betty Pino, former PD and now mid-day personality of WAMR, Miami's #1 radio station. It's easy to find the phone number and call and ask who I am, since Betty was a freelance announcer in Quito in 1964 and she frequently visited my stations to do paid voiceover work. And now she is in Miami, as she has been since 1972, working for local radio stations... who better to tell DXass that he is 100% wrong. How about starting there? Go for it... I chuckle at the embarrassment you will suffer, though.

Now, that is actionable. But why spend thousands on an attorney when the
chances of winning a judgment that would be of any interest are minimal to
non-existent?

<<The operative phrase here is "next to".

That means "so unlikely as to be something the average national or agency
seller will never see."

In fact, trying to change an agency client's demo fits with the definition
of insanity that says "doing the same thing over and over and over again
hoping for a different outcome."

>One of
> them, a few weeks ago in NYC, said they could not even remember the last
> time they heard of it happening.

<<"I can't remember it happening" is about the lamest possible argument
<<for "it didn't/cannot happen". You would benefit from a course in
<<elementary logic.

I asked the question of three executives of a national sales rep who
together had about 100 years of national agency sales experience among them.
If they could not remember a case, it means that, if it had occured, it was
so long ago as to be irrelevant in a discussion today.

> Relationships can get you considered if your are 7th in a demo and the buy
> is only five deep. They can not change the demo spec from the client

<<Sure they can.

How many agency calls have you made in the media centers? None, I suspect.

<Another pathetic appeal to "authority". Yawn.

Funny that a person who very recently lied about interference to "all" NYC AM and FM stations should set themselves up as an authority on morals and behaviour.

I drove all over NYC and the area last week, and no station had any interference in its protected coverage area. From none to "all" is a far piece of road, one that is paved with your lies.

I gave you lots of names of people who knew the operation, and who knew who owned it.

You and I both know that paperwork from nearly 50 years ago is not going to exist. No radio station in the US would have paperwork that old, either... most save only the documents from the most recent license renewal period, and nothing more. Tax returns, as another example, are not required under most cases to be saved for more than 3 years after the filing date.

I gave the name of a very famous Hispanic talent known all over the US, Betty Pino. She has known me for 45 years, and definitely knows the history of my stations. Call her. Embarrass yourself.

There is an interesting thing, which might even be understandable in your
drunken stupor... it's easy to prove there is no interference to any NYC
station inside its protected contour. Just ask any NYC chief engineer or DoE
to ask at the next SBE meeting!

There is no proof of your claims against me. Next?

Obcession? You're so hung up on it, you can't even spell it!

Bottom line, you got no daughter who is a lawyer! That's because you're a fucking liar!

The letter from your *daughter* oughta be pretty much free, shouldn't it,
prancer?

Like so many others I had the pleasure to serve with, we came from all walks of life. Many of us had never seen the sea, we came from everywhere, with but one goal, to serve our great nation, and to follow in the footsteps of so many who had preceded us.

I won't pretend to speak for all of them, but I'm certain that most were grateful to be of service to our nation.

And in the end, it was a pleasure to serve with them...

Of that I will always be proud.

No, what's funny is that you're too much of a coward to admit the
truth. Except it isn't funny so much as pathetic.

>
> I drove all over NYC and the area last week, and no station had any

That's funny because I live in NYC and the interference is widespread.
Sounds like your an awfully bad liar or an awfully unobservant
tourist.

I told you English is not the language I use the most. That sort of proves it.

> Bottom line, you got no daughter who is a lawyer! That's because you're a
> fucking liar!

Contact the PR Bar Association (called the Colegio de Abogados de Puerto Rico at , ask if Jennifer Gleason Altieri is licensed before the bar in Puerto Rico. You will find that she is registered as "JENNIFER GLEASON ALTIERI (15569)" and the 15569 is her license number.

Or, you can go online to http://www.capr.org/ the website of the PR Bar Association

1. Click "Directorio de Abogados) (Lawyer directory) on the Left.
2. Enter "Jennifer Gleason" in the search field labled "nombre" or name.
3. Click "buscar" and the search will be initiated.
4. You will see her name and the registration number.

At that point, you will be proven 100% wrong. As usual.

You can also go to http://www.bnabooks.com/awards/winners01.htm and look for Jennifer Gleason of the University of PR Law School who won a national award for labor law studies.

Thish link, in the 4th paragraph, refers to her as the director of the legal department of the PR Department of Education http://www.losmafu.com/news/la-directora-maleante/ The Department of Instruction operates all public schools for the entire Commonwealth of Puerto Rico, where there are no local school systems.

This one shows when she passed the bar exam in San Juan http://www.tribunalpr.org/junta/aprobadosmunicipios.html

You have my permission to go and have a double. Toast your ignorance.

Body handling: HTML body converted to readable text

RHF:
The original Pledge was modified by polititians after the 'commie scares' of the late 50s. They reasoned that the commies would never say the words 'under God' and would therefore be found out. Yeah those Russian agents woudl never lie, right? The pledge of allegiance to our country was changed in a moronic attempt to flush out hidden commies.

As far as the rest of your post: as usual it makes little sense. Maybe you can explain it to us?

BD - The Real Pledge of Allegiance ! {Circa 1954}
http://en.wikipedia.org/wiki/Pledge_of_Allegiance
By God . . . Is There Any Other Kind ? ~ RHF
.
Or do you mean : The New Democratic Pledge of Allegiance
to the One World Order of the United Nations of Earth
http://en.wikipedia.org/wiki/Pledge_of_Allegiance

Pledge of Allegiance to the "UN" One World Flag Above All :

"I Pledge Allegiance to the Flag of the United Nations of Earth;

and to the Global People's Socialist Republic for which it Imposes;

One Planet under Strict Environmental Military & Scientific Control;

Indivisible from Exploitation, Coruption, Sickness and Hunger;

with Perfect Liberty for The Peoples Elite Leaders and Rulers;

and the Rich Rewards of Justice for All Who Are Above The Laws."

it's a 'vision' thing ~ RHF -ibid-
.

<No, what's funny is that you're too much of a coward to admit the
<truth. Except it isn't funny so much as pathetic.

There is no interference. The collective value of all the NYC market radio stations runs, likely about $3 to $5 billion dollars, so the owners would be very distressed to find any evidence of any interference with their stations.

> I drove all over NYC and the area last week, and no station had any
> interference in its protected coverage area. From none to "all" is a far
> piece of road, one that is paved with your lies.

<That's funny because I live in NYC and the interference is widespread.
<Sounds like your an awfully bad liar or an awfully unobservant
<t<ourist.

There is no evidence at all. I was at our mid-town offices, our Teaneck office, and even our site on LA, as well as at JFK for hours. No interference all last week. The second week of December was about the same, as was the week before November, etc., etc. I go to NY 8 to 10 times a year, and I would notice if I could not hear any of our stations due to interference. Or our Chief Engineer would have mentioned it to me...

Hardly. I have been calling on agencies since the 60's, and was a GSM from
1986 to 1992. General managers also sell, and I was a GM for many many
years, too.

Contact the PR Bar Association (called the Colegio de Abogados de Puerto Rico at , ask if Jennifer Gleason Altieri is licensed before the bar in Puerto Rico. You will find that she is registered as "JENNIFER GLEASON ALTIERI (15569)" and the 15569 is her license number.

Or, you can go online to http://www.capr.org/ the website of the PR Bar Association

1. Click "Directorio de Abogados) (Lawyer directory) on the Left.
2. Enter "Jennifer Gleason" in the search field labled "nombre" or name.
3. Click "buscar" and the search will be initiated.
4. You will see her name and the registration number.

At that point, you will be proven 100% wrong. As usual.

You can also go to http://www.bnabooks.com/awards/winners01.htm and look for Jennifer Gleason of the University of PR Law School who won a national award for labor law studies.

Thish link, in the 4th paragraph, refers to her as the director of the legal department of the PR Department of Education
http://www.losmafu.com/news/la-directora-maleante/ The Department of Instruction operates all public schools for the entire Commonwealth of Puerto Rico, where there are no local school systems.

This one shows when she passed the bar exam in San Juan
http://www.tribunalpr.org/junta/aprobadosmunicipios.html

You have my permission to go and have a double. Toast your ignorance.

I told you English is not the language I use the most. That sort of proves it.

> Bottom line, you got no daughter who is a lawyer! That's because you're a
> fucking liar!

Contact the PR Bar Association (called the Colegio de Abogados de Puerto Rico by phone, ask if Jennifer Gleason Altieri is licensed before the bar in Puerto Rico. You will find that she is registered as "JENNIFER GLEASON ALTIERI (15569)" and the 15569 is her license number.

Or, you can go online to http://www.capr.org/ the website of the PR Bar Association

1. Click "Directorio de Abogados) (Lawyer directory) on the Left.
2. Enter "Jennifer Gleason" in the search field labled "nombre" or name.
3. Click "buscar" and the search will be initiated.
4. You will see her name and the registration number.

At that point, you will be proven 100% wrong. As usual.

You can also go to http://www.bnabooks.com/awards/winners01.htm and look for Jennifer Gleason of the University of PR Law School who won a national award for labor law studies.

This link, in the 4th paragraph, refers to her as the director of the legal department of the PR Department of Education http://www.losmafu.com/news/la-directora-maleante/ The Department of Instruction operates all public schools for the entire Commonwealth of Puerto Rico, where there are no local school systems.

This one shows when she passed the bar exam in San Juan http://www.tribunalpr.org/junta/aprobadosmunicipios.html

You have my permission to go and have a double of whatever it is you consume. Toast your ignorance.

Never did. My daughter in Ecuador works in advertising and radio. Always has. You can not find anything different that I have said, although in your end-of-weekend stupor, you may make something up.

And, of course, you said "you have got not daughter who is a lawyer!" with no restriction on place of birth or residence. And you have been proven 100% wrong. I have a daughter who is a lawyer, and this one is very easy to prove.

Here is, 100% verifiable, proof that you are the liar I have stated all along you were. A drunk liar. A misanthrope.

She will probably find the "cunt" reference amusing. And file it away....

You must have been listening to internet radio or something. The
interference was awful all last week, and again today it was just
terrible. It's a shame.

I would agree with RHF that the Kaito KA2100 / Redsun RP2100 (or its
C. Crane variant) is probably a good way to go, given user opinions of
this set. Alternately, going on the high side of your budget, the
forthcoming Grundig Satellit 750 could prove interesting, if you're
prepared to wait a bit (due out in mid-March).

I think I just found a link to her "firm":

http://www.bunnyranch.com/

You fucking drunk maniac, I just gave you a link that shows her to be the head of the legal department of the PR Department of Instruction. She is not in private practice, something that is true of about 60% of all attorneys. There can be no "firm letterhead" nor can a person in government service engage in private practice; in fact, she has litigation in San Juan for damage... and had to use a friend as attorney.

The government of PR is not a firm. There are enough links I provided to
show she not only exists, but is a practicing attorney.

Heck, if I was still in Ojai I'd come and see ya.

Need to see my cousin in Mill Valley, and try to get her straight!

Why should I? I can go to Columbia and see where actual listeners of
stations report tuning to them in the county and do it in a single morning;
Arbitron cares not a whit whether listeners can tune, with difficulty, a
station... they care if they report listening.

Source record: 135223

I have to decided to part with some of my best Collins gear.
I have a CCA Excellent Collins 51S-1 Receive. I purchased it
years ago from the original owner in the Original Box with packing and the
cloth accessories bag. It also has the original manual. I still have the
box, manual,and accessories and bag. It is an early Winged Emblem version
with the white meter face. It works perfectly and I don't believe that it
has been used much at all. I have used it maybe 10 hours total over the
years. It still looks new. I can send pictures. Price is $2200 shipped in
lower 48. Thanks, Charlie Hugg, K5MBX CCA # 307

You provided links showing that someone with a certain name exists.
That's about as far as it goes, Tardo. Now, time for your dose of

HGH....

There is no need to call somebody he does not know a "kunt" or a "bitch" and
so on. He's just drunk, so I guess he was a nasty piece of work in the
service... probably why he is not there any more. .

-
- I would agree with RHF that the Kaito KA2100 / Redsun RP2100
- (or its C. Crane variant) is probably a good way to go, given user
- opinions of this set.
-
- Alternately, going on the high side of your budget, the forthcoming
- Grundig Satellit 750 could prove interesting, if you're prepared to
- wait a bit (due out in mid-March).
- http://www.universal-radio.com/catalog/portable/0750.html
-

MUMmm - A Grundig Satellit 750 Portable Radio - yummy ~ RHF
.

On Monday morning, I recommend you sober up and go see Alcoholics Anonymous. Your obnoxious and senseless postings are bothering everyone here.

The Collected Wit and Wisdom of dxAce (updated Daily):

==========

I ain't white, but unlike you, I dislike no one...

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

Hey, little pussy boy, we spell it "cunt" out here, just like I think I spelled it originally, boy.

New history will be made when we crush CanaDuh!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

I just asked you to have the cunt send me a letter, boy.

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

get your bitch *daughter* to send me a letter

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Have the bitch send me a letter on her firms letterhead, boy.

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Yes, I am witty, and I am wise!

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters. That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians... ya got a problem with that, boy?

Ya right, suck my dick...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

You dumb sand niggers (sorry, I categorize ya all this way) need to
understand that you need to get your collective shit together...

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire!

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake
Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

Believe it, it's like a dream to be with you again...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

The Collected Wit and Wisdom of dxAce (updated Daily):

==========

I ain't white, but unlike you, I dislike no one...

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

Lying 'tard boy, much like the other debutante, malcontent, faux boys
who inhabit the lace we call RRS.

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

New history will be made when we crush CanaDuh!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

I just asked you to have the cunt send me a letter, boy.

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

get your bitch *daughter* to send me a letter

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Have the bitch send me a letter on her firms letterhead, boy.

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Yes, I am witty, and I am wise!

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters. That
is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer
Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians... ya got a problem with that, boy?

Ya right, suck my dick...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire!

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

Believe it, it's like a dream to be with you again...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

David Eduardo- 42
David nothing@nowhere.org - 47
RHF - 146

RHF was all set to be the clear winner this week with 146 clueless posts
but as luck would have it, Eduardo has a posting orgasm this very night.
Although the number was far under the most prolific Troll this week the
clueless quality of Eduardo's posts yet again arguing about his identity
far outshone those of the cut, copy, and past variety.

Therefore, now this weekï¿½s clueless poster boy award goes to the alias
David Eduardo.

For DRM decoding. (if other things are possible (weather maps eg), point me to the software!)

I have this kind of radio, bought it at Mediamarkt.be .
http://www.ccrane.com/radios/shortwave-radios/ccradio-sw.aspx
They have it in Brussels/Antwerp for 69 euro, and they also have the S350 Deluxe for 119 euros, which is older and has less features ;-)
(they also sell Eton E1 and E100 in Antwerp).

Can I connect the IF output directly to the computers audio input, or do I need something in between??

Thanks!

Thanks RHF! Excuse the top posting, but your information is utterly magnificent...kudos.

My thought on the MFJ 1020C active pre-amp is that such is self contained, easy to pack, has the appropriate controls, comes with a vertical telescoping mast 50+ inches and looks like it would be easy to setup and use.

Wires are nice, but messy on luggage and sometimes airport security get curious.

So the question is does the MFJ 1020C do the job.

If you really think that, you are a miserable excuse for a human being and a disgrace for all those that wore uniforms before and after you.

I gave you a half dozen links showing what my daughter does, when she passed the bar, a report that shows her as the director of the legal department of a very large Commonwealth government entity, and even indication of her scholarship awards.

You reply by asking for a letter from her "law firm" and call her a bitch and a cunt.

1. An attorney in the employ of the government can not be employed by a law firm.

2. You are disgusting for calling someone you do not know by such vile names. Call me anything you want... but you should not call others those names.
3. You have had something you called a lie conclusively proven to the otherwise, yet you bray on like a donkey. Donkeys are cute on Shrek; elsewhere they are just a common ass... or DXass.
4. It's amazing that you can not recognize the truth, even when placed on a plate before you. It scares me that you have thousands of rounds of ammo, and brag about it. Do the local police know that you are have a home armory?

As I said before, those who participate in the radio ratings, year after
year, thousands after thousands just in your county, don't find what you
consider to be listenable to be that, and they don't listen in droves.

Considering Steve's drunken rant in 30 or so little pieces tonight, it's
likely that many of his "on topic posts" have to do with DX done by others.
How a drunk can turn a radio dial I don't know.

-
- Thanks RHF! Excuse the top posting, but your information
- is utterly magnificent...kudos.
-
- My thought on the MFJ 1020C active pre-amp is that such
- is self contained, easy to pack, has the appropriate controls,
- comes with a vertical telescoping mast 50+ inches and looks
- like it would be easy to setup and use.
-
- Wires are nice, but messy on luggage and sometimes
- airport security get curious.
-
- So the question is does the MFJ 1020C do the job.
-
- ========================

SD GREEN,

Yes the MFJ-1020C could "Do The Job" as you have defined it.

You have an RF Gain Control and Attenuator built into the
Icom IC-R20 and a Gain Control built into the MFJ-1020C.

Active Antenna Signal Overload - Back-Off on them to reduce
and prevent any Signal Overload of the Radio.

Remember - That you have to Tune both the Radio and the
Active Antenna to the same Frequency to use them properly.

Wide-Band Scanner Receivers -and- Wide-Band Active Antennas
- = Synergy & Utility = -

TIP - With a Scanning Wideband Radio you may find a Wideband
Active Antenna the better 'choice' versus an Active Antenna that
you will be Required to Re-Tune with each Frequency change.

Two Wide-Band Active Antennas :

You may want to consider the MFJ-1022 Wideband Active
http://www.universal-radio.com/catalog/sw_ant/3109.html
Indoor Receiving Antenna : Coverage 300 kHz to 200 MHz
* Small Compact and Designed to be used Indoors
* "No" Tuning Required
* Adjust the Radio's RF Gain Control and Attenuator
to reduce and prevent Signal Overload

Another 'alternative' is the Kaito KA35 Active MW/SW Antenna
http://www.universal-radio.com/catalog/sw_ant/4835.html
http://cgi.ebay.com/_W0QQitemZ250194482431
* Small Compact and Designed to be used Indoors
* "No" Tuning Required
* Adjust the Radio's RF Gain Control and Attenuator
to reduce and prevent Signal Overload
+ Two Antenna Elements Coverage : 100 kHz to 30 MHz
+ + AM/MW Ferrite Rod {Directional} LW+MW+SW>3MHz
+ + Shortwave Whip {Non-Directional} SW 3MHz~ 30 MHz

I'll have to say I like Steve and have talked to him back channel a few times over the years. But this 'talk' is a 'tad' too much IMO. But even worse is the fact that the poster 'shared' this with the group. That was intended (I think) just for you- there is no reason to post this on RRS IMO. Sheesh- why don't you all meet in an abandoned lot or behind a high school where there is no cops and no weapons and settle it once and for all hand to hand. If there was someone (either of you) that kept on me and I was dumb enough to go along with it (which I'm not) and I had that bad of feelings.....it sounds to me like this needs to be settled face to face instead of the keyboard, just my take. If it continues IMO both people are just as cowardly- shoot Steve- take care of this crap. I would (I think) if someone kept on me. It'd be tempting- put it that way. ;-)

I've got that 4.8MHz signal too. It reads s5, but there is
considerable background noise on it. Also, I use an amplified antenna,
so S readings aren't all that significant.

The 5.23MHz sweep skips a beat once in a while. Perhaps this is for
synchronization.

Thanks for the wiki. Now I know where Twain Harte is located. You
probably get better SW reception than I do since your noise floor is
lower.

Yeah, these codar signals are quite wide. Certainly wider than my
widest filter (9kHz).

What reason do we have to believe that this person is your daughter? You've been caught in numerous lies in this group. Any presumption that you're telling the truth has consequently gone straight out the window. The fact that you found someone whose name includes "Gleason" and is an attorney does not impress. I'm sure there are many of these.

As far as AM goes, you can make a huge difference with almost any radio by adding an external antenna. I live in southeastern Arizona and reception becomes sporadic at night (not to mention the number of frequencies that are dominated by Mexican stations).

I can often peak up stations on my ATS-909 by using my inductively-coupled Select-A-Tenna loop and carefully tuning and rotating the loop. I can't speak for the other external AM antennas -- I'm sure that there are others that would work substantially better.

At the time I was using my work-hosre Drake R8 with a 200' W-E wire.

Spice FM is an English FM station. RTZ relays their news at 1800, but not every day apparently.

Nice catch of the 1800 -- I have been unable to
get that one lately due to high noise levels here....
but a few months ago was able to...

Propagation has been very poor for the 1800 English. As you know Dan, the signal generally improves after that with some great music prior to their 2100 sign off, so I'll mention that for the benefit of others.

A disgrace? Hey, SOB, at least I wore the uniform! You, on the other hand are nothing more than a sorry little homosexual 'tard who can barely even dress yourself on any given day!

I'll be waiting for that letter from your *daughter*, asshole!

2473. need help with a Grundig

Newsgroup: rec.radio.shortwave
Date: 2008-01-28 16:29:04 UTC
From: barret bonden <support@networks-cc.com>
Message-ID: <479e02cf$0$25045$607ed4bc@cv.net>
Source record: 135391

. Receiver is a Grundig YB 400PE. I'm very new to SW (4 days ?) ; I'm a sailor needing weatherfax and voice weather at sea.
I used the list of USCG stations at the bottom of the page, and the jvcomm32 weatherfax program and got nothing (the program seems fine, and communicated to the computer OK) I just ended up with junk pictures. I also cant pick up voice weather on listed stations. I can get foreign stations in the 49 meter band , so the Grundig seems to work -

Some questions - I read that I'm to "tune radio to 4608.1 kHz" for a 4610.0 kHz station, but I cant get the Grundig to go to a decimal frequency. Am I right in assuming I'm to use the fine tuning made possible by the SSB switch ?

Am I overly optimistic in assuming I should be able to get Boston easily from Long Island New York ?

Any pointers greatly appreciated -

NMF, US Coast Guard, Boston, Massachusetts, USA

Frequencies:

4235.0 kHz: 0230-1015 UTC (tune radio to 4233.1 kHz)

6340.5 kHz: 0000-2400 UTC (tune radio to 6338.6 kHz)

9110.0 kHz: 0000-2400 UTC (tune radio to 9108.1 kHz)

12750.0 kHz: 1430-2215 UTC (tune radio to 12748.1 kHz)

CARRIER FREQUENCY IS 1.9 kHz BELOW THE ASSIGNED FREQUENCY

Mode: 120 RPM, IOC: 576

Schedule:

Time UTC Product RPM/IOC VALID MAP

0230/1430 TEST PATTERN 120/576

0233/1433 PRELIMINARY SURFACE ANALYSIS 120/576 00/12 1

0243/---- BROADCAST SCHEDULE (PART 1) 120/576

----/1443 96 HR 500MB PROG 120/576 0000 4

<snip>

I have used the YB400 to receive WEFAX with good results; use software that provides a tuning adjustment with a graphical spectrum display -- I have used WXSAT and MULTIPSK on Windows 2000. You may also need to tweak the clock frequency by single Hertz increments in these programs to deskew the output and synchronizing the start-of-scan can be a problem but you should get useful charts regardless.

I suggest setting the SSB tuning pot on the YB400 to the center of its range and tuning the receiver with its keypad while monitoring in the WEFAX software until the signal is within range of the tuning display; then fine tune using the program's controls.

Regards,

Michael

On Jan 27, 11:30 pm, "sdgreen" <sd.gr...@shaw.ca> wrote:
-
- Thanks RHF! Excuse the top posting, but your information
- is utterly magnificent...kudos.
-
- My thought on the MFJ 1020C active pre-amp is that such
- is self contained, easy to pack, has the appropriate controls,
- comes with a vertical telescoping mast 50+ inches and looks
- like it would be easy to setup and use.
-
- Wires are nice, but messy on luggage and sometimes
- airport security get curious.
-
- So the question is does the MFJ 1020C do the job.
-
- ========================

SD GREEN,

Yes the MFJ-1020C could "Do The Job" as you have defined it.

You have an RF Gain Control and Attenuator built into the
Icom IC-R20 and a Gain Control built into the MFJ-1020C.

Active Antenna Signal Overload - Back-Off on them to reduce
and prevent any Signal Overload of the Radio.

Remember - That you have to Tune both the Radio and the
Active Antenna to the same Frequency to use them properly.

Wide-Band Scanner Receivers -and- Wide-Band Active Antennas
- = Synergy & Utility = -

TIP - With a Scanning Wideband Radio you may find a Wideband
Active Antenna the better 'choice' versus an Active Antenna that
you will be Required to Re-Tune with each Frequency change.

Two Wide-Band Active Antennas :

You may want to consider the MFJ-1022 Wideband Active
http://www.universal-radio.com/catalog/sw_ant/3109.html
Indoor Receiving Antenna : Coverage 300 kHz to 200 MHz
* Small Compact and Designed to be used Indoors
* "No" Tuning Required

* Adjust the Radio's RF Gain Control and Attenuator
to reduce and prevent Signal Overload

Another 'alternative' is the Kaito KA35 Active MW/SW Antenna
http://www.universal-radio.com/catalog/sw_ant/4835.html
http://cgi.ebay.com/_W0QQitemZ250194482431
* Small Compact and Designed to be used Indoors
* "No" Tuning Required
* Adjust the Radio's RF Gain Control and Attenuator
to reduce and prevent Signal Overload
+ Two Antenna Elements Coverage : 100 kHz to 30 MHz
+ + AM/MW Ferrite Rod {Directional} LW+MW+SW>3MHz
+ + Shortwave Whip {Non-Directional} SW 3MHz~ 30 MHz

==========

Thanks RHF. I looked at the options you suggested, but I rather fancy using
the various adjustments to fine tune the signal. The IC-20 does have
satisfactory controls to tailor the signal. For my purpose, the IC-20
performs quite adequately and much, much better than either my Eton 10 /100
or my Grundig 400. SSB is especially outstanding.

It was a toss up between the IC-20 or the AOR 8300. In the end, battery life
was the deciding factor.

Amazing, ain't it! As I've said for so many years, poor little 'Eduardo' is nothing more than a fraudulent lying little SOB.

I find it hard to believe that any executive with his credentials
would submit to the noise, here.

My GM at CBS used to cruise the AOL Radio boards. He'd answer questions, he'd clarify policy, and he'd take suggestions. All in a very public forum. He also took a reaming from time to time.

But that was all part of his 'ground up' marketing effort. And he participated in boards where his audience was known to frequent. What he didn't do was show up on radio boards where his audience wasn't found. He didn't spend time on the non relevant boards, because it created no benefit to him, his station, and his audience. And he never engaged in debate for debate's sake. Because his responsibilities didn't permit him to waste that kind of time. Or effort.

You'd think a ranking executive within a corporation like Univision wouldn't have the time to submit to the noise here. Especially, given his disdain for DXers, and the attested non-viability of SW broadcasting.

You gotta wonder.

I'm sure he'll tell us. He can't help himself. Which also suggests inconsistencies in his story. But I'm sure he'll pop out to clear up any misunderstandings.

And in the act, raise more questions than he answers.

Which further suggests there's less here than meets the eye.

I can't think of a ng that has more off-topic posts. As a DXer with over
2200 veries and 87 countries, 45-year member of NRC, founding member of
IRCA, and general member over the years of NASWA, NNRC, MWC, etc., as well
as having held (and never activated) an actual SW license, I was interested
several years ago in the recent antagonism towards broadcasting by DXers.
That is certainly on-topic.

And that's easily explained. Broadcasters stopped serving DXers.
Ignored them. In some cases rebuked them for contacting them with
reception reports.

You're fans don't turn on you without cause. You have to run them
off. If you're looking for reasons why DXers became antagonistic, take
a look at the attitude shown them by broadcasters.

It's no mystery.

The answered is simple. An attorney employed by the government is not going
to have a "law firm" letterhead.

When listeners tolerate noise for access to quality content and do not
tolerate it for access to crap, this pretty conclusively shows the
issue is with content, not signal.

David 'Eduardo' Frackelton Gleason was finally busted once and for all on January 28, 2008!

Mark this glorious day on your calendars fellow SW aficionados!

I'm LMFAO!

ICOM's handhelds are like that. I have an R10 that's wide enough to
pass a volleyball on AM. That said, with Grove's active whip, it didn't
suck too bad down into MW territory prior to IBOC.

Now, it's pretty much a VHF only receiver.

Yea, like that time he claimed that Univision isn't being affected by terrestrial radio's 90% drop in value over the past year!

The only concern I have about the CC Radio Plus is, according to many reviews I've read, the LCD display fades out and eventually completely disappears in about 2 years and Crane charges about $50 to fix it.

2505. Germany flicks off-switch on DAB!

Newsgroup: rec.radio.shortwave
Date: 2008-01-28 22:37:48 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <4847df55-455c-43b4-a11f-7e6fc2cb786b@i12g2000prf.googlegroups.com>
Source record: 135423

"Germany flicks off-switch on DAB"

"Part of the problem is that analogue FM never went away and most people didn't seem to care for the clear digital-quality sound, and were left nonplussed by such benefits as easy tuning and message displays with song names and titles. DAB is struggling almost everywhere in Europe. The standard never really succeeded in Europe except in Denmark and the UK, where this year the upgraded DAB+ format will be launched (including podcast services)."

http://www.theregister.co.uk/2008/01/28/germany_switches_dab_off/

"Two digital radio stations to close" UK

"Digital radio will suffer a double blow this weekend with the closure of two national digital stations, Oneword and Core. GCap Media's music station Core is expected to close tomorrow, while UBC's spoken word outfit Oneword, whose future has long been in doubt, will cease broadcasting on Saturday. Both stations were broadcast via digital audio broadcasting (DAB) on Digital One, the national digital radio multiplex majority-owned by GCap. In a dramatic scaling back of GCap's digital offerings, its digital music station Life is also set to close while its chillout station, Chill, has been removed from the Sky Digital platform."

http://tinyurl.com/2coldb

"Digital Radio in Canada"

"The Commission is very concerned about the stalled DRB transition. Roughly 15 of the 76 authorized stations (including the digital-only operation in Toronto) are not on the air. Some stations that once operated have since ceased operations. Few recievers have been sold, and there is no interest in expanding DRB service beyond the six cities where it exists."

http://americanbandscan.blogspot.com/2006/12/digital-radio-in-canada.html

"Straining to hear digital radio - Europe has a head start in terrestrial digital radio, but is anybody listening?"

"But today, digital radio is struggling to find its legs. While it's still in the cradle in the United States, it has begun to crawl, a bit, in Europe and elsewhere... Europe has had a standard for digital radio for some time. The European Union adopted the standard, called Eureka 147, 10 years ago. But high prices and a lack of consumer interest have kept the market tiny."

http://www.edn.com/index.asp?layout=article&articleid=CA266524&ref=nbra

"Annual DAB sales 50% below forecast"

"The following graphs are copied from the DRDB's (Digital Radio
Development Bureau -- UK DAB's marketing and PR arm) sales forecast
documents from 2004 and 2007, and they show that the forecast sales
for 2008 are a massive 50% below what the DRDB had previously forecast
they would be for 2008, and the cumulative sales will be 18% below
previously forecast by the end of this year and 30% below what they
had previously forecast by the end of next year."

http://www.digitalradiotech.co.uk/articles/Annual-DAB-sales-50-below-forecast.php

No You have to convert the IF output frequency 455 Khz to audio
frequency to use it for a computer sound card.
There are lots of reasonable cheap projects of downmixers around
on websites about DRM reception.

It's valuation was established two years ago and it went private.

Stock market value is often totally divorced from the performance of a
sector.

Oh yeah, lest I forget, be certain to have the bitch send me a letter on
whatever letterhead she can fabricate, boy!

LMFAO at the f00kin faggot, David 'Eduardo' Frackelton Gleason.

Yes, totally divorced UNTIL you want to do something interesting with
it, at which point life quickly begins to suck.

Since the CCRadio Plus has only been on the market for 6 months, you
must be mistaken. I got mine as soon as they became available (I
placed order before they were available) and have had no problem.

I am feeling the ''urge'' right now.But I have to finish watching Top Gear program on the BBC America channel.Those Brits, with their funny Brit looks and their funny talking, look very funny driving those big old American cars around in Florida.Those Brits are a laff a minute.

How do you find the R20 other than the bandwidth? The specs look pretty
good for sideband. The price has been lowered a bit also. I'd get a
Yupiteru 9000, but the lack of a computer interface prevents that.

The R20 seems a better deal than the 8200.

Those thousands and thousands of people don't exist. None listen of them
listen to my radio. Now if you want to draw some false conclusions based
on some marketing data about what is or is not listenable on my radio
you go right ahead and continue to live in your fantasy world.

Better luck next time. The all about Eduardo posting orgasm continues.
He just could win two weeks in a row at this rate.

He won't drive 50 to 60 miles to see me and my portable radio. Instead
he will continue to imagine what I can receive and you expect him to
travel to Michigan to go to fisticuffs with DxAxe? I don't think so.

- I think you're reading too much into it. Tardo is just a mascot
- of sorts. He's an idiot and of course a troll, but I actually think
- this group would be less fun without having his ass to use as
- a football.
-

RON,

That is the CCRadio Plus by Sangean {Taiwan} -not-
the CCRadio SW by Redsun {China} they are two
differect Radios made by two different manuafacures.

- - fades out and eventually completely disappears in
- - about 2 years and Crane charges about $50 to fix it.
- -

YES - The CCRadio+Plus has a histroy of LCD 'problems'.

- Since the CCRadio Plus {that would be the CCRadio SW} has
- only been on the market for 6 months, you must be mistaken.
- I got mine as soon as they became available (I placed order
- before they were available) and have had no problem.
-

GA,

I think that you miss-typed and that would be
the CCRadio SW by Redsun of China -not- the
CCRadio+Plus by Sabgean of Taiwan.

NOTE - One is the CCRadio Plus by Sangean {Taiwan}
-and- the other is the CCRadio SW by Redsun {China}
they are two differect Radios made by two different
Manuafacures.

hey guys, i read a couple of posts and i must say you guys are far beyond me in my understanding of the whole damn thing. but today I bought a $40.00 shortwave radio @ Radio Shack thinking that I'd come home and listen to all sorts of broadcasts from the globe over and all I freakin' get is some queer broadcast coming in very vaguely from Canada. Should I go buy a bigger radio? am I doing something wrong? I looked at the frequencies list and just can't seem to get in on anything? suggestions?

Where are you? The Cuban on 630 has wobbled long in the past, but it may not even be the same transmitter today. Off channel Mexicans are indeed rare, and drifters in general are virtually gone as of the last decade or so of synthesized frequency transmitters.

The PR station is directional away from the US and the DR, and the DR station is inactive.

It would help to know where identifiable Latin America reception is coming from tonight.

I currently have three receivers, one at each of my locations. R 75 in LA,
R8 in CA desert, and TenTec 350 in northern AZ. All are condo locations, so
use Jerry Thomas' Quantum loop, his phasor and an anmplified whip in combo
to do somewhat nice directional reception. My previous receivers included
SX-99 (1959) HQ-180 (1961), 51J4 (63), R390 (Hammurlund, 1970), and several
R75's.

The world of commercial radio is based on ratings, not "the ability to hear"
a station. There is no fantasy involved. Each person in the sample
represents a thousand or so non-participants, and the results are the basis
for the revenue of each significant station. The fact is, there is pretty
much no listening to stations as shown in the ratings all over the US when
signals are not extremely strong and noise-free

As I've mentioned before, I can't imagine why anyone would bother to read Telamon's self-sanctimonious drivel. If he's running a clueless contest, here's to the fact that I know he lacks the honesty and integrity to count his own cluelessness.

The vast majority of his posts have nothing to do with shortwave. He simply trumpets his own superiority by running down everyone else. There is not the slightest iota of positivity in his shriveled soul. Say what you want about RHF, but at least he's a friendly guy. No one would ever make that conclusion assessing Telamon.

Come on folks! Make this a happier place by not reading, or at least not re-posting, his constant attacks on everyone else.

Do you think he really owns a shortwave radio?

MWBRYANT

I travel about 125,000 to 150,000 a year to talk to real listeners... I know from their behaviour and that recorded by Arbitron that they don't routinely listen to stations such as you have mentioned that are hearable but not listenable by most. I can go to the Coachella Valley and hear a number of LA FMs on my car radio, and also pick up several AMs. But the signals, listenable to me as a DXer, are not pleasant to the average listener, which is why none gets any listening in the Coachella Valley ratings.

What would I learn from your portable that I don't already know?

Perhaps results would be different if all those stations weren't
broadcasting crap?

But no, you can't get your head around this hypothesis so long as
there's a single household in America without a bottle of colloidal
silver in the medicine cabinet.

(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one...

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

I just asked you to have the cunt send me a letter, boy.

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter* must both
be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms
letterhead within the next two weeks!

You dumb sand niggers (sorry, I categorize ya all this way) need to
understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I am witty, and I am wise!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying
old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena
gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters. That is
after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer
Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians... ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (2)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel
Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your
hands upon the weapon, and blow the cock sucking, bean blower back into
Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke
around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind
River
Massacre.

I collect stamps!

You mean "talk at" listeners.

I know

Perhaps results would be different if they had something other than
crap to listen to?

I can go to the Coachella Valley and hear a number of LA
> FMs on my car radio, and also pick up several AMs. But the signals,

There's certainly a lot you need to learn, but one thing you have
fully mastered is how to beg the question.

==========

The ICOM R-20 is a pretty impressive communications reciever in my view. I also run a ICOM 706 transciever and a old solid state Heathkit SB303 unit , and without question the IC R20 is more sensitive with better selectivity, certainly on SSB signals. However like all communications recievers, the unit does require an antenna. The provided telescoping is basically useless. The battery life is a real plus with experience in the 18 to 20 hour range (not scanning). The ANL and NB seem to work ok. For LW/MW the am side could be a little bit more narrow, and like others have said ICOM should have included that feature. VHF/UHF and beyond work really well. The R-20 seems to be solidly constructed. Some features could have been implemented differently like the TS control. The integrated IC Recorder is of interest and also works well.

I also have the computer usb interface and software, where one can easily input / change station data / scan edges / modify any one of the 1200+ memories.

I have four antennas, (1) 260 foot long wire (2) 23 foot VHF dual band vertical (3) 12 foot VHF -lo 6m (4) 163 foot dipole from which I can select. The R-20 reacts well without overloading.

For a small package, works well. I assume the AOR handheld wide band would work just as well.

"Germany will end Digital Audio Broadcasting (DAB) next year after a ten years experiment. Public radio stations demanded another EURO 180m to keep it going, but the independent commission responsible for the allocation of licence fees says it is over.

DAB has been under development since 1981, and Germany was the first country in Europe to start test transmissions. However, the technology never caught on - only a couple of public and regional radio stations participated in experiments and 200,000 digital receivers were sold."

I love it!

I just bought a grundig G5 at radio shack for $150 it works pretty good. it's am fm sw ssb. It works good with an external antenna. The twin coil ferrite antenna works great for am. I also use a old magnet cb antenna that I stick on the top of my house at night and that works really good with am also.

Wow, that is impressive. Compared to the performance of your R20,
mine would appear to have been defective out of the box. In
considering this radio, I was well aware of the prevailing view that
such wideband receivers often involve compromises, and I was expecting
just that. Therefore, given the performance that the unit provided, I
was neither disappointed, nor overly bowled over. It was about what I
expected: nothing more; nothing less. There's a lot to be said for
the R20: nice, small package; amazingly broad coverage; battery life
is quite decent, indeed; 10 Hz tuning resolution (although my unit can
show some variation; say, minus 90 Hz or thereabout); recorder is a
nifty feature, as is the standby mode it permits, allowing for
unattended listening; and I could go on.

However, for VHF/UHF scanning, it does not offer the trunking features or APCO-25 decoding that some of the upper end handheld scanners offer. Scan rate is also a bit slow compared with the dedicated scanners, or so I've been told.

This receiver really wasn't designed for optimal HF reception, and I realized that going in. Yes, as Mr. Green said, it's pretty deaf off the whip, at least on the HF bands. I'm mostly in the Washington DC metro area, so there's always plenty going on in the VHF/UHF bands, particularly in Prince George's County... For SWBC listening, the exceedingly wide bandwidth filter leaves much to be desired. True, there's SSB tuning, and that somewhat compensates for the AM bandwidth inadequacy on HF. Overall, however, for SWBC listening, I must say that I get better performance out of a Sangean ATS-606. While I purchased this unit to use as a handheld (i.e. as a portable unit), I've hooked it up to external HF antennas of varying sorts (e.g. 100 foot wire; AOR WL-500 active antenna; etc), and to some degree or another I have tended to encounter overload issues. Use of the RF gain is essential, needless to say. I've experienced overload when utilizing the R20 with a Sangean AN-60 reel-out wire antenna & Miracle Ducker inline antenna tuner: nothing horrendous, but it was noticeable. Ultimately, however, I use the R20 mostly as a handheld and generally just using a whip. For me, the R20's HF side is simply a nice extra for occasional tuning to major SW broadcasters. At home, I tend to go with the Drakes (R8B/R7/SW8) or any one of a variety of portables, most of which outperform my R20 for HF reception.

mike/MII: Yes, as a package the R20 is in many ways a better overall deal than the AOR AR8200 Mk III; however, if you're into SWBC, then you should consider the fact that the AOR does include that 3 kHz narrow AM filter...something that prove a much desired feature, if you were seeking a wideband handheld for which you intended to do a bit of SWBC listening on more crowded bands, particularly if listening to a weaker station in the presence of stronger ones...the little guys can get drowned out in AM mode on the R20; SSB mode can in some instances salvage the signal, but not always. The AOR costs a bit more, however; and there are a lot of extras that are offered as options; if desired, these can really drive the AOR price up. That said, David Rickets seems to be really impressed with the performance of his AOR 8200 and maintains that it gives him pretty solid HF reception just off the whip. For your reference, there are a wealth of user assessments of the R20 available online; the receiver has tended to get favorable reviews, by and large:

http://www.eham.net/reviews/detail/4317
http://www.strongsignals.net/access/clubs/ic-r20/os_proc.cgi?process=display
www.monitoringtimes.com/html/mtscan1104.pdf
http://www.grove-ent.com/ICR20REVIEW.htm

On the whole, the R20 is a nice little receiver. An interesting attempt at an all-in-one package. ICOM has certainly packed a lot into this little unit. It's really great that Mr. Green has found

such satisfaction in his unit. Going on his results, I'm led to wonder if there are some significant sample-to-sample variations in R20 performance. I guess Yahoo groups would be the place to investigate this sort of thing further...

Try doing some tuning around at night say after 6 or 7 pm your local time. Eventually you should find the BBC, Radio Havana, Canada, Germany and many other major stations.

Try the 49 meter band around 6.000 Mhz. Also you might want to add a few feet of speaker wire for a little bit of a longer antenna. As well as get the radio closer to a window or at least the antenna closer to a window. That might help if you live in a metal frame building. If you live in a stick built home, it shouldnt matter.

Feel free to ask questions. I am sure there are many in here willing to help.

America is getting more and more like a repressive totalitarian
government. They have now made it impossible for you to post
anomymously.

This means that if you post political material that threatens a party
in power, they will write your name down on a list and harrass you.

The type of harassment the government uses in America are not the same
as in other countries, but in my post above, I gave you an example of
how they work.

They can also stage crimes, like having police plant evidence.

Even if cases are thrown out of court, they can tie you up in court
for years with phoney charges and "investigations."

The possibility of Low Power FM in America is still a scam because big
media have been able to pressure the government not to allow it in
major urban areas. What difference does it make if your LPFM
broadcasts in a desert where you only reach five people?

I know what you're saying Telamon, I guess the thread kind of surprised me in the 'meaness' of it I guess. I just wonder how many of the people that bang away and say things via their keyboard would do it face to face. Bottom line is both these guys, I know at least Steve are older adults....it just kind of makes me shake my head and roll my eyes. It sounds pretty personal to me, both of them actually....that why I mentioned settling it. Hey maybe they could be friends after one of em' got their butt whipped. :-D Didn't Steve and Michael used to be enemies back in the day- there were some pretty epic threads. Sounds like they both respect each other now.

2583. (OT) : Mike [M II] - Here Is Your Theme Song - Can-A-Duh-Ian Id-De-It !

On Jan 28, 7:34 pm, FrankRo...@webtv.net wrote:
- hey guys,
- i read a couple of posts and i must say you guys are far
- beyond me in my understanding of the whole damn thing.
- but today I bought a $40.00 shortwave radio @ Radio Shack

That is a beginning.

- thinking that I'd come home and listen to all sorts of broadcasts
- from the globe over and all I freakin' get is some queer broadcast
- coming in very vaguely from Canada.

Proves that the Radio is working.

- Should I go buy a bigger radio?

Learn to use what you have first; and then build on that.

- am I doing something wrong?

First take the Radio OUTSIDE and fully extend the Whip Antenna.
[Portable AM/FM Shortwave Radios usually work better "Outside".]

Turn the Radio 'On' and select a Shortwave Radio Band :

Read / Print : RadioShack Guide to Shortwave Radios
* Shortwave Radio Bands and Frequencies
http://support.radioshack.com/support_tutorials/communications/swave-5.htm
* Shortwave Radio Station List
http://support.radioshack.com/support_tutorials/communications/swave-6.htm

Read / Print : Shortwave Frequency List - C. Crane Co.
http://www.ccrane.com/shortwave-frequency-list.aspx

Read / Print : Understanding Shortwave Bands - Eton/Grundig/USA
The Key to Successfully Using Your Shortwave Radio
http://www.etoncorp.com/shortwavetutorial
Tip - Best Day and Night Shortwave Radio Bands
Day-Time Shortwave Bands are : 13, 15, 16, 19, and 22 meters
with 22 (~13.7 MHz) and 19 (~15.5 MHz) usually the best.
Night-Time Shortwave Bands are : 25, 31, 41 and 49 meters,
with 31 (~9.6 MHz) and 49 (~6 MHz) usually the best.

Tune around one or more of the Shortwave Radio Bands
that is best for your time of Day or Night.

Take a Paper and Pencil with you and Record the Frequencies
that you Hear on the Radio. If at Night also take a Flashlight.
This is so when you get back 'inside' you can check-up on
what you heard on the Radio.

REPEAT - This same Listening process with your Shortwave Radio
next-to / in-front-of a Window with the Whip Antenna fully extended.
[Portable AM/FM Shortwave Radios usually work better
near Windows.]

Frank R. - Let Us Know Your General Results and Impressions
From Both Outside and Window Shortwave Radio Listening.

- I looked at the frequencies list and just can't seem to get
- in on anything?
- suggestions?

So, have her send it on the government letterhead, boy!

As I stated earlier, you're gonna try and come up with every lie and fabrication
you can.

You're busted, oh faux one!

>> Should I go buy a bigger radio? am I doing something wrong? I looked
>> at the frequencies list and just can't seem to get in on anything?
>> suggestions?

The really important things are:

(1) Shortwave broadcasters are not on 24 hours a day. Try different times of day. Also, reception is affected by conditions in the upper atmosphere (not the weather, but the ionosphere) and is much better on some days than others. Because of the sunspot cycle, right now it's rather poor all the time, compared to what it will be in 2 or 3 years.

(2) If you're inside a steel-framed building, you need an outdoor antenna. The little whip antenna on your radio is only for use outdoors and in wooden houses with no strong interference sources nearby.

(3) International shortwave broadcasting isn't what it used to be. For instance, the BBC no longer serves North America.

This is neither an endorsement nor a criticism of Telamon - On the occasion when he posts about the technical aspects of shortwave, he seems to know considerably about it. He also occasionally reports reception. So, yepp, I really think he owns and uses a HF receiver.

Bruce Jensen

You know, all you really needed to do was put Tardo in your killfile.
That'd solve your spam problem.

Wandering YV's is an oddity. Even in the 60's and 70's when off frequency operation due to poor oscillator stability or locally "polished" crystals was common in much of Latin America, Venezuelan stations were usually the most stable and seldom drifted. Of course, we know the current government there is on a rapid race backwards, so knowing this is coming from a government station is not all that odd.

<Going private is a retreat strategy - just look at the failing Clear
<Channel.

Going private is generally a technique used when a company is undervalued by the market. This means the shares can be bought with borrowed money, and the cash flows from the business used to retire the debt. If a business were failing, this strategy would not work.

In other words, going private indicates an undervalued asset.

"When a company is undervalued by the market". Lol. Translated out of Tardo-speak, this means "when a company is overvalued by its shareholders".

So, the free market doesn't think the shares are worth what the
stockholders think they should be worth? And the company takes its ball
and goes home.

Is there a finer arrogance than this?

This is typical of Radio. License renewals are a PITA, and should be
just a formality given the capitol investment. Listeners are a commodity
who should be polled. And then told what they can listen to. Staffing
can be outsourced. Don't worry about emergencies. Like Weather?
Listeners must be within a sales contour to be considered a valued

asset. DXer's need not apply. Now, the company, not the market, determines the proper value of the company in the market.

Wow...is Life all about you, or what?

This is the living embodiment of the entitlement mentality.

Somewhere, there might be an injection of 'serve in the pubic interest as a public trustee' into the culture and you might see a change attitudes.

But, this really is the topper.

I'm sorry, did I hear someone say 'shill?'

:)

Digital radio is going dark. There is virtually no interest in IBOC in Europe, not that it make any difference now:

"IBOC TECHNOLOGY: An Assessment of Technical & Operational Issues in the Canadian FM Radio Environment"

"Based on the evidence currently in hand, the DRCG considers that it would be risky for Canadian broadcasters to proceed at this time with an unrestricted roll-out of HD Radio services in the FM band, in the manner implemented in the US. There is no ground-swell of radio listener interest in this technology so far and the lack of inexpensive receivers, as well as unique new programming services, continues to make it difficult to market HD Radio to the public in the US. Moreover, there is no evidence that Canadian digital radio listeners are being lost to the 10% of US FM stations that have implemented HD Radio to date."

http://www.cab-acr.ca/english/radio/dab/DRCG_Report_final.pdf

"Digital radio in Canada"

"The only comprehensive technical comments came from the CBC. They stated that AM-IBOC would create a serious degradation in sound quality for existing AM stations (*all* AM stations, not just the ones adopting IBOC). They also state that due to interference concerns, IBOC transmission at night is not practical."

http://americanbandscan.blogspot.com/2006/12/digital-radio-in-canada.html

"German State Media Authority Assessement of HD/IBOC"

"HD-RadioTM has been standardized for the US market and does not comply with the transmitter mask defined for ITU Region 1. Therefore, regular use in Germany is formally impossible. Technically spoken, HD-RadioTM is principally compatible with the VHF FM broadcasting scenario, whereby interference occurs right in the 200 kHz frequency offset."

http://tinyurl.com/youkll

"World's first DRM+ broadcasts go on-air in Germany"

"The world's first ever DRM+ broadcastes have gone on-air in the FM band in Germany, and it is reported that the DRM+ system will be standardised next year. It is also reported that there will be trials of the US-based HD Radio system in the FM band in Germany as well, although I've seen another German report which said that the HD Radio system failed to meet the interference criteria for transmitting in the FM band -- i.e. HD Radio stations would interfere too much with existing FM stations -- so whether HD Radio stands a chance of being used I don't know, but I would doubt it. The European receiver manufacturers certainly wouldn't be keen on supporting yet another standard if they can help it due to the additional licensing costs that would be incurred, and the fact that HD Radio is a proprietary system wouldn't help matters. Also, HD Radio only has a very limited

amount of support -- just the odd radio station in a few countries -- so I can't personally see how it stands a chance of building up the momentum required to compete against DAB+, as that has a lot of support from around the world."

http://tinyurl.com/2nojbu

"European HD Radio examined"

"When IBOC was first proposed for digital radio the European radio technology industry criticised it on the ground that it was unstable and prone to interference. Another objection was that the patents are owned by a single company, which charges fees for use... HD Radio is similar but the fees come to one company. We're using a different licensing scheme in Europe, with broadcasters contacting manufacturers direct and not paying an on-going fee. HD Radio is not seen as a replacement for DAB or DRM but an alternative that could work for some European radio stations. A spokeswoman for the UK's Digital Radio Development Board said that everybody is looking at everything, although there is currently no apparent interest in the country for HD Radio."

http://tinyurl.com/3dd92d

What a fucking shame!

Hi
If the reciever has a BFO, you can feed this to a sound board.
There are applications where one feeds it to a simple comparator
and goes to a serial status line.
Weather Fax is 50 Hz frequency shift. It is desired that the reciever
has
some form of bandwidth adjustments but as long as it has a BFO,
one can get reasonable results.
It seems like there is some freeware code on the web someplace
for the simple comparator type. This type just looks for zero crossing
and calculates the frequency.
Since the signals are so narrow in band width, the reciever needs to
have a good stable VFO and BFO.
I did a project for a DSP class that I used a phone modem that has
a DSP processor (ADSP2114) to post process the analog signal
a little before going to the reciever. It did some band filtering and
would compensate for frequency drift by measuring the frequency
of the vertical syncs and readjusting the output frequency to keep
this constant.

I B O C"Deed and Half-Crocked,

Just like XM & SIRIUS Satellite "DAB" Broadcasting where the
Canadian Radio Stations {Broacasters} and Canadian Government
found out that the Canadian People were in-fact Listening to these
two DAB Satellite Systems : The Canadian Business Interests
and the Canadian Government both wanted a piece of the
Profits to be made in Canada. Hence, XM & SIRIUS Satellite
"DAB" Broadcasting has been authorized for Canada with some
added Canadian Content.

Geographic Reality : About Three-Quarters (75%) of Canada's
Population lives within 150 kilometres (90 Miles) of the US Border.
http://en.wikipedia.org/wiki/Canada#Demographics
Which puts the majority of Canada's Population within the Service
Contours of many US Border AM & FM Radio Stations.
Over the next Decade {10 Years} more and more Canadians will
be exposed to AM & FM "HD" Radio using the IBOC Technology.
Over time many Canadians will buy a "HD" Radio to hear 'those'
American Radio Stations that they currently like to listen to.
At some point-in-time it will become in the Economic Interest
of both Canadian Broadcasting Businesses and the Canadian
Government to 'transition' to "HD" Radio using IBOC Technology.

HD Radio : It Is Not A Question of "IF" - It Is A Question of "WHEN"
http://groups.google.com/group/hd-radio/msg/231d18d3b0b4f423
Time and the Next Generation of AM & FM Radio Listeners is
on the side of "HD" Radio using IBOC Technology in the USA
and eventually in Canada. Can Europe Be Far Behind ?
.
-ps- Telamon be sure to Count this as another
one of my 'Clueless Posts' -cause- IT IS ! ;-{
Plus Extra Credit for the : Cut, Copy and Paste Stuff. :o)

As I've said, this technology may fail, but it's not going to go away anytime soon. There's too much money invested now to just abandon it, two years in. Even DAB in Germany tested for a decade. And Radio is terribly tenacious when it comes to what it thinks needs to happen.

It will take a LOOONGGG time for IBOC to go away. Even if it's an abject failure. And then, there is the FCC mandate that all future modulation schemes be DIGITAL.

They may be denying it now, but they denied it with HD TV, too, and then mandated an end to analog TV broadcasting anyway.

There is no reason, especially with conditional access under test right now, to believe that the current hybrid digital/analog system of broadcast will be allowed to remain in place indefinitely.

Eventually, as the chairman of iBiquity said, it will be an all digital system.

BpnJ This is what I can find here on what Telamon 'claims'
to own, have, use in the way of Shortwave (HF) Radios :

- -
-
I have a DX-380.
--
Telamon
Ventura, California
- -
-
Speaking for myself I own four bands of radios not just Drake
so labeling me a "Drake loyalist" falls flat on its face.
--
Telamon
Ventura, California
- -
-
I've used to tune ECSS are R8, R8B, Sony 7600 and AOR 7030+.
The R8B and Sony are able to operate in the selectable side band sync
mode.
--
Telamon
Ventura, California
- -
-
I own an R8B and RX340.
--
Telamon
Ventura, California
- -
-
I own several high end
table top radios and would NOT sell my 7600G.
It's a great portable radio, which I've owned for years
--
Telamon
Ventura, California
- -
-

So tell us Telamon - What Radios Do You Own
in fifty words or less. ~ RHF
.
-ps- Telamon be sure to Count this as another

Roy, I, myself own, SW-2, SW-8, AR-7030+, RF-3100, Hammarlund BC794 Super Pro, Halli S53-A, Ten-Tec RX 350, National NC-88 (2 of them), Grundig Sat 500, Grundig Sat 700 (for Sale), Grundig Sat 650 Professional, HF-150, T/0 3000-1 (2), T/0 R7000....and those are just what I can see from my desk. There are dozens of vintage Philcos,

Motorolas (Galvin build), A-K's and GE's.

I would imagine Telamon owns what he's claimed here, and several more. Just as do a number of others in the group.

DPM,

That's at least Three Shacks or more worth of Radios and
Receivers. :o)

All I have up here presently is the Grundig Satellit 800-M
Radio and a Icom IC-R75 Receiver. Plus the Eton E1 and
Sony ICF-2010; along with the Redsun RP2100 portable
Radios. Need to move one of the Kenwood R-5000
Receivers from Oakland up here.

thankful that god gave me : one hand to tune the radio
and the other to play with the knobs and two ears to listen ~ RHF
.
-ps- Telamon be sure to Count this as another
one of my 'Clueless Posts' -cause- IT IS ! ;-{

It wasn't an image problem. It was an acute case of dyslexia. I was saying "6950" when the radio was tuned to 9650.

sorry about that...

You may need to clip a long piece of wire to your antenna. This helps a
LOT. Also, listen in the evenings as well.

Agree - a radio is a third of the equation. A good antenna is another third.
The third third is propagation - when to listen where -- see propagation

> stockholders think they should be worth? And the company takes its ball
> and goes home.

No, a group of investors thinks the company is worth more than the market capitalization shows, so they offer the existing shareholders more than the market price and take it private.

The people doing the "thinking" are not the existing shareholders, who, if they accept the offer for a buy-out, don't think the company is undervalued.
>
> Is there a finer arrogance than this?

You are not correctly analyzing how a buyout occurs. It's third party investors with money who find undervalued public companies and buy them for less than they are worth.
>
> This is typical of Radio. License renewals are a PITA, and should be
> just a formality given the capitol investment. Listeners are a commodity

> apply. Now, the company, not the market, determines the proper value of
> the company in the market.

Wrong again (I won't get into the fringe service issue again now). It's outsiders who think the market has undervalued a company. They then offer some incentive to shareholders to buy all the shares for less than they think the company is worth, and end up with a good deal on am undervalued asset.
>
> Wow...is Life all about you, or what?

No, because you don't understand buy-outs.
>
> This is the living embodiment of the entitlement mentality.

No, it is market force economics at their best. Find a good company whose shares are trading at a level well under their value. Offer a bit more, and get a company cheap.
>
> Somewhere, there might be an injection of 'serve in the pubic interest
> as a public trustee' into the culture and you might see a change

> attitudes.

What does buying and selling shares have to do with the daily operation of a business? The buyout principle applies to auto parts or fish hatcheries or knitting mills, too.
>
> But, this really is the topper.

Only because you didn't understand the concept of a buy-out. The way they work is just about opposotie what you think.
>
> I'm sorry, did I hear someone say 'shill?'

No, I heard somebody yell, "clueless about the market."

<"When a company is undervalued by the market". Lol. Translated out of
<Tardo-speak, this means "when a company is overvalued by its
<shareholders".

Oh, gawd. Another economic nincompoop.

When a private equity buyout occurs, a third party has decided a company is
undervalued by the stock market as a whole. So, they offer all existing
shareholders a better-than-market price and if the offer is accepted, they
buy all the shares and go private.

In essence, this is when the existing shareholders want to get more for
their shares than they could have by selling on the open stock market. In
other words, they think the market is undervaluing the company.

Please don't bother Acie with facts; he reacts by insulting the messenger
who brings them.

Consider yourself lucky that he doesn't know that the three nicest cities in North America are Toronto, Montr&#65533;al and Vancouver. Otherwise, he might visit them.

By all means, go ahead and think that "the market" is undervaluing the
lint in your navel. You'll have a hearty laugh when those naysayers in
"the market" realize its true value. lol

Except the notion of a buyout has zero bearing on any of the previous
discussions here. You have simply imported this idea in order
obfuscate and confuse readers.

DPM,

Any "Conditional Access" AM & FM "HD" Radio Technology
http://groups.google.com/group/hd-radio/msg/bfe9a7567959963d
that can be marketed to Consumers of Over-the-Air Radio
that sells to the Listener for 1/4 to a 1/3 of what XM and
SIRIUS Satellite DAB Radio currently sells for will be a
Success.

1 - XM and SIRIUS Satellite DAB Radio had no established
Listener Base and had to Build One from nothing.

On the Minus-Side - XM and SIRIUS Satellite DAB Radio
charge a Premium Price for their Product/Service.

2 - Currently "Free" Over-the-Air AM & FM Radio have an
Established Listener Base of 200 Million from which Build On.

On the Plus-Side - "Conditional Access" AM & FM "HD" Radio
because of the Size of it's potential Listenership can Be the
"Low Price" [Value] Deal for Buyers of Digital Radio Services.

it's a 'vision' thing - hy dee ɾay dee oh ~ RHF

> Thank you, again, for making my points.

The only point you have proven is that you have no understanding of buyouts, which have dominated financial news for the last 5 years until the mortgage issue hit us... Chrysler, TXU, RJR Nabisco, Harrah's, Albertsons, Hertz, Kinder Morgan, etc., etc, have all gone private for the same reason... undervalued by the market.

Just because a couple of broadcast companies have gone private does not mean that there is something insidious or nefarious going on in radio company boardrooms. This is a fact of world business, and much greater in scope than the narrow broadcasting sector. Your statement that the belief that a radio company might be undervalued came from inside the company is false, and the opposite of the way things work. Radio's business is still based on serving an audience segment and then selling ads to reach them.

I don't deem them fringe. The listener does, by not listening to
programming that gets good ratings where the signal is stronger in locations
where the signal is less strong.

Are you really that dumb? He was trying to be 'folksy' by using a colloquialism.

The 'shoot' you refer to could have as easily been a 'shucks' or a 'golly'. The word was used extensively in old Western movies and radio shows.

Here, let me help you understand:

http://www.m-w.com/dictionary/colloquialism

I understand precisely how it works. You can't play by the rules of
the Market, Wall Street has higher performance expectations than you can
deliver, so you find a company willing to take equity without Wall
Street pressures, and you take your ball and go home.

I do understand buyouts. I've been involved in two of them. They're
measures of desperation. Like bankruptcy protection. A shield to sit
behind while your company comes back in order to play with the big boys,
Because the Market believes your company is not worth what you think it
should be.

Entitlement.

The Market doesn't get it. So, you exit the Market. Take your ball
and go home.

You're arguments only make my points that much clearer. Radio is
about Radio...the listeners are only commodities to make Radio satisfied
with Radio's performance.

Entitlement. We can't play in your league, so we'll create our own
and believe us to be King.

It's really no mystery.

And you DO make my points for me.

> pressures, and you take your ball and go home.

No, that is not it at all. The earnings expectations for companies that go private is higher since the deals are almost totally done with others' money.

And it has nothing to do with "the rules of the market" (your invented term) whatever you mean by that. Simply, there are often companies that are deemed to be undervalued by the market because the sector may be unglamorous, or tainted by some big underperformer (it's Viacom in the communications field) and a group of investors decides to buy it cheap with the idea of going public again some years later. That requires a good purchase price and good earnings ongoing.

The private equity company does not "take equity"... they buy the company and take it private. The former shareholders, who today are mostly mutural and pension funds, get a better price than they would have gotten if they had sold on the open market.

> I do understand buyouts. I've been involved in two of them. They're
> measures of desperation. Like bankruptcy protection. A shield to sit
> behind while your company comes back in order to play with the big boys,
> Because the Market believes your company is not worth what you think it
> should be.

Most private equity buyouts are not invited. A proposal is put to the shareholders and voted on. They are seldom initiated by the company being bought out, although if the equity bankers like the existing management they will want to try to establish a relationship. What happens is that the bankers have studied many companies, looking for the kind of value, cash flow, future portential, or some other quality they want that is in excess of market cap. Then they go after the shares.
>

> The Market doesn't get it. So, you exit the Market. Take your ball and
> go home.

That would be the case if management owned the big broadcast companies. If you look at Clear Channel, for example, you will find the Mays family with only a few percent of the shares... so it is not as if the current management owns significant parts of the companies.

Thank you both for the insights. It appears that, as in everything else in life, there are trade offs and compromises. The AOR is a pretty good set, but I wasn't too impressed with the need to buy cards and then have a limited space to use them.

We'll see how the funds are next month before deciding on a purchase of an R-20. Now, I'm busy trying to decipher the inner workings of a Yaesu 5000 wideband. The attenuate function needs a lot of use on the AM band.

You have to find radio airplay time if you're going to be heard and we're not just talking the local college campus. The trick is called promotion. Now that doesn't mean you just put your press kit in an envelope with a demo and hope they take pity on you. Perhaps you call a station and they give you the standard pitch of, "Send it and if we like it we'll put you in rotation." After a few months of never hearing your music, you automatically think you're not worthy.

First, don't buy that. You're one of hundreds, maybe even thousands depending on your city. Your disc will probably end up in the trash or, for more enterprising DJ's, on Ebay in a one-cent CD sale. If you want to be heard and make potential sales, you have to stand out from the crowd, and in this jewel of an article, I'll show you Five(5) Knock 'em Dead Ways to Do Just That!:

#1 - Get your CD into the right hands. The intern that's too busy to getting coffee or typing up a report for the station manager isn't going to be the one making the airplay decision. So find out who the head honcho is in that department and touch base with them. If the club you're playing at charges an admission or you have a show coming up offer to send the stations tickets to give away to listeners. Now keep in mind you can't give the tickets to the staff, since that's illegal and called payola, but you can offer free giveaway items to your potential audience.

#2 - If you've got one station in your pocket, then drop names. Let them know that WABC is playing your music and it's getting a great response.

#3 - Make genuine friends in the business. If you've got a disc jockey that's got you in rotation and really likes your sound, get to know them. Find out why they enjoy it and see if they've gotten any responses from listeners. If they haven't, ask if perhaps they might Q & A their callers about your music so you get a feel for your target audience. It's not a bad idea to ask them for a testimonial or quote if they're well known in your area if you know them personally. People help people. That's a fact so if you treat your area disc jockeys like a living and

Yes, it is.

Your company couldn't retain it's stock price in the Market, you
couldn't keep up with Market expectations, so you took the company out
of the market.

No matter how you spin this...your company differed with the Street
on what the stock price should be. So, you took your company off the
street.

You're arguing semantics. Which is precisely my point. You don't like
the numbers, so you declare different numbers, and you get private money
to play along.

Nothing Radio hasn't done for years. It's all about you. When it
should be about performance in the public interest.

Exact opposite. Investors spot a company that they think is undervalued.
They approach the board of directors, make an offer. If the board accepts,
it goes to vote and sale. If they reject, the investors can always sue, make
a hostile bid or withdraw. The investment bankers need to generate these
deals constantly to make money, so they are always looking for candidates.

"Undervalued" does not always mean the stock price is low, either. It may be
at a good pooint, but the company has hidden value, or can be broken up into
pieces and resold at a big profit... the value of RJR, for example.
>
> No matter how you spin this...your company differed with the Street on
> what the stock price should be. So, you took your company off the street.

It's not the company that makes the initial move, save very rare cases where
a controlling shareholder wants to cash in without flooding the market with
shares... an example would be a person of some advanced age who wanted to do
estate planning. I can only think of one of these since 2001, though.
>
> You're arguing semantics. Which is precisely my point. You don't like

> the numbers, so you declare different numbers, and you get private money
> to play along.

Again, the company that goes private does not usually start the process. Investors, using tons of research and loads of computer time determine that a company is undervalued. They then go on the hunt... the investment bankers can get tens if not hundreds of milllions for ever deal they put together and syndicate. They are constantly on the lookout for companies, because by finding them they make their income. They put together the deal, sell fractional parts of the hard cash to investors in big million-dolllar-plus slices, and finance the bulk.... all for commissions and fees.
>
> Nothing Radio hasn't done for years. It's all about you. When it should

The democrats will need somebody hawkish for the VP post. Maybe Jim
Webb.

The GOP needs somebody easter and young (well at least in their 50;s).
Nobody comes to mind at the moment.

Well, you are absolutely correct. It indeed has nothing to do with
your radio reception. But then again, that wasn't the topic, now was
it? Surveys, ratings and polls aren't based on *your* reception (which
you mentioned three times above). I know you find it hard to believe
that the sun doesn't rise and set on *YOU*, but please, try to get that
massive ego under control.

I do find it quite interesting that when asked for the letter he comes back with some
phoney baloney excuse about a *law firm
letterhead* !

That's what is so very fascinating about pathological liars, they just can't comprehend the fact that others can think faster on their
feet than they can.

This guy is as fake as they come, and it's a proven fact that he's been making up stories for over 50 years.

LMFAO! I had over 200 countries heard and QSL'd about 3 years before I got on the internet in 1996. As I recall, it took me around a year or so to hear and QSL 100 after I returned to the hobby in 1982, then another 11 or so to hear and QSL the next 100. And now, after 25 years, I'm sitting at 222 QSL'd, and 239 heard, using the NASWA list.

> I don't do that. Only you do, and then you swear, cuss and insult to

I have 4 communications receivers, 4 portables, and a National NC-125.
This is not counting the VHF-UHF receivers. I use the Drakes and the
ICOM for MW almost exclusively. (I'd be doing my usual winter thing of
listening to ComSta Kodiak but my random wire antenna got messed-up by
the Santa Anas and I'm not allowed to climb just yet.)

The only reason I'd listen to a 250 kW station on HF is because of the
content (no challenge to receiving a quarter of a million Watts) which I
can now get on satellite and/or web streams. I thoroughly enjoyed GHFS
but that's gone; the San Francisco ATC is a good test of the receiver
(listen for the pilots) but kinda boring.

When I asked if anyone thought Telamon had a SW receiver, I wasn't asking everyone to prove their worthiness by listing their receivers.

I was making fun of Telamon's old routine of accusing me of not having a shortwave receiver. Telamon claims to be the adjudicator of "clueless" posts. Spend a few moments in the archives assessing his own long-term (pre-2005) campaign of name-calling and cluelessness. His techniques were established long ago.

He's not a physician, so I doubt his capabilities at healing himself. His major displayed skill, so far, is pontification.

BTW, thanks for finally letting us know just what you do use your radios for, David. I think we can all understand your boredom with SW broadcasting a little better.

But hey! Just out of curiosity, as you are prone to fakery, what kind of story
would you fabricate for me?

I'm certain it would make for a great piece of fictional work.

LOL!

The question really needs to be asked....if he's so unconcerned about
those of us who DX the HF bands, and thinks we're all uneducated
idiots...why does he spend so damned much time trying to convince us
he's right?
```

I mean, we don't benefit his radio stations. He's not making any inroads to new listenership. He's not gathering any listener habit data relevant to his audience. Even if he got us all to see it his way, not one of us, nor in fact any of our associates, would make a meaningful addition to his listener base.

So, why waste the time and effort? Which once again, raises questions about why he's really here. And in turn, who he really is.

There are powerful, high level executives, experts, and celebrities who frequent these newsgroups all the time. But none of them spend so much time trying to pass their evangel to people who have nothing to do with their fields.

He's looking like a verbose Eddie Haskell trying to sell his line of noise to Beaver's 4th grade class.

2695. High speed data on unshielded media

Greetings:

There is a short thread in alt.internet.wireless regarding QRN from data over unshielded media (HomePlug, HomePNA, phoneline-nets, etc.)

See thread title: "Can I do this?"

SWLers should weigh in on this issue.

Michael

There's absolutely no telling who he is. He may have nothing to do
with radio or Univision. My guess: He's some pimple-faced teenager
having fun on the internet. I can see how a young person who feels
pent up and defeated might get some perverse satisfaction out of lying
for lying's sake. And if it makes him feel better, so be it. It
certainly makes me feel better to see him humiliated time after time.
It's a win/win!

Cansado de golpear puertas en busca de trabajo???
Necesita ganar dinero sin moverse de su casa???
ESTA ES LA SOLUCIÓN!!!
La técnica más fácil de ganar dinero!!!
Créeme que es real y no es cualquier otra estafa.
Gana $15.000 U.S.D. ó más en 1 mes.
G A R A N T I Z A D O
NO ES BROMA!!.. LEE CON ATENCIÓN!!!
TODOS PODEMOS SALIR GANANDO!!
La única forma de saber que no los estoy estafando es usando la
lógica e inteligencia y así se darán cuenta que el dinero se
multiplica.
Les pido que piensen y analicen el sistema descrito a
continuación con sumo cuidado y saquen sus propias conclusiones.
Sé que tu tiempo vale oro pero te aseguro que si lees esta carta, el
tiempo que inviertas en ella será bien recompensado.
Antes que nada es importante que sepas que en el mundo hay mucho
dinero, solo que está mal repartido; bien, esta es la solución al
problema:
No se trata de que pocos den mucho,
se trata de que muchos den poco.
Días atrás, leí un artículo similar a éste que decía que uno
puede ganar miles de dólares en pocas semanas con una sola inversión
de SEIS DOLARES (U.S.D. $6). Enseguida pensé, ¡Oh no! ¿Otra estafa
más?! pero, como la mayoría de nosotros, la curiosidad pudo más, y
seguí leyendo.
Decía que si envías U.S.D. $1 a cada uno de los 6
nombres y direcciones mencionadas en este artículo, anotas tu nombre,
dirección y código postal al final de la lista reemplazando al nº 6,
y envías este artículo a por lo menos 200 newsgroups (hay miles de
éstos en todo el mundo) podrás recibir en pocas semanas, desde todas
partes del mundo hasta U.S.D. $15.000 o más.
Lo único que podría perder son 6 estampillas y U.S.D $6.
Permíteme explicarte cómo funciona esto y lo más importante el por
qué funciona. Asegúrate de imprimir una copia de este artículo
AHORA, para poder sacar toda la información a medida que lo
necesites.
El proceso es muy fácil y consiste en 3 pasos sencillos:
PASO Nº 1
Consigue 6 hojas de papel y escribe en cada una de ellas:
"POR FAVOR INCLUYE MI NOMBRE EN TU LISTA DE CORRESPONDENCIA"
(PLEASE ADD MY NAME TO YOUR LIST)
junto a tu nombre, dirección e e-mail.
Ahora consigue 6 billetes de 1 dólar e introduce cada dólar en un

sobre con la hoja, de manera que el billete no se vea a través del sobre. Es recomendable ponerlo encerrado en un papel de color oscuro o carbónico para prevenir robos de correspondencia. Ahora deberías tener 6 sobres sellados y en ellos un papel con la frase mencionada, tu nombre y dirección, y un billete de U.S.D. $1 (1 dólar).
No mandes cheques ni otro tipo de pago,
SOLO BILLETES DE UN DOLAR AMERICANO
Lo que estás haciendo con esto es crear un servicio y eso hace que esto sea ABSOLUTAMENTE LEGAL!!!
Como un lindo detalle pon también en que posición cada nombre figuraba cuando mandaste tu dólar: "Estabas en la posición 3" o "You were in slot 3" como para hacerlo mas completo. De eso se trata, de hacer dinero y pasarla bien al mismo tiempo.
Envía los 6 sobres a las siguientes direcciones:
1. Jean Herde
C/Génova, nº28 (bis), 1º-11º
08041 Barcelona
ESPAÑA
2. Monica Micea
Roque Sáenz Peña 2335 - Dpto. N° 8
(B1636FII) OLIVOS - Bs. As.
ARGENTINA
3. Alberto Bisetti Ñato -via "SER POST". PERU- ANCASH- CHIQUIAN- provincia de bologensi-Nº 529.
4. Iban Filomeno Espiritu Ramirez. via "SER POST".
PERU-ANCASH- RECUAY--CATAC--Av.31 de mayo--Nº1588.
5. ANDRES PÉREZ. Urmeneta 967. Recoleta 967. Santiago Chile
6.AÍDA PACHECO. Casilla 3612. Oficina Moneda. Santiago. Chile

PASO Nº 2
Ahora borra el nº 1 de la lista de arriba y mueve los otros nombres un
número para arriba (el nº 6 se convierte en 5, el 5 se convierte en el 4, etc.) y agrega TUS DATOS en el lugar 6 de la lista. Incluye tu nombre, dirección, código postal y país.
PASO Nº 3
Cambia todo lo que creas conveniente de este artículo, pero trata de mantenerlo lo más cercano al original. Ahora pon tú artículo en por lo menos 200 newsgroups (existen más de 24.000 grupos) y/o envíalo directamente a 200 o más direcciones de e-mail, hay millones.
Sólo necesitas 200, pero cuanto más cantidad pongas, más dinero te llegará!!!, si conoces BBS (Bulletin Board Systems) locales con áreas de mensajes, etc., donde se te ocurra (recuerda que es LEGAL) publícalos.
Cuando publiques la descripción de este artículo, trata de darle un nombre que "atrape", como: "NECESITA DINERO RÁPIDO?, LEA ESTE ARTICULO", "NECESITA DINERO PARA PAGAR SUS DEUDAS???", etc.
Y cuanto más se publique más posibilidades de recibir más dinero vas a tener, además les das la oportunidad a otras personas que estén

interesadas en hacer dinero.
HAGAMOS EL COMPROMISO DE SER HONESTOS Y CUMPLIR CON LO LEGAL, PONIENDO
UN 120 POR CIENTO DE NOSOTROS PARA QUE ESTE SISTEMA FUNCIONE!!!
El sistema solo funcionara si hacemos lo correcto y hacemos mover el dinero. Esa es la idea!!! Te sorprenderás de los beneficios!!
Ahora el POR QUE de todo esto:
De 200 enviados (entre newsgroups y e-mails), digamos que siempre recibo sólo 5 respuestas (bajísimo ejemplo). Entonces hice U.S.D. $5 con mi nombre en la posición nº 6 de esta carta. Ahora, cada una de las 5 personas que ya me enviaron U.S.D. $1 también hacen un mínimo de 200 newsgroups y e-mails, cada uno con mi nombre en el nº 5 de la lista y sólo responden 5 personas a cada uno de los 5 originales, esto
hace U$S 25 más que yo recibo, ahora estas 25 personas ponen un mínimo de 200 Newsgroups y e-mails con mi nombre en el nº 4 y sólo se reciben 5 respuestas de cada uno.
Estaría haciendo otros U$S 125 adicionales.
Ahora estas 125 personas ponen sus 200 newsgroups y e-mails con mi nombre en el nº 3 y sólo reciben 5 respuestas cada una, yo recibo un adicional de U$S 625.
OK, aquí está la parte más divertida: cada una
de estas 625 personas ponen sus cartas en otros 200 newsgroups y e-mails con mi nombre en el nº 2 y cada una recibe sólo 5 respuestas, esto hace que yo reciba U$S 3125!!!.
Estas 3125 personas enviarán este mensaje a un mínimo de 200 newsgroups y e-mails con mi nombre en el nº 1 y si solo 5 personas responden de los 200 newsgroups y e-mails mandados por cada uno de los
3125, estaré recibiendo U$S 15625!!!
De una inversión original de U$S 6!! más estampillas. FABULOSO!
Y como dije antes, que solo 5 personas respondan es muy poco, el promedio real sería de 20 ó 30 personas!. Así que pongamos un número más grande para calcular.
Supongamos que solo 15 personas responden, esto hace:
En la nº 6------ U.S.D. $15
En la nº 5------ U.S.D. $225
En la nº 4------ U.S.D. $3375
En la nº 3------ U.S.D. $50625
En la nº 2------ U.S.D. $759375
En la nº 1------ U.S.D. $11.390.625 sí, más de ONCE MILLONES DE DÓLARES!!!.
Tomé esta lista que acababa de modificar y la RE- PUBLIQUE EN TODOS LOS NEWSGROUPS Y BBS LOCALES QUE CONOCIA y esperé que el dinero empezara a llegarme, preparado para recibir entre U.S.D. $1.000 y U.S.D. $1.500 en efectivo.
Pero qué agradable sorpresa cuando todos esos sobres empezaron a llegarme!!!. Supe enseguida de qué se trataban cuando vi que las direcciones de retorno provenían de todas partes del mundo, la mayoría de Estados Unidos, Canadá y Australia!

En mi primera semana hice unos U.S.D. $20 a 30 dólares. Para el final de la segunda semana tenía hecho un total de más de U.S.D. $ 1000!!!!!
En la tercera semana recibí más de U.S.D. $10000 y todavía seguía llegando más. No lo podía creer!!!
Tienes que seguirlo y re-publicarlo donde te sea posible, cuanto más se publique y más gente lo vea, habrá más posibilidades para todos de ganar más dinero, esto determinará cuánto te llegará por correo!!!.
COMO MANEJAR LOS "NEWSGROUPS"
Nº.1> no necesitas redactar de nuevo toda esta carta para hacer la tuya propia. Solamente pone el cursor al comienzo de esta carta, haga click, lo dejas presionado, bájalo hasta el final de la carta y lárgalo. Toda la carta deberá estar "sombreada". Entonces haga click en "Edit" (Editar) arriba de su pantalla, aquí seleccione "Copy" (Copiar). Esto hará que toda la carta quede en la memoria de su pc.
Nº.2> Abra una nueva página en blanco y lleve el cursor al inicio. Presione "Edit" y del menú seleccione "Paste" (Pegar). Ahora tendrá esta carta en el "notepad" y podrá agregar su nombre y dirección en el lugar nº 6 siguiendo las instrucciones de más arriba.
Nº.3> Grabe esta carta en su nuevo archivo del notepad como un Archivo
de Texto. Y cada vez que quiera cambiar algo lo podrá hacer.
PARA LOS QUE USAN NETSCAPE
Nº.4> Dentro del programa Netscape, vaya a "Communicator" y seleccione
"Grupo de noticias", luego vaya a "Archivo" y seleccionar "Suscribir".
En segundos una lista de todos los "Newsgroups" de su "server" aparecerá. Haga click en cualquier newsgroup. De este newsgroup haga click debajo de "TO NEWS", el cual debería estar arriba, en el extremo
izquierdo de la página newsgroups. Esto le llevará a la caja de mensajes.
Nº.5> Llene este espacio. Este será el título que verán todos cuando recorran por la lista de un grupo en particular.
Nº.6> Marque el contenido completo del archivo y copie usando la misma
"NEWS" y Ud. está creando y pegando esta carta dentro de su programa o
"posting". Nº.7> Presione "send" que está en la parte superior izquierda. Y UD. HA FINALIZADO CON SU PRIMER NEWS!...
FELICITACIONES!!!

I need a range extender for my corless phone. The Tennessee countryside has limited range. I can stand in the corner of my carport and talk. Move 12-inches anydirection and I lose the signal. Ideally, a passive repeator antenna that I could install on the cornor post and direct into my house would be wonderful.

Not notarized, but my countries verified list has been on the net for a good number of years.

And as you'll recall, I've actually gone to the trouble of inviting you over to see them personally yourself.

I remember something about you saying you'd not be caught dead in Michigan!

2704. A SOLUTION FOR BAD EBAY BUYERS

Ebay's latest changes will make it impossible to prevent feedback
abuse by bad buyers. Help block bad buyers by adding them to your
block list and sharing user identities.

Hey, here's an idea! Maybe I could meet his *sister* at the *property* this
summer and show her the QSL's!

I imagine sellers like Radiomart and Gottahaveit1985 should just love
these
new feedback rules. Like I said long ago, E-Bay could care less about
Buyers and
does everything to kiss Seller's collective tuckus since this is where
they have
their bread buttered. E-Screw can go to hell for all I care. Same
thing goes
for Paypal, the USA's only non-regulated online financial institution
which is
the preffered medium for money transfers between Al-Quaada and other
terrorists.

I guess you didn't read any of the new rules, there are over sixty pages of
angry posts on eBay's own forums and everyone sees this as the seller
getting screwed mostly.

- I need a range extender for my corless phone.
- The Tennessee countryside has limited range.
- I can stand in the corner of my carport and talk.
- Move 12-inches anydirection and I lose the signal.
- Ideally, a passive repeator antenna that I could install on the
- cornor post and direct into my house would be wonderful.
-

Bill,

Cordless Phones are a Mass Produced Consumer Item (Product)

A Range Extender {Passive Antenna / Repeator} might cost you
more than {not work as well as} a new Cordless Phone that has
an Extended Range and better features.

Example : DECT Phone Repeater
http://www.home-phones.co.uk/asp/prodtype.asp?prodtype=114

What Make and Model Cordless Phone do you have ?
http://en.wikipedia.org/wiki/Cordless_telephone

What Frequency "?" 49 MHz, 900 MHz, 2.4 GHz, 5.8 GHz
http://www.vtechphones.com/vtechui/guide/dsp_cordless_guide.cfm

Cordless "Ranger-Extender" Cordless Telephone Antenna
2.4 Antenna For Seimens Gigaset Cordless Antenna
http://www.phonemerchants.com/corrantelan.html

Wintenna 624 "Gigaranger" External Antenna
for 2.4 GHz Panasonic Cordless Telephones
http://www.phonemerchants.com/exanfor24ghz.html

Wintenna 652 External Antenna for 5.8GHz
Dual Antenna Panasonic Cordless Telephone
http://www.phonemerchants.com/wi652ducophe.html

Wintenna Extended Range Antenna for
900Mhz Cordless Telephones
http://www.phonemerchants.com/exrananfor90.html

SAVE-A-BUCK - Make Your Own (DIY) :
Four (4) Feet piece of # 14 Insulated Solid Copper Wire :
* Five Turns {1/8 Inch Separation} around the Antenna of
your Cordless Phone's Base Station.
* One Foot of Straight Wire
* Three Turns {One Inch Separation} using a 1/2" to 3/4"

piece of PVC Pipe {Broom Handle} as a Coil Form.
* Remainder of the Wire Straight
* Use Fishing Line or String to Rig the the Antenna so that
it is Straight-Up Vertical and away from all objects.
-fwiw- It Costs You Nothing and may work as well
as the $60+ Ready-Made ones.

hope this helps ~ RHF

On the contrary, I'd much rather be a buyer than a seller under the new
rules. I doubt I will quit buying as long as I can find bargains, but I'm
far less interested in selling anymore with how much they skim off the top.

Properly designed systems, built with quality parts and built and
tested by skilled workers
are a very minor problem. But most real world systems are far from
properly designed, and
forget the quality parts and skilled assembly and testing.

Between BPL and the myriad of devices that either have logic controls
or switch mode power
supplies, SWLs, and hams, are fighting a lost battle.

I simply can't see my neighbors caring one bit if their shiny new
network, smart house controller,
or DSL cause me problems. After all they can't comprehend why anyone
would want to listen to
weak noisy signals.

I worked for a little over two months wrapping up, winding down, and
EMI certification lab.
Even if a device meets Class B regs, it can still be a RFI nightmare.
We only examined
"conducted emissions" which cover not only power line noise, but also
the noise into all
data/signal I/O cables.

High speed means high noise.

Good Luck
Terry

It's always instructive to compare eBay commissions with those of traditional auction houses. They typically take 20-25% off the top. One of the local houses just raised its rates to 35% on items selling for under $200.

EBay still seems cheap by comparison.

Might be why I haven't seen or even heard of a traditional auction in the area in years. My grandpa used to take me to them when I was a little kid, then one went under so we changed to another, then that one went under and we changed to another, then that one went under. That was all back before anyone had even heard of the internet.

Point taken, Mike, but eBay has much lower overhead. they don't have to
provide a physical location or a live human auctioneer.

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one...

Hit the road, drug addled fool.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

I just asked you to have the cunt send me a letter, boy.

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter* must
both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms
letterhead within the next two weeks!

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to
understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I am witty, and I am wise!

Lying 'tard boy, much like the other debutante, malcontent, faux boys
who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your
dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake
Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

>the local houses just raised its rates to 35% on items selling for under
>$200.
>
>EBay still seems cheap by comparison.
>Mike Schultz

Ah is this your local auctioneer that spends his money for advertising and his people or he himself gets the stuff all in order to sell... comes and picks it up.. hauls it to his auction house.. then gets up there and sells it? ...Sorry but thats NOT a fair comparison to the service that FleaBay offers...

With FleaBay your at about 15% or so for low priced radios that only includes the ebay and paypal costs... add in the packing materials and it gets to be more yet... don't want to hear you say... YaBut you add for the packing on top of the bid... don't think so... all you really did was cut the bid as the buyer is only looking at the total cost... bid+pak+ship

Anyway... hope ebay falls on their butts over it.

Lets see how it goes... "Radio" category this evening had something in it like 5600 items, completed auctions radio had 13K auctions total...

We should at this time of year be seeing increases in quantity listed.. Be real interesting to watch the month of March and April...

Im still wondering exactly what kind of danger it really incurs. The disintigration of the space shuttle a few yrs ago didnt wreak much havoc. Most of the pieces were relatively small. And, as I recall, it was much bigger than a bus.

for this California Election and that he 'likes' Ron Paul.

All I Can Say To Anyone Is : JUST VOTE ! ~ RHF

Ya, just vote, vote and vote. Oh Boy, my favorite time of the year!!!

I'm getting ready to vote, filled up the pickup, got three nice shirts
ready, one for each pole. AND, I get to meet all those nice Pole Workers.

What I like the most is the little sticker that says "I Voted". I put them
around my computer monitor so I can be proud of what I did, "Help The Good
Old Boys".

> What About "BAD" eBay Sellers ?

LOL...that is what I was thinking also.

"EBay is seeking to reverse slowing revenue growth in its
marketplaces
business, which is roughly half the level of three years ago. "

Please explain how bad buyers caused this?

Bad sellers have poisoned the well...and without trust, buyers will
not spend their money.

TMT

"Report: Future Of U.K. Digital Radio May Be Bleak"

LONDON -- January 30, 2008: A report from Enders Analysis found that digital audio broadcasting, or DAB, is in trouble due to the high cost of transmission and slow revenue growth, U.K. newspaper the Guardian reports.

The report, the Guardian says, urges radio to "stop continually beating its chest in public about the wonders of DAB and instead partake in an honest industry debate about the future of the platform."

DAB digital radio in the U.K. is not the same as the in-band, on-channel HD Radio platform used in the U.S. The BBC began testing DAB in 1990, and it's now estimated that 90 percent of the U.K. population has access to digital radio. While the DAB platform shares some characteristics with HD Radio, including multicast capability, data transmission, and decreased interference, low transmission bitrates mean U.K. DAB music channels are heard at less than FM sound quality.

The Enders Analysis report continues, "With three of the largest radio groups having reduced their commitment to the DAB platform in recent months ... the future health of the DAB platform must be under question." GCap, UBC, and Virgin Radio have all shuttered digital stations, says the Guardian.

"The exodus of stations from the DAB platform is starting to look like a stampede," says the Enders report. It concludes with a comment from Local Radio Company chief Richard Wheatley: "DAB is the Betamax of radio."

- Oh yea, iBiquity! Oh yea, Eduardo! LMFAO!

DOH ! - I would venture to say that d'Eduardo CGARA
about the DAB Eureka 147 System in the UK.

I think I missed the part in the by-laws where it says you must own a SW radio in order to participate in this group. As for me - I can't buy anything until I get my General and probably would be better to wait until I have my Extra. And I have appreciated the posts on this specific newgroup when I have asked questions about the exams and so forth.

HOWEVER, I find all this off - topic verbose banter Far better, I assure you all, than anything currently on t TV on Wednesday nite at the 8 o'clock prime time hour. So, for that "almost free form of entertainment" I do thank all of you - those of you who have clueless posts and those of you who stick, more or less, to the topic of SW radio. Have a pleasant evening.!!!

Yes you have. You claimed they were weak signals and would have noise so people don't listen to them. This all started with your 3 stations in any market dictum and I responded with like 11 stations. You would say nonsense, those stations were noisy and that is why people don't listen.

You saw right through my ploy. No flies on you, R.

May I call you R?

As for 'Scoring' with Telamon, I'd rather leave that feat to the abnormal, sexually confused segment of this group.

They're so weird that they commonly use the word 'Pantaloon' in daily conversation.

mike

This news group is for SWL's. There are plenty of other news groups
dedicated to various aspects amateur radio. You don't need a license to
buy a receiver.

It helps to have a clue though and Mikey does not have any. Maybe you
can help him.

Just speculation on my part (seeing as 'they' ain't talkin'), but what
if it's not the size of the material but the material itself?

Can you say 'Plutonium' or 'U-235' from the power supply?

Sure you can! :-)

Doesn't anyone remember when the disintegrating Cosmos 954 satellite
dribbled a 600 km path of radioactive material near Great Slave Lake in
Canada in 1978?

I agree, selling low end stuff on eBay is not a great way to make money, and never has been, except maybe those rare "hit the lottery" sales when buyers go nuts and overpay for something. Otherwise, it's just too much work to make it worthwhile.

Their fees are much more reasonable for higher priced goods. If you sell something in the hundreds, your costs are down around 7.5% (including PayPal), which is quite reasonable, considering the worldwide exposure eBay gives you. The upcoming fee hike in the $25-$1000 range is 0.25%.

The nice thing about a live auction, as a seller, is that the stuff never comes back, it's gone forever. No feedback, no chargebacks, no nit picking, no griping!

. Same
thing goes
for Paypal, the USA's only non-regulated online financial institution
which is
the preffered medium for money transfers between Al-Quaada and other
terrorists.

without defending either business, do you have any facts to back up what
might seem to be libellous? Where is the use of paypal to transfer money to
or from AlQuaeda documented? Where can I read this with verifiable backup
data?

odd, over all my sales, the ebay fees are around 8 percent - I wonder what
you do differently? Paypal costs are around 4% - but not everyone uses
paypal, and there are some real savings to it (like actually getting paid
promptly)

Some of those NASA people and at least one or two or more retired Astronauts were here in Jackson today.One of those guys was talking about Mississippi's contributions to NASA.(there was a short short vido clip on WAPT tv news about that. www.wapt.com A retired Astronaut guy mentioned that all of the Space Shuttle rocket motors/engines are tested at Stennis Space Center in Mississippi.Old news to me, I have known that since the 1980s.Other, new Rocket motors/engines are being tested at Stennis Space Center too for the next generation of Space explorations and thingys.The Space Shuttle program will be retired in a couple of years or so.

Yep, they have us by the short hairs, and this will be the case until
something better comes along, which aint likely.

Name another website where the average person selling items can get as
much exposure, as easily, and in most cases get as much for his / her
items? If one existed, I am sure eBay would be more competitive.

It does not, and they are not...

Dan

Can I jump in here and say what great auctions Rich ESTES has (and does for radio clubs like MARC as well). If you can get over to his OHIO locations, they are still great auctions several times a year!

His site has the next auction listed PLUS several special past ones... with many pictures! Rich archives these as a service to collectors. Go here: www.estesauctions.com

I notice he is now charging a 5% fee to the buyer.

Still a great way to buy radios. Normally he does about 5-8 large radio auctions a year. This past year, and I think this upcoming Extravaganza in Lansing, Rich will bring up to 50 radios into our regular club auction to augment it.

Mark Oppat

The one and only negative I have came from a nonpaying putz who no longer is a member- at least with that user id. The new rule will marginally help me there. Having worked for a large corporation once, I know that *bay's moves are carefully calculated to enhance their bottom line. Any collateral damage is not that important since collateral damage is taken into account when all these changes are made. No doubt the biggest sellers will have the greatest voice. The little guys will get squeezed out just like at the local flea market that has been overrun with pros selling imported kitsch.

Burr,

(OT) : Winning the US Presidency in 2008 :
The Democrat Party -versus- The "Clintonistas"

The Democrat Party faithful like Kerry and Kennedy want
Obama so that the Party will control the White House.

The "Clintonistas" want Hillary so that She and Bill will
Control the White House and the Party :
http://www.clintonistas.com/
To many in the Democrat Party "The Clinton's" represent a
Cult of Personal Power like Eva and Juan Peron in Argentina.
http://www.fsmitha.com/h2/ch24u.html

IMHO - It is better for the Nation and the Democrat Party
that Any Body but Hillary become the Democrat's 2008
Presidential Candidate.

-IF- The Republican Presidential Team in 2008 is turns out
to be McCain and Giuliani :
* They are a One-Two-Combo that is Tuff-to-Beat on a
"Likeability Index" with so called Independent Voters.
* With McCain and Giuliani the Republicans need one
thing Hillary at the Top of the Democrat Presidential Ticket.

* Hillary will assure that All Republicans including Christians
and Conservatives Come-Out-and-Vote for McCain and Giuliani.
* Back to the Independent and Undecided Voters Hillary's
Negatives causes Her to LOSE the "Indys" two to one against
McCain and Giuliani.

A Winning Democrat Presidential Ticket in 2008 does NOT
include Hillary Clinton at the top of the Ticket.

A Winning Republican Presidential Ticket in 2008 INCLUDES
Hillary Clinton as the Democrat Candidate for President.

Saving The Democrat Party in 2008 : Barack Obama can save
the Democrat Party and potentially become the next US
President with the Right Running Mate : Any Body but Hillary.

They Swift Boated Kerry in 2004 : Imagine What They Could
Do With Hillary In 2008. {They have had 4 Years to Prepare.}

it's a 'vision' thing ~ RHF
.
-ps- Telamon be sure to Count* this as another one
of my 'Clueless Posts' -cause- IT IS ! ;-{
* Please I Need Your Votes & I Want Your Votes ! !
I this Weeks Race for the RRS "Clueless Troll" Award.

"HD signal wreaks havoc with analog radio"

"If you're having trouble lately pulling in a good signal from your
favorite radio station, it's not just that your radio dates from
Marconi's heyday. Radio signal interference has become a big problem
in Metro Detroit since the advent of HD (high definition)
broadcasting."

http://www.detnews.com/apps/pbcs.dll/article?AID=/20080131/OPINION03/801310429

SWEET - this will get the attention of the automakers!

"Report: Firms back spending freeze.
The Wall Street Journal quotes sources as saying a memo detailing Clear
Channel's first quarter spending freeze was "approved" by Bain Capital
and Thomas H. Lee Partners. The Journal says the firms "helped draft"
the memo. The company declined to comment. The paper says the two equity
firms "have dispatched a large team of consultants and other experts to
San Antonio to help run the business."

-insideradio

(Apparently Bain has no confidence in the Mays' ability to run the
properties)

No, it wasn't. I had spent the first part of the year in Mexico and
travelling Central America, Colombia and Venezuela.

P.S. A convention takes about 4 days, including travel.

It was an estate settlement... with the whole property going from my
mother's estate to my sister. Feel free to look it up. "Indigo Reach" on
Fire Lane 7, Omena. It included donation of the shared interest of a
"barrier property" to the Leelanau Conservancy.

Well, boy, I'm now making fun of your manner!

Prove it. Post all your QSLs on the internet, notarized.

Can't do it, can you, boy?

Terry/SWLer,

EMI and Emissions: Rules, Regulations, and Options
<http://www.edn.com/contents/images/81915.pdf>

Wow 7 Pages and all too Technical for my little Brain
to Absorb in one Reading : So I will have to go back at
least 2~3 times to get a better understanding of it all.

Why not Tighten-Up the RFI/EMF/EMC Part 15 Regs by 1/3
for 5 Years; and then tighten that up by another 1/3 of that for
5 Years; with with a final 1/3 of those. Over the course of 15
Years you would end-up-with a new Reduced RFI/EMF/EMC
Level-of-Acceptance that would be 30% of the current Standard.
Allows for long term Product and Process Improvement over
a normal Manufacturing and Technological Change Cycle.

IMHO - Practically speaking for the average Consumer that
uses Over-the-Air TV and AM/FM Radio along with Cable TV
and Satellite TV/Radio the Standard has NOT Changed. The
only significant RFI/EMF/EMC Improvement for them has been
the migration to and the use of Quad-Shield RG-6 Coax Cable
from the old Single Shield RG59 Coax Cable.

Hey, I wish the FCC would just start by enforcing the current
regulations.
It will do no good to have tighter regs when the present ones are
ignored.
The FCC allows companies to "certify by design", that is if they tweak
their simulator (SPICE, PSPICE) and get a 'clean' bill of health, they
get to tell the FCC they are compliant.

As to "over the air radio and TV" they are dead or dieing medias.
Sad but true. In the Lexington area over 90% of the homes have
cable TV.

Most of the electronic garbage does pretty well at VHF and up, but
fail badly in the below 30MHz spectra.

Even this article, as informative as it is, misses maybe the biggest
culprit. Any device that bridges two or more conductor classes is
almost certain to be a RFI problem.

By classes of of conductors I mean:
AC mains and telephone; Modem, Answering Machine, Pay Per View Box
AC mains and RF (cable or antenna or satellite): decoder/receiver, TV,
VCR
AC mains and ethernet: PC with network, Hub/router

I hope you get the idea. I know for certain the FCC requires EMI
limits on all
conducted emissions, but from what I have been able to find out,
almost no
one tests their devices with all of the ports connected as they would
be
used.

The Zen V and V Plus (2G and 4G respectively) are nice units but a tad
delicate.
My display died, but the unit still works strong. I know of 10 people
who have them
and only one had his die and that was after a nice wash, rinse and
drier cycle.

The price is comparable but the iRiver X20 may have the advantage in
the SDRAM slot

Have you hear any reviews about how stout the display on the X20 is?

2856. The February issue of Popular Communications

Newsgroup: rec.radio.shortwave
Date: 2008-02-01 04:07:13 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-0C509E.20071331012008@newsclstr02.news.prodigy.com>
Source record: 135824

I was looking for Monitoring Times but apparently my local Barns & Nobles is to lame to carry it anymore. I did find an issue of Popular Communications though.

On the downside one piece in the magazine read like what a Nancy Drew story must read like. Just awful filler. On the plus side there is a worthy article on propagation. Most of the magazine is dedicated to scanning though and generally uninteresting to me. Then there is the Ham Discoveries. On the whole you can't quibble with what was written except that the guy does not mention having tuning capability at the antenna instead seeing no problem with the standard operating convention of having a tuner in the shack. I don't get the ham community at all. I know that auto-tuners exist for crummy antennas on automobiles and boats so why not antennas at home? You would think he would promote remote tuning of the antenna and also matching if needed. A major thrust of the article was about efficiency after all and not needing to use amplifiers. Same old ideas you could read in an article written decades ago.

> promptly)

I generally like Paypal, but for things over a couple hundred dollars, I won't use it, the percentage they take is just too great. It stinks for very small amounts too, I had someone send me a buck for postage, and Paypal skimmed off 33 cents! Sure it isn't much money, but it's 1/3 of what they sent! It irritates the heck out of me on principal.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area.
Telephone lines present a potential shock hazard. Do not use this antenna
for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving
antenna. Performance will vary depending on the kind of phone line you
have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally
pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting
the phone line directly to the receiver, try wrapping the phone cord
several times around the receiver's telescopic whip antenna instead.
Performance may not be as good as a direct connection, but it will
probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought
much about it because thunderstorms are rare in my area. Most phone lines
have lightning arrestors on them where they enter the house, but the
lightning arrestors may pass enough energy during a lightning strike
damage a receiver. My suggestion is to disconnect the antenna when not in
use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and
receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)
| http://www.iceradioproducts.com/filtersrf.html#bcb
|
```

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit
| http://www.iceradioproducts.com/reconly.html#Beverage Matching

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

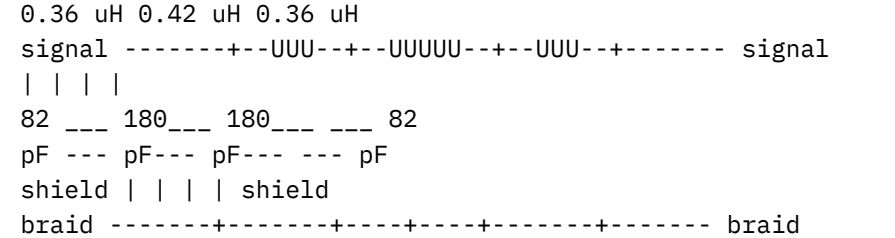
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

Parts for the filters can be obtained from the following source:
http://www.digi-key.com/

Mr RHF:

I'll have to take exception to "Better Sounding" radio. I stopped listening to my Sangean unit several weeks ago as I found myself grinding my teeth after the 2nd half hour of listening to the FM HD and especially the AM HD.

It is flat and bland sounding. I used to listen to my favorite station in AM stereo, but when the switched to HD I purchased the Sangean. What a waste of money. I guess the person that robbed my house must have known this two weeks before Christmas as they ripped off my old Kenwood reciever that was buried in mass of cables were it was hooked into my computer, but left the Sangean unit which was just setting on my shelf right next to the computer.

The Sangean has good sensitivity but left out the ability to shut off the HD portion of the signal, so now I am using my Palstar R30CC to listen to AM and the Radio Shark to FM.

I thought that HD would be just as good as DRM. Especially Radio New Zealand's DRM service, but at least the local stations here truncates the Highs in favor of the Bass. It is definitly inferior to the Internet's offerings even though I have only dial-up service as of now. The main complaint I had with DRM is the Drop-outs, but they are less than my Dial-up service internet audio offerings.

I have been reading the British DAB newsgroup experiences. They have the same complaints with Digital radio. Definitly below what was promised. If my favorite station changes format to talk radio, I am go switch to Satillite radio as I don't have enough money to purchase the amount of CD's to keep me from being bored to death while driving.

I don't care what Mr Eduardo states about a listenable signal as the only requirement for great ratings. It is content that causes me to listen. That is why I like Short-wave, plenty of different formats, but unfortunitly, it is hard to pick up in my Jeep.

Maybe, if Wifi becomes city wide, I might switch to that, but since the Tucson city concil can't even agree if the should try to cover the downtown, I not going to hold my breath.

If the decide to shut down the analog signal with no improvement on sound of the content, then satillite will definently have another customer, or my car will no have a radio.

Ken I.

I use one for VLF/LF. Imprtant to get it as high and far from metal as
possible. I have used one in my attic in the past with good results. It is
now mounted to a pole fastened to one of the vent pipes.

>promptly)
>

Well it depends on the price of the items your selling. Saw something that said... 8.75% to ebay for items in the 25 buck range. Now if that item is 25 bucks for the auction price and the shipping on it is also 25 bucks. Now your going to get 50 bucks into your paypal account. Paypal gets its 3% from the WHOLE transaction. So that becomes 6% of the actual 25 buck bid price. making you now OVER 15% add in the 25 cents in addition to the 3% or if its an international sale then PayPal becomes 5% ... which would be 10% plus a quarter on the 25 buck auction... but since its now an International Auction the shipping is no longer 25 bucks now its maybe $100 shipping... so PayPal becomes 5% of $125 ... or $6.50 add in the 8.75% that ebay got is $2.19 for a fee total of $8.69 for your total cost on the 25 buck auction.... guess that makes this one about a 34% total cost of sale.... would be better off just donating that item to Goodwill and take tax deduction me thinks.

John k9uwa / W4

2872. What About - The LF Engineering H-800 "SkyMatch" Active Antenna ?

-

K9KZ,

The LF Engineering H-800 Skymatch Active Antenna works
very well and as "DLW" points out putting this Active Antenna
on a 3~5 Foot Pole that is attached to a Vent Pipe coming out
of the Roof can place your Active Antenna up out of the Noise
Envelop of your House and Attic.

LF Engineering H-800 "SkyMatch" Active Antenna
http://www.grove-ent.com/ANT15.html
* Covers : Longwave {LF} + AM {Medium Wave} + Shortwave {HF}
+ VHF from 10 kHz through 50 MHz
http://www.lfengineering.com/pdf/H800inst.pdf
* The Active Antenna Probe is just 26 Inches Long
with a One Inch Diameter {Dark Grey PVC Pipe}
http://www.lfengineering.com/products.htm

Safety - Insure that you have a good earthen Ground for your
Radios and Equipment with all Outside {External} Antennas.

TIP - With most Active Antennas you try and Locate them :
* Up and In-the-Air above the House/Building
* Out-and-Away from the House/Building
* * Both ! :o)

Here are Three Messages to Read :

Ken I. - Thank you for the Post and your insight into HD Radio;
plus sharing your HD Radio experiences with us.

Sorry to hear that someone 'ripped-off' your old Kenwood
{AM Stereo?} Receiver.

Yes - I have noticed that the Radi-Osophy HD100 Radio is
very 'bright' sounding in "HD" AM/MW Stereo ~ RHF

Fascism, by definition, is the opposite of Liberalism. Fascism is when
the president wears paramilitary garb and says God tells him who to invade.

david, David. DAVID !

Liberalism is a Code Word for Socialism.

Socialism is a Code Word for Communism.

Communism is in-fact a Totalitarian Socialist State.

The Totalitarian Socialist State -is-a- Fascist Socialist State.

. . . and It all Starts in the Name of "Liberalism"

2880. Re: Phone line as SW antenna [12-Jul-06]

Newsgroup: rec.radio.shortwave
Date: 2008-02-01 14:06:50 UTC
From: mc <look@www.ai.uga.edu.for.address>
Message-ID: <QHFoj.77211$rc2.21522@bignews1.bellsouth.net>
Source record: 135748

I don't think a single 0.01-uF, 250-volt capacitor provides sufficient isolation between the phone line and the radio. I would use a much smaller capacitance.

Ringing voltage is typically 100 V, 20 Hz. Audio is typically 2 V, 2000 Hz. We want to keep both of these out of the radio, and yet have fairly low reactance at 2 MHz and up.

This is a rough back-of-the-envelope calculation, of course.

At .01 uF, capacitive reactance is...
Xc = 1/(2*pi*F*C)
800 k ohms at 20 Hz
8 k ohms at 2000 Hz
8 ohms at 2 MHz

I would go with 0.001 uF (= 1000 pF) or even less, maybe 100 pF.

At 100 pF, capacitive reactance is 100 times higher:
80 megohms at 20 Hz (ringing voltage is very well blocked)
800 k ohms at 2000 Hz
800 ohms at 2 MHz

For a receiver with a relatively high input impedance, 100 pF is fine. For one with a lower impedance (to match 50 ohms, for instance), 1000 pF is better.

Either way I'd use a 600-volt (not 250-volt) capacitor in order to have a lot more "headroom" in case of lightning, etc.

AND THERE IS A SIMPLER WAY. What happens if you connect your receiver's antenna cable to a piece of wire which you wrap around the telephone line, without a direct electrical connection? This should give you something like 10 to 100 pF of coupling with absolute electrical safety.

If you are going to couple to your radio directly versus using an
insulated wire wrapped around your whip antenna ['gimmick' capacitor],
then a 600 volt capacitor is a good idea. The -nominal- firing voltage
of the telco protector on the side of your house or in your basement is
around 600 volts -- which is to say, it passes along everything below
600 volts. Which is to say if you had a 250 volt capacitor, possibly
bye-bye radio front end.

2890. The Way to Paradise

Newsgroup: rec.radio.shortwave
Date: 2008-02-01 19:47:08 UTC
From: algagaa <jipksaman@gmail.com>
Message-ID: <9b6bd513-f79a-4242-9420-0fbd3f695294@f10g2000hsf.googlegroups.com>
Source record: 135758

We are all in quest of true happiness. In this world, the idea of true/perfect happiness is not feasible because this world is inevitably doomed to total annihilation. True happiness is found only in dwelling upon Paradise, and enjoying its blessings. However, none would enter Paradise except the purified (those who are void of sins, void of an atom of grudge or malignance). Since Paradise is created only for the purified/pious, those who have evil looks (looking lustfully at strange women, and vice versa), who envy others, treat their fellowmen badly, hate mankind, or backbite cannot enter Paradise. To conclude, none can enter Paradise unless totally purified (sin-free).

Those who indulge in illegal talk (backbiting, using indecent language, etc.), or have sinful hearts are denied entry to Paradise. Allah (The sublime) said: "And those who kept their duty to Lord (AL-Muttaquin) will be driven/led to Paradise in groups, and when they reach there, its gates will be opened (before their arrival for their reception) and its keepers will say: Salamun Alaikum (peace be upon you)! How blessed you are (being sin-free and having done well), enter here (Paradise) to abide therein eternally." Surat Az-Zumar/The Groups: 73.

In another Surah, Allah says: "Those whose lives the angels take while they are in a pious state (pure from all evil, and worshipping none but only Allah) will be addressed as such: Salamun Alaikum (peace be upon you) enter Paradise due to that which you used to do (during your mortal life/in the world). Surat An-Nahl/The Bees: 32.

The above-mentioned verses set the condition that, in order to enter Paradise, we have to be sin-free and void of an atom of guilt! One may argue that since we are all sinners, it seems that none can enter Paradise!

Well, it is true that only the pious can enter Paradise, but, Allah (The Glorified), with His vast mercy, established eleven means to help us be purified: 4 in this world, 3 in the grave, and another 4 on the Day of Resurrection. These eleven means of purification aim at enabling us to cross/walk on the straight path rather than to slip and fall. This path is stretched over Hell fire and it is finer than a hair and sharper than the edge of a razor/sword!

Knowing the nature of the straight path, one may question how people would tread on that path! Well, some will cross/walk on it as fast as the blink of an eye, others will be as fast as the light, others will be as fast as the wind, others will crawl, and others will cling to the path, then the angels will lead and/or encourage them onwards

(lest they should fall into Hell fire), while others will be snatched by the hooks (attached to the path) to ensure/hasten their fall into Fire.

4 Means/Standpoints of Purification in this World

1. Repentance:
Repentance is not limited to asking for forgiveness or invoking Allah's mercy, rather, it is one of the greatest religious rituals to win Allah's love/satisfaction and a means to get closer to Him. Allah (The Sublime) says: "Allah loves those who turn unto Him in repentance and loves those who purify themselves (by taking a bath and cleaning and washing thoroughly their private parts/bodies (in preparation for their prayers)". Surat AL-Baqarah/The Cow: 222.

Repentance removes sins, as Allah (The Sublime) says: "And verily, I'm indeed forgiving to him who repents, believes in My Oneness, and associates none in worshipping with Me, did righteous good deeds, and then remained faithful to such belief and good deeds". Surat Ta-Ha: 82.

Repentance changes evil deeds into good ones. Allah (The Glorified and The Exalted) said: "Except those who repented, believed in monotheism, and did righteous deeds; for those, Allah will change their sins into good deeds, and Allah is Oft-Forgiving, Most Merciful ". Surat AL-Furqan/The Criterion: 70.

2. Asking for Forgiveness:
We (Moslems) should always ask Allah to forgive our sins (whether remembered or not). Allah's Messenger (PBUH), though being the most pious, endowed with the most knowledge of his Lord, and having had both his past and future guilt pardoned/forgiven (by Allah), he used to ask for Allah's forgiveness as many as a hundred times a day (an action that won't take more than a minute of your time). In this respect, the prophet (PBUH) says: "I swear by Allah, I do ask for Allah's
forgiveness more than 70 times a day". This Hadith is quoted by AL-Bokhari.

Also, Bin Omar (the son of Omar)-may Allah be content with them all-said: we used to count for the messenger of Allah (in one session and before leaving his place) as many as 100 times saying: "O Lord! Forgive me my sins and accept my repentance, you are the One Who accepts repentance, the Most Merciful". This Hadith is quoted by Abu Dawoud and AL-Turmuzi.

3. Good Deeds Remove Bad deeds:
Change bad deeds with good ones because Abu Dhar Ibn Jundub and Abu abdulrahman Bin Muaz Bin Jabal (may Allah be content with them all) narrated that the Messenger of Allah said: "Fear Allah wherever you are and be keen to always change your bad deeds with good ones, and be nice to people." This Hadith is quoted by AL-Turmuzi.

Allah also said: "And perform As-Salaah (the daily five prayers) at the two ends of the day and in some hours in the night. Verily, the good deeds remove the bad ones. That is a reminder to those who always remember Allah (in prayers, while standing, sitting, or lying down on their sides)". Surat Hud: 114.

We must endeavor to do good deeds (no matter how simple they are). For example, we can replace "Hi" and/or "Bye" (even these two simple words are considered as "Good Deeds") with As-Salamu Alaikum and utilize our leisure time by always remembering Allah at all times (standing, sitting, eating, sleeping, working, driving, etc.).

The Messenger of Allah (PBUH) had always the desire to do a lot of good deeds (on a daily basis). For example, he refused to accept a present (a camel as a means of transportation) from his best companion (Abu Bark) for free, and insisted that he share its cost, thus hoping to be worthy of winning the reward of AL-Hijra (immigration to Medina).

We, likewise, need to do good deeds (not in quantity but in quality). Good deeds are best manifested in being wholly dedicated to your parents (especially in their old age) praying in the late hours of the night, praying in the early hours of dawn
time, wearing the veil, and performing work perfectly.

4. Purifying Calamities:
Allah puts His servants under severe tests (in this world) to have them purified from their sins and to enter Paradise sin-free. However, some people (not realizing the wisdom of such plights/tests) lament their destiny by saying; "O Lord, why have You ordained us (especially us) with such calamities?"

Those who did not repent, did not ask for forgiveness, did not do good deeds, and/or were not put to tests (i.e., not purified) in this world still have another chance for purification and that will take place in their graves! Thus, missing purification in this world (while being alive) will be completed in one's grave (while lying dead)! And that shows how great this religion is, as you won't be left but sin-free (either in this world or while lying dead in your grave).

To conclude, due to Allah's vast mercy and the simple demands for entering Paradise, we can say that none (of the Moslems) will enter Fire, (i.e., or more accurately, they will not abide there eternally).

3 Means/Standpoints of Purification in the Grave

5. The Funeral Prayer
In this prayer, it is not the number of those standing behind the deceased (in a mosque) performing due funeral prayer that counts, instead it is the quality of the true believers who are present in this kind of prayer. The sincere supplications that come from such believers (in such congregations) will benefit the deceased.
Though being dead, sincere supplication will greatly help the deceased to be purified for Paradise.

6. The Trial of the Grave
Trial of the grave is best manifested in the questions asked by two angels (immediately after lying the dead in his grave): Who is your Lord? What is your religion? And what do you think about the man who was sent amongst you? (Referring to Allah's Messenger, PBUH). Other examples are: your fear facing these two angels, being alone in the grave (nobody there to support you), the darkness of the grave and, finally, your fear as you are enclosed therein. These trials are other means to remove all of our sins.

Those who have already been purified (while alive in the world) will not be subject to other trials (while lying dead in their graves.)

The prophet (PBUH) says: "A grave is either an orchard for Paradise or a pitfall for Hell". To conclude, a grave is not (as it is thought to be) a hideous dark place for beasts; on the contrary, it could be an orchard for Paradise!

7. Contribution of the Living to the Dead:
When a Moslem dies, he can still have his sins removed by the good and sincere deeds dedicated to him by the living (especially from his relatives). The Ulamah (the religiously lectured of the nation) unanimously agree that all good deeds done by the living such as performing pilgrimage, Umrah (the visit to Al-Ka'ba in Makka), and sincere supplications do reach the dead only to purify them and then be sin-free.

In this respect, Abu Hurairah (one of the prophet's, PBUH, companions) said: The Messenger of Allah (PBUH) said: "When the son of Adam dies, nothing will benefit him except one of the following three good righteous deeds: a non-stop Sadakah (charity), some kind of knowledge he left behind (useful to society), or a sincere supplication of his son." This Hadith is quoted by Moslim.

Therefore, if someone (who is really dear to you) is dead, you can perform pilgrimage, do Umrah, or pay Sadakah on their behalf (so that they become sin-free). Remember that the more useful the Sadakah to society is, the more the reward is, (needless to say that you will have your share as well).

To realize how merciful/great this religion is, it is important to know that somebody (while lying dead in his grave) can be freed from suffering/torment by the supplications of others who wish the deceased to be purified and sin-free for entry into Paradise.

4 Means/Standpoints of Purification on the Day of Resurrection

8. Horrors on the Day of Resurrection:
Seeing the sun folded-up, the stars fall (after loosing their light), the seas blown-up, and the earth shaken with its (final) earthquake are all sin removers.

9. Standing Before Allah (The Glorified, The AL-Mighty):
Another means to purify us from our sins is standing humbly

before Allah in an attempt to answer/face His following questions/ blame: My servant, didn't I bestow you with My blessings? Didn't I give you wealth? Weren't I the Watchful when you had illegal looks (Men looking lustfully at women, and vice versa, or at whatever you shouldn't)? Weren't I the Watchful when you used indecent language (thus misusing communication with others? Allah then keeps addressing His servant as saying: My servant, you have underestimated the day when you stand before Me! Were you fearless of the notion that the time will come when you stand before Me! You have put on beautiful masks (before all people) only to come before Me with the worst in you! My servant, what made you fall into deception (ignoring that I Am the Watchful)?

10.Allah's Amnesty:
This is the greatest means in purifying us from our sins. Just as the prophets have already interceded, as did His Messengers and as did the believers, Allah (The Glorified, the Sublime) says: Wouldn't I?

Even knowing that we can all enter Paradise, there are still those who will fall off the path (for they deserve it). Others will not be purified even after passing through the above-mentioned eleven means of purification! They will fall into Fire, as they are sinful as well as guilty of committing foul/bad deeds, full of hatred and ever holding on to grudges. And the only way to purify such sinners is to let Fire do its job (similar to a piece of gold, which doesn't get its purity unless it is put into fire for the period required to make all other alloys vanish! In fact, the more it stays there, the greater its purity gets!

Likewise, whoever eventually falls into Fire will stay there long enough to become purified (depending on how sinful he is). Immediately after being completely purified (after dwelling in Hell for some time), the angels will greet him saying: "Peace be upon you, dwell here (in Paradise) forever."

In conclusion, in this world we own three of the means of the above-mentioned eleven purification standpoints: repentance, asking for forgiveness, and performing good deeds to remove the bad ones. Therefore, let's make as much use of them as we can
(while we are still alive/before it is too late).

Remember that if you are a true believer (paying duty to Allah, believing in monotheism and associating none with Allah in worshipping), you will not suffer the trials in your grave and/or the horrors of the Day of Resurrection.

(May Allah Bless You All)

Interesting read. Seems like the people that go missing in these areas - are always the experienced pilots. Maybe those are the only ones that get media coverage. Feel bad for his family he left behind.

My comments on Ramsey's article:

"HD Radio technology company iBiquity Digital estimates about 200,000
HD radios were sold last year [2006]..."

"Finally some hard numbers on HD radio sales: 330,000 sold in 2007, up
from 40,000 receivers in 2006."

So, which is it - 200,000 HD radios sold in 2006, or 40,000? What's
needed are a couple of well-respected independent auditors to get a
"real" count of the actual number of HD radios sold, where money

actually changed hands, and not counting "trade" purchases, returns, and HD radio giveaways by stations and car dealerships - the actual number of "Joe Blow" consumers that bought and kept HD radios. No doubt, the number would be much lower. Do we remember the HD/QVC sales fiasco, where only 200 HD radios were reportedly sold - I bet, that half were returned. Could this be a count of HD Radio chipsets produced and HD radios manufactured? Is it realistic to assume, that retailers are still reporting back the dismal sales numbers?

Finally, here is proof to the contrary:

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"Retailers say no one is buying HD radios in South Texas despite scattered attempts by broadcasters to promote the digital signal technology..."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"HD Radio Has Yet To Take Off"

"But the technology hasn't taken off as expected. NBC 5 could not find one person who owns a hi-def radio and neither could KISS FM's program director. I don't know anybody that has one yet, Davis said."

http://www.nbc5i.com/technology/14878368/detail.html

"High-def radio is here, but is anyone listening?"

"But 19 Utah stations are broadcasting 31 high-definition radio channels with six more coming soon... It seems the stations are investing in technology the public isn't quite ready to embrace.... Some have heard it referred to but never had cause to get one. Unless you are a gadget person, few of these radios have sold."

http://www.sltrib.com/technology/ci_7852904

"HD's here. Who's listening?"

"But consumers haven't exactly been stampeding to electronics stores for the new HD Radio sets that are required to tune in the digital signals."

http://www.twincities.com/business/ci_7991990?nclick_check=1#recent_comm

> cuhulin

How-to-Say : NEVADA {Nevăda} => http://en.wikipedia.org/wiki/Nevada
Per WikiPedia - "Although the name is derived from the Spanish
word 'Nevada', which is the feminine form of "Covered in Snow",
the local Pronunciation of the State's name is not IPA: [nəˈvɑ.də]
(as in the "o" in "odd"), but IPA: [nəˈvæ.də] (as in the "a" in
"glad").[4]
In 2005, the State of Nevada issued a specialty License Plate
via the Nevada Commission on Tourism that Lists the Name of
the State as 'Nevăda' to help with the Pronunciation problem."

2902. Antenna Balun question

Newsgroup: rec.radio.shortwave
Date: 2008-02-01 23:00:29 UTC
From: Neil <neil@nowhere.net>
Message-ID: <gp87q3p0pi92capq02n9ked67i0h4n187s@4ax.com>
Source record: 135770

i have a 80 foot longwire, attached to the center conductor of a coax which then leads into my house and to my reveiver (NRD 545). The coax shield is grounded at the entry point into my house..

I have no balun between the longwire and my coax. So my question is would a 9:1 balun give me any SIGNIFICANT improvement in signal level or in noise reduction?

Let's wax nostalgic about some of our great liberal/socialist leader,
Mao, Stalin, Castro. And let's not forget the most prominent member of
the National Socialist Party. The vegetarian that wanted to outlaw
public smoking. Yes, good old Adolph.

I'm sure your specific results may vary, but I can tell you that when I added an RF Systems MLB (Magnetic Longwire Balun) between my long wire and the coax, the results were dramatic. Not cheap - about $65 as I remember - but worth every penny. I have two antennas, both long wires, and have one on both. The improvement is huge.

I'm still trying to figure out where and when 'socialist' got equated with
'liberal'.

Liberal is supposed to mean allowing liberty. Socialism, where it may be in
theory a utopian social structure (but will never work as long as mankind is
involved), it does not equate to liberty. Instead it equates to individual
and group responsibility and work to better the lot of the society. It's
sort of anti-liberal.

As far as the so-called socialist and communist governments vs. the fascist
ones, there is really no difference as far as freedom is concerned, or the
average person getting screwed over... the only difference is who the
taskmaster is, and where the money aggragates.

If you are worried about the voltage rating of a series capacitor and how it protects your radio from transients, you may want to consider what kind of protection, if any, it actually gives.

Exxon Posts Record Profits on Oil Prices
Friday February 1, 4:48 pm ET
By John Porretto, AP Business Writer
Rising Oil Prices Help Exxon Mobil to U.S. Record Annual, Quarterly Profits

HOUSTON (AP) -- Exxon Mobil Corp. posted the largest annual profit by a U.S. company -- $40.6 billion -- on Friday as the world's biggest publicly traded oil company benefited from historic crude prices at the end of the year.

ADVERTISEMENT
Exxon also set a U.S. record for the biggest quarterly profit, posting net income of $11.7 billion for the final three months of 2007, beating its own mark of $10.71 billion in the fourth quarter of 2005.

The previous record for annual profit was $39.5 billion, which Exxon Mobil had in 2006.

The eye-popping results weren't a surprise given record prices for a barrel of oil at the end of 2007. For much of the fourth quarter, they hovered around $90 a barrel, more than 50 percent higher than a year ago.

Crude prices reached an all-time trading high of $100.09 on Jan. 3 but have fallen about 10 percent since then.

The record profit for the October-December period amounted to $2.13 a share versus $1.76 a share in 2006. Year-ago net income was $10.25 billion.

Also extraordinary was Exxon Mobil's revenue, which rose 30 percent in the fourth quarter to $116.6 billion from $90 billion a year ago. For the year, sales rose to $404.5 billion -- the most ever for the Irving, Texas-based company -- from $377.64 billion in 2006.

In addition to benefiting from higher commodity prices, the company said its results were evidence of a well-run, globally diverse operation that's investing billions to find more energy supplies. It noted that its capital and exploration spending amounted to nearly $21 billion last year, up 5 percent from 2006.

Exxon Mobil produces about 3 percent of the world's oil.

Its shares fell 45 cents to $85.95 Friday after rising as high as $87.86 earlier in the session. The shares have traded in a 52-week range of $69.02 to $95.27.

Higher commodity prices in the quarter were clearly evident from earnings at Exxon Mobil's exploration and production arm, known as the upstream. Income rose 32 percent to $8.2 billion from $6.2 billion a year ago.

On an oil-equivalent basis, production increased nearly 1 percent from the fourth quarter of 2006, driven by higher demand for natural gas in Europe. Excluding the expropriation of its Venezuelan assets last year, divestments and other factors, production rose nearly 3 percent.

Refining and marketing, or downstream, earnings were $2.3 billion, up from nearly 2 billion in the year-ago quarter, as improved refining operations offset lower U.S. refining margins.

In the U.S., downstream earnings were off sharply from a year ago -- $622 million in the most-recent quarter versus $945 million in 2006.

Refining margins -- the difference between the cost of crude and what the company makes on refined products such as gasoline -- have been squeezed in recent months as spiking oil prices outpaced increases in gasoline prices and other refined products.

Already, ConocoPhillips has said record oil prices at the end of 2007 helped it post a 37 percent increase in fourth-quarter profit, even as it produced less crude and natural gas than a year earlier. Its quarterly net income rose to $4.37 billion versus $3.2 billion a year earlier.

ConocoPhillips is the nation's third-largest integrated oil company behind Exxon Mobil and Chevron Corp.

Chevron reported separately Friday that its profit rose 29 percent in the fourth quarter, as surging prices for crude oil offset weak results from its refining business. It earned $4.88 billion, or $2.32 per share, from $3.77 billion, or $1.74 per share, a year earlier. Revenue rose 29 percent to $61.41 billion from $47.75 billion.

On Thursday, Royal Dutch Shell PLC, Europe's largest oil company, posted a 60 percent gain in fourth-quarter profit to $8.47 billion on asset sales and higher oil prices. Shell said full-year net profit was a company record $31.3 billion, up 23 percent from the prior year.

My comments on Ramsey's article:

"HD Radio technology company iBiquity Digital estimates about 200,000
HD radios were sold last year [2006]..."

"Finally some hard numbers on HD radio sales: 330,000 sold in 2007, up
from 40,000 receivers in 2006."

So, which is it - 200,000 HD radios sold in 2006, or 40,000? What's needed are a couple of well-respected independent auditors to get a "real" count of the actual number of HD radios sold, where money actually changed hands, and not counting "trade" purchases, returns, and HD radio giveaways by stations and car dealerships - the actual number of "Joe Blow" consumers that bought and kept HD radios. No doubt, the number would be much lower. Do we remember the HD/QVC sales fiasco, where only 200 HD radios were reportedly sold - I bet, that half were returned. Could this be a count of HD Radio chipsets produced and HD radios manufactured? Is it realistic to assume, that retailers are still reporting back the dismal sales numbers?

Finally, here is proof to the contrary:

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"Retailers say no one is buying HD radios in South Texas despite scattered attempts by broadcasters to promote the digital signal technology..."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"HD Radio Has Yet To Take Off"

"But the technology hasn't taken off as expected. NBC 5 could not find one person who owns a hi-def radio and neither could KISS FM's program director. I don't know anybody that has one yet, Davis said."

http://www.nbc5i.com/technology/14878368/detail.html

"High-def radio is here, but is anyone listening?"

"But 19 Utah stations are broadcasting 31 high-definition radio channels with six more coming soon... It seems the stations are investing in technology the public isn't quite ready to embrace.... Some have heard it referred to but never had cause to get one. Unless you are a gadget person, few of these radios have sold."

http://www.sltrib.com/technology/ci_7852904

"HD's here. Who's listening?"

"But consumers haven't exactly been stampeding to electronics stores for the new HD Radio sets that are required to tune in the digital signals."

Hi Terry,

I've not heard any feedback about the X20's display, but my impression is that is is pretty sturdy. The case doesn't flex much...it feels stout to me, despite the very light weight. I think it would be a good idea to keep the screen covered as much as possible though, such as with the modded Verizon Chocolate cell phone case I describe in the blog article.

One advantage I see to the X20 over the Zen V series is the 64 kbps recording format, for smaller file sizes. The lowest rate that the Zen Vs will record is 128 kbps.

Guy

Totalitarianism on one 'wing' and anarchy on the other. Everything else
is in between.

In communism, the State is the Corporation. In Fascism, the Corporations
are the State. Note both systems use the masses as consumers/labour.

I've built antenna using tent poles as well. I think I got them at
Big 5. However, for my larger loop, I used white rods from Tap

Plastics:
http://www.lazygranch.com/images/radio/bigassant.jpg
http://www.tapplastics.com/shop/product.php?pid=159&
So that is around 12 ft on the diagonal, or about 37ft. The fiberglass
rods are a bit stiffer than the tent poles.

>
> John k9uwa / W4

well, it is incumbent on a seller to not loose money if the item goes at the
minimum bid, and to make money if it goes for more. How to do that? well,
you have to put a little pad in postage, and a little extra pad in
international postage. That said, you also can't be overly greedy. Let's
say I pick up an item for $5 that usually sells for $25 - I put it on ebay
with a starting bid of $9.99, charge flat rate postage and let it go - if it
sells, I'm ok, if it doesn't, I put it aside and relist in a few months.
And sometimes you get lucky - you pay a few dollars, sell for hundreds. but
as a small seller, you can't get by with small margins.

Source record: 135842

About a month ago I bought two DXE-ARAV-1P for phasing on MediumWave/ Shortwave. These are excellent antennas phased or alone. I am have now erected a 500' Beverage antenna (Terminated) and a 100' Pennant antenna. So the active antenna, although is a workhorse,does not work as well as my beverage and Pennant. As we all know no Active antenna can take the place of these type of antennas. These Active antennas are quiet and the very best antennas for when you don't have room for the longer wires. They cost $229.00 each. I am willing to let them go for $350.00 shipped. The catch is not sending the 102" whip antenna which adds a lot to shipping. These are your everyday 102" whips...no coils, straight stainless steel. I have used these outside and sealed them using coax seal so they can be opened without a problem. Check the DXengineering website and eham.net for reviews on these outstanding receive antennas. I also have a Quantum Phaser I'll throw in and make the deal $400.00 the cost new for all of this straight on including shipping would be $630.00. Local pick up can be arranged for cash only..or maybe you have something for a good trade. Located in Newark,Delaware...email me kyw1060 at verizon.net. I left the @ out so spam bots don't get my e-mail address. I use the DX engineering NCC-1 phasing unit with superb results. The Quantum Phaser is an excellent choice when you're counting dollars......no tire kickers, however I'll be glad to answer questions and can send you audio clips of BBC on Longwave using the the Active antennas...Voltage injecters have never been used as the NCC-1 supplies the voltage to the DXE-ARAV-1P

I was quite surprised this morning that they held up fairly well until about 1410 or so, then began the slide into the mud. Although still audible, I could not tell if they actually went into English at 1430 or not.

My local sunrise is about 1258.

Hello,

On the longer wavelength (> 150m), where the total impedance of the
wire is far above 50 Ohms (absolute value), you will get more signal.
It does not guarantee better S/N ratio as external noise may increase
as much as the signal.

I believe, but not tested it, that on the shorter wavelength signal
can both go up or down, as at several frequencies the wire itself will
be closer to 50 Ohms. For reducing noise, you may experiment with
changing the ground connection (if strong interference is generated in
your house and gets into your antenna via the ground connection).

Best regards,

Wim

I rather doubt I'll be trying it, Brian. Tentative plans here are to try and put up an inverted vee this coming summer for 60 meters, and then use that for other bands as well with an antenna tuner. Not even sure anymore if it would even be worthwhile to try it, but I might have a go with it.

I do have a used Eavesdropper C for sale, minus the static arrestor, for $25.00 + shipping, in case anyone might be interested.

I'm not Steve but will offer my comment anyway. It looks very much
like the Alpha-Delta sloper in length and with the inductive coils.
The prime difference seems to be that it accepts coax or ladder line.

Coincidentally, I was at their store in Palmdale looking for MT,
didn't find it either, but bought Pop Comm for the first time in
perhaps a couple years. (The bookstore is spelled "Barnes & Noble", by
the way.)

I'm thinking about getting back into shortwave after many years away
from the hobby, so I was mainly interested in the listener loggings to
see what's on nowadays. As a Southern Californian, I was struck by the
dominance of reports from the east half of the country. Maybe it's a
regional cultural thing, or maybe propagation favors the East.

Every dozen years or so the urge hits me. Last time was the mid 90s, I
think. A guy I worked with -- big time radio buff -- was buying a
Drake R8, and tried to convince me to do the same. For reasons I can
no longer remember, it never happened. But I've been reading the
receiver reviews in the 2008 Passport to World Band Radio, so maybe
this year.

Like the OP, I couldn't get into that bizarre KLFF story in Pop Comm.
I only read part of it. The straightforward radio history stories they
used to run were more to my taste.

At least there's some technical depth to the magazine, as in the
propagation article. I suspect it mainly rehashes what's on the web,
but there's more incentive to study something thoroughly if it's in a
magazine I paid for!

If that's the Zap Trapper that came with the antenna, be advised it
has a finite halflife. It loses effectiveness over time.

Could be, but it's never been used. It's currently a $24 item at Universal.

GH,

That was my take on the Diagram of the new "Hy-Power"
AB-SWL-SL Shortwave Sloper Antenna
http://www.universal-radio.com/catalog/sw_ant/5062dia.jpg
http://www.universal-radio.com/catalog/sw_ant/5062.html

It sure do look like the Alpha Delta DX-SWL Sloper Antenna.
http://www.universal-radio.com/catalog/sw_ant/pg29d1a.gif
http://www.alphadeltacom.com/dxswl_ii.htm
http://www.universal-radio.com/catalog/sw_ant/0799.html

"Close Enough" to be a 'clone' -BUT- the Dual Connections for
with SO-239 for Coax Cable or Two Terminals for Twin-Lead or
Ladder-Line.

- coax which then leads into my house and to my reveiver (NRD 545).
- The coax shield is grounded at the entry point into my house..
-
- I have no balun between the longwire and my coax.
- So my question is would a 9:1 balun give me any SIGNIFICANT
- improvement in signal level or in noise reduction?

NEIL - The Answer would be : No and Yes ~ RHF

Generally Speaking using a 9:1 Matching Transformer with
a Longwire Antenna and a Ground at the Radio Shack :
[The so-called "Magnetic Longwire Balun" (MLB)]

1st - "No" - The peak Signal Levels may be less on some
Frequencies -but- the Average Signal Level will be equal
or higher across all Frequencies : 500 kHz to 30 MHz.

2nd - "Yes" - The Average Noise Level will be lower across
all Frequencies : 500 kHz to 30 MHz.

3rd - "Results" - Good Signal Levels and Lower Noise result
in a Better Signal-to-Noise Ratio which means that the general
Listenability of your Signals coming from the Antenna to your
Radio / Receiver Improves "Significantly".

I have been using the H-800 with a Ten Tec RX-320D receiver for a
couple of years now. I recently moved it to a new position and noticed
that the rubber base is a bit damaged (must be all that sunlight here
in San Diego ;-)

Performance wise, it does a good job as long as you keep it away from
strong noise sources.

By the way, have a look at the H-900. It's a model exclusively
distributed by Grove Enterprises (the "Monitoring Times" Grove). It is
a bit more expensive but seems better performance wise. I might buy
that model to replace this one (might... as the H-800 still works
fine). Here is the direct link:

Grundig/Tecsun/Eton is over-priced, third-world, not made in Germany
anymore.

There are some interesting products sold under the Grundig name (e.g.
Grundig G5), and there are some sub-standard products sold under the
Grundig name. But the Grundig of today is not the Grundig of years
back. As it's a bit more than I have the time to delve into, I will
go the RHF route and refer you to some external links:

http://en.wikipedia.org/wiki/Grundig
http://www.rwonline.com/reference-room/special-report/05_rwf_grundig_2.shtml

In the North American market, the Eton Corporation markets many of its
offering under the Grundig brand name. Many, but not all, of Eton's
product offerings are re-branded variants of Tecsun radios (hence
IBOCcrock's reference to the company as Grundig/Tecsun/Eton). For a
full listing of Eton's product offerings visit:

http://www.etoncorp.com

The Traveller,

H-800 "SkyMatch" LF/MF/HF Active Antenna
http://www.lfengineering.com/images/H800_lr.gif
-by- LF Engineering Co.
Internal (E-Probe) Amp. Gain : Power Gain 30 dB (1MHz)
http://www.grove-ent.com/ANT15.html
http://www.lfengineering.com/pdf/Monitoring%20Times%20H-800.pdf
E-Field Sensitivity : -24 dB
IP3 : 23 dBm
Can be Powered by a Pair (2) 9-Volt Batteries @ 18 VDC
(10 ma) or a 12 VDC to AC Adaptor

H-900 "Eenhanced Gain Probe" Active Antenna
http://www.grove-ent.com/h900.html
-by- LF Engineering Co.
http://www.lfengineering.com/pdf/H900inst.pdf
Has a Two Position Gain Switch
Low : 10 dB {Up to 12 dB}
High : 22 dB
Increased Dynamic Range
E-Field Sensitivity : -21 dB
IP3 : 35 dBm
Requires a 12 VDC (70 ma) to AC Adaptor
or a 12 VDC 5~7 AH Rechargeable Battery
http://cgi.ebay.com/_W0QQitemZ310017653019
http://cgi.ebay.com/_W0QQitemZ130194958764
Use a 12 Volt DC @ 1 Amp. Trickle Charger to keep
the 12 Volt Battery 'Chargered" and Ready-for-Service.
http://cgi.ebay.com/_W0QQitemZ310018455381
http://www.monstermarketplace.com/Electronics/Landing1414a13.html

NOTE - Due to High Amplification by both the H-800 and H-900
Active Antennas they are NOT Recommended for most 'portable'
AM/FM Shortwave Radio which tend to be Overload by then.

(OT) : Winning the US Presidency in 2008 :
John R. Edwards' Political Capital Where Is It's Value ?

My Thoughts On : John R. Edwards' (JRE) Political Capital
in the Democrat Party Presidental Race 2008.
http://en.wikipedia.org/wiki/John_Edwards
First John R. Edwards' is a White Male from North & South Carolina.

Hillary R. Clinton (HRC) is a White Female who was
http://en.wikipedia.org/wiki/Hillary_Clinton
foriginally rom the State of Illinois; then the State of Arkansas;
and via Washington DC is now from the State of New York.
IMHO - HRC does not need John R. Edwards' to add Balance
or Geographical Diversity to a HRC Presidential Ticket.
-ps- Maybe Bill Richardson from New Mexico as a Hispanic
http://en.wikipedia.org/wiki/Bill_Richardson
Male from the South & West could help her out.

Barack Hussein Obama (BHO) is a Half-White and Half-Black
http://en.wikipedia.org/wiki/Barack_Obama
Male who was originally from the State of Hawaii and then
from the State of Illinois.
IMHO - John R. Edwards' could add Balance and Geographical
Diversity to BHO's Presidential Ticket.

2976. (OT) : Winning the US Presidency in 2008 : Can Barack Obama Rightfully Be Called {Labeled as} An African-American ?

Newsgroup: rec.radio.shortwave
Date: 2008-02-03 09:21:33 UTC
From: RHF <rhf-newsgroups@pacbell.net>

(OT) : Winning the US Presidency in 2008 : Can Barack Obama
Rightfully Be Called {Labeled as} An African-American ?

My Thoughts On - Barack Hussein Obama is a Half-White
http://en.wikipedia.org/wiki/Barack_Obama
and Half-Black Male who was originally from the State of
Hawaii and then from the State of Illinois.

Most of The Press and the Media 'label' Barack [_] Obama
as an African-America which IMHO is classic Liberal Racial
Stereotyping -meaning- One Drop of African {Black} Blood
=equals= All African {Black} -hence- African-American

WHY - I 'label' Barack Hussein Obama as a Half-White and
Half-Black Male : Because Barack Hussein Obama in-fact
'half' Euro-American {White} and 'half' African-America
-but- His Mother and Father Divorced when he was very
young and he was Raised by his White Mother and her
White Parents who were originally from Kansas in Hawaii.

NOTE - The primary Male Role Model in his Life growing-up
in Hawaii was in-fact "Stanley Dunham" his White Grandfather
from Kansas.

FWIW - Bob Dole (R) was from Kansas
http://en.wikipedia.org/wiki/Bob_Dole
and IMHO "Kansas" is A-OK with me.

dang - i been think and my little brain hurts ~ RHF
.

2977. (OT) : Winning the US Presidency in 2008 : Barack [_] Obama - Oops What's Missing ? {Do Really You Know Him ?}

Newsgroup: rec.radio.shortwave
Date: 2008-02-03 09:48:33 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <b2b404a9-5077-47ff-bef2-885a31214abe@i72g2000hsd.googlegroups.com>
Source record: 135895

(OT) : Winning the US Presidency in 2008 : Barack [_] Obama
- Oops What's Missing ? {Do Really You Know Him ?}

QUESTION - Why doesn't The Press and Media ever mention
Barack 'Hussein' Obama's middle name "Hussein" ?
http://en.wikipedia.org/wiki/Barack_Obama
They refer to Barack 'Hussein' Obama as Barack [_] Obama ?
Oops as -if- Barack 'Hussein' Obama did not have a Middle Name !

[_] = One Second Pause ~ Barack . . . Obama

The will mention the "Rodham" part of Hillary R. Clinton's name
http://en.wikipedia.org/wiki/Hillary_Rodham_Clinton
a hundred times more often then the "Hussein" part of Barack
'Hussein' Obama's name - why, Why. WHY !
And the 'Rodham' part is her Maiden Name while "Diane"
http://en.wikipedia.org/wiki/Married_and_maiden_names
is in-fact her middle name.

What About "W" ? - The Press and Medai often refer to
President George 'Walker' Bush as George "W" Bush and
http://en.wikipedia.org/wiki/George_Walker_Bush
some in the Media would even refer to him simply as "W".
What With That ?

UWL - I guess that it must be some Un-Written-Law that No One
Mentions Barack 'Hussein' Obama's middle name "Hussein" !

IS IT LEGAL ? - When Barack 'Hussein' Obama takes the
Oath-of-Office as the US President will he use his full Legal
Name : Barack 'Hussein' Obama
-or- simply say : Barack Obama
-and- Will it be Legal and Constitutional
by omitting the Middle Name "Hussein" ?

dang - i been thinking and my little brain hurts ~ RHF

If I understand correctly, these use a gas filled tube, and remain effective until they directly short to ground, much the same as the Alpha Delta Transitrap.

I've had the Alpha Delta versions in line here for many years and they've not yet failed.

They are a sealed gas tube. However, impurities, leakage...that sort
of thing, compromise effectiveness over time. And even a few static
strikes will produce some electrolytic action between the electrodes and
the gas introducing further impurities. I read an article a some years
ago, either on the Universal or the Grove websites, recommending
replacement of the gas cartridge every few years as a matter of course.

The Transitrap has a replaceable cartridge, in part, for this reason.

Now you did it! You made me go dig out the paperwork!

From the Alpha Delta data sheet: ...Arc-Plug Cartridge replacement is indicated by an increase in VSWR during transmitter tune-up, or by a "dead" receiver caused by the Arc-Plug Cartridge being shorted due to an extremely strong near-miss lightning dischharge.

I think the "spark gap" in these things is doped with Amercium 241 which has
a half-life of 432 years.

I couldn't hear squat yesterday so I connected to "The Gulch" at:
http://piratesweek.info/

Ragnar hears lots of stuff and his radio is usually on 6925 but does tune
around a bit.

The same people who make Lewinski jokes look the other way when THEIR
party rips off their grandchildren for a trillion dollars. This is why
I do not mourn the death of America. Put a fork in 'er...

They've been out of business for many years. A completely different
company now uses the name.

Monica could have gave that blue ''stained'' dress to me.I could have
sold it for bouque piaster.
I wonder ''what'' Monica Lewinsky is ''doing'' nowadays?

Cuhulin,

Monica Lewinsky - After the Scandal
http://en.wikipedia.org/wiki/Monica_Lewinsky#After_the_scandal
In December 2006, Monica Lewinsky Graduated with a
Master's Degree in Social Psychology from the prestigious
London School of Economics. You Go Girl ! :o) ~ RHF

NOTE - While Bill Clinton went to England as Rhodes Scholar
http://en.wikipedia.org/wiki/Bill_Clinton#Education
at the University College, Oxford and 'studied' Government :
However, he never in-fact Graduated from there with a Degree.
.
-ps- Telamon be sure to Count* this as another one
of my 'Clueless Posts' -cause- IT IS ! ;-{
Plus Extra Credit for the : Cut, Copy and Paste Stuff. :o)
* Rec.Radio.Shortwave Newsgroup Readers :
Please I Need Your Votes ! -and- I Want Your Votes !
In this Weeks Race for the RRS "Clueless Troll" Award.
.
